Selected Sections of the Copyright Act of 1976 (as amended by the Home Viewer Satellite Act of 1994, Public Law 103-369)

[EDITOR'S NOTE: TEXT WITHIN THESE SYMBOLS [O> <O] IS OVERSTRUCK IN THE SOURCE.]

TITLE 17 --COPYRIGHTS

Chapter 1 --SUBJECT MATTER AND SCOPE OF COPYRIGHT

§ 111. Limitations on exclusive rights: Secondary transmissions

(a) Certain Secondary Transmissions Exempted.--The secondary transmission of a primary transmission embodying a performance or display of a work is not an infringement of copyright if--

(1) the secondary transmission is not made by a cable system, and consists entirely of the relaying, by the management of a hotel, apartment house, or similar establishment, of signals transmitted by a broadcast station licensed by the Federal Communications Commission, within the local service area of such station, to the private lodgings of guests or residents of such establishment, and no direct charge is made to see or hear the secondary transmission; or

(2) The secondary transmission is made solely for the purpose and under the conditions specified by clause (2) of section 110; or

(3) The secondary transmission is made by any carrier who has no direct or indirect control over the content or selection of the primary transmission or over the particular recipients of the secondary transmission, and whose activities with respect to the secondary transmission consist solely of providing wires, cables, or other communications channels for the use of others: Provided, That the provisions of this clause extend only to the activities of said carrier with respect to secondary transmissions and do not exempt from liability the activities of others with respect to their own primary or secondary transmissions;

(4) the secondary transmission is made by a satellite carrier for private home viewing pursuant to a statutory license under section 119; or

(5) the secondary transmission is not made by a cable system but is made by a governmental body, or other nonprofit organization, without any purpose of direct or indirect commercial advantage, and without charge to the recipients of the secondary transmission other than assessments necessary to defray the actual and reasonable costs of maintaining and operating the secondary transmission service.

(b) Secondary Transmission of Primary Transmission to Controlled Group.--Notwithstanding the provisions of subsections (a) and (c), the secondary transmission to the public of a primary transmission embodying a performance or display of a work is actionable as an act of infringement under section 501, and is fully subject to the remedies provided by sections 502 through 506 and 509, if the primary transmission is not made for reception by the public at large but is controlled and limited to reception by particular members of the public: Provided, however, That such secondary transmission is not actionable as an act of infringement if--

(1) the primary transmission is made by a broadcast station licensed by the Federal Communications Commission; and

(2) the carriage of the signals comprising the secondary transmission is required under the rules, regulations, or authorizations of the Federal Communications Commission; and

(3) the signal of the primary transmitter is not altered or changed in any way by the secondary transmitter.

(c) Secondary Transmissions by Cable Systems.--
Subject to the provisions of clauses (2), (3), and (4) of this subsection, secondary transmissions to the public by a cable system of a primary transmission made by a broadcast station licensed by the Federal Communications Commission or by an appropriate governmental authority of Canada or Mexico and embodying a performance or display of a work shall be subject to compulsory licensing upon compliance with the requirements of subsection (d) where the carriage of the signals comprising the secondary transmission is permissible under the rules, regulations, or authorizations of the Federal Communications Commission.

(2) Notwithstanding the provisions of clause (1) of this subsection, the willful or repeated secondary transmission to the public by a cable system of a primary transmission made by a broadcast station licensed by the Federal Communications Commission or by an appropriate governmental authority of Canada or Mexico and embodying a performance or display of a work is actionable as an act of infringement under section 501, and is fully subject to the remedies provided by sections 502 through 506 and 509, in the following cases:

(A) where the carriage of the signals comprising the secondary transmission is not permissible under the rules, regulations, or authorizations of the Federal Communications Commission; or

(B) where the cable system has not deposited the statement of account and royalty fee required by subsection (d).

(3) Notwithstanding the provisions of clause (1) of this subsection and subject to the provisions of subsection (e) of this section, the secondary transmission to the public by a cable system of a primary transmission made by a broadcast station licensed by the Federal Communications Commission or by an appropriate governmental authority of Canada or Mexico and embodying a performance or display of a work is actionable as an act of infringement under section 501, and is fully subject to the remedies provided by sections 502 through 506 and sections 509 and 510, if the content of the particular program in which the performance or display is embodied, or any commercial advertising or station announcements transmitted by the primary transmitter during, or immediately before or after, the transmission of such program, is in any way willfully altered by the cable system through changes, deletions, or additions, except for the alteration, deletion, or substitution of commercial advertisements performed by those engaged in television commercial advertising market research: Provided, That the research company has obtained the prior consent of the advertiser who has purchased the original commercial advertisement, the television station broadcasting that commercial advertisement, and the cable system performing the secondary transmissions: And provided further, That such commercial alteration, deletion, or substitution is not performed for the purpose of deriving income from the sale of that commercial time.

(4) Notwithstanding the provisions of clause (1) of this subsection, the secondary transmission to the public by a cable system of a primary transmission made by a broadcast station licensed by an appropriate governmental authority of Canada or Mexico and embodying a performance or display of a work is actionable as an act of infringement under section 501, and is fully subject to the remedies provided by sections 502 through 506 and section 509, if

(A) with respect to Canadian signals, the community of the cable system is located more than 150 miles from the United States--Canadian border and is also located south of the forty-second parallel of latitude, or

(B) with respect to Mexican signals, the secondary transmission is made by a cable system which received the primary transmission by means other than direct interception of a free space radio wave emitted by such broadcast television station, unless prior to April 15, 1976, such cable system was actually carrying, or was specifically authorized to carry, the signal of such foreign station on the system pursuant to the rules, regulations, or authorizations of the Federal Communications Commission.

(d) Compulsory License for Secondary Transmissions by Cable Systems.--

(1) A cable system whose secondary transmissions have been subject to compulsory licensing under subsection (c) shall, on a semiannual basis, deposit with the Register of Copyrights, in accordance with requirements that the Register shall prescribe by regulation--
(A) a statement of account, covering the six months next preceding, specifying the number of channels on which the cable system made secondary transmissions to its subscribers, the names and locations of all primary transmitters whose transmissions were further transmitted by the cable system, the total number of subscribers, the gross amounts paid to the cable system for the basic service of providing secondary transmissions of primary broadcast transmitters, and such other data as the Register of Copyrights may from time to time prescribe by regulation. In determining the total number of subscribers and the gross amounts paid to the cable system for the basic service of providing secondary transmissions of primary broadcast transmitters, the system shall not include subscribers and amounts collected from subscribers receiving secondary transmissions for private home viewing pursuant to section 119. Such statement shall also include a special statement of account covering any nonnetwork television programming that was carried by the cable system in whole or in part beyond the local service area of the primary transmitter, under rules, regulations, or authorizations of the Federal Communications Commission permitting the substitution or addition of signals under certain circumstances, together with logs showing the times, dates, stations, and programs involved in such substituted or added carriage; and

(B) except in the case of a cable system whose royalty is specified in subclause (C) or (D), a total royalty fee for the period covered by the statement, computed on the basis of specified percentages of the gross receipts from subscribers to the cable service during said period for the basic service of providing secondary transmissions of primary broadcast transmitters, as follows:

(i) 0.675 of 1 per centum of such gross receipts for the privilege of further transmitting any nonnetwork programming of a primary transmitter in whole or in part beyond the local service area of such primary transmitter, such amount to be applied against the fee, if any, payable pursuant to paragraphs (ii) through (iv);

(ii) 0.675 of 1 per centum of such gross receipts for the first distant signal equivalent;

(iii) 0.425 of 1 per centum of such gross receipts for each of the second, third, and fourth distant signal equivalents;

(iv) 0.2 of 1 per centum of such gross receipts for the fifth distant signal equivalent and each additional distant signal equivalent thereafter; and in computing the amounts payable under paragraph (ii) through (iv), above, any fraction of a distant signal equivalent shall be computed at its fractional value and, in the case of any cable system located partly within and partly without the local service area of a primary transmitter, gross receipts shall be limited to those gross receipts derived from subscribers located without the local service area of such primary transmitter; and

(C) if the actual gross receipts paid by subscribers to a cable system for the period covered by the statement for the basic service of providing secondary transmissions of primary broadcast transmitters total $80,000 or less, gross receipts of the cable system for the purpose of this subclause shall be computed by subtracting from such actual gross receipts the amount by which $80,000 exceeds such actual gross receipts, except that in no case shall a cable system's gross receipts be reduced to less than $3,000. The royalty fee payable under this subclause shall be 0.5 of 1 per centum, regardless of the number of distant signal equivalents, if any; and

(D) if the actual gross receipts paid by subscribers to a cable system for the period covered by the statement, for the basic service of providing secondary transmissions of primary broadcast transmitters, are more than $80,000 but less than $160,000, the royalty fee payable under this subclause shall be

(i) 0.5 of 1 per centum of any gross receipts up to $80,000; and

(ii) 1 per centum of any gross receipts in excess of $80,000 but less than $160,000, regardless of the number of distant signal equivalents, if any.

(2) The Register of Copyrights shall receive all fees deposited under this section and, after deducting the reasonable costs incurred by the Copyright Office under this section, shall deposit the balance in the Treasury of the United States, in such manner as the Secretary of the Treasury directs. All funds held by the Secretary of the Treasury shall be invested in interest-bearing United States securities for later distribution with interest by the Librarian of Congress in the event no controversy over distribution exists, or by a copyright arbitration royalty panel in the event a controversy over such distribution exists.
(3) The royalty fees thus deposited shall, in accordance with the procedures provided by clause (4), be distributed to those among the following copyright owners who claim that their works were the subject of secondary transmissions by cable systems during the relevant semiannual period:

(A) any such owner whose work was included in a secondary transmission made by a cable system of a nonnetwork television program in whole or in part beyond the local service area of the primary transmitter; and

(B) any such owner whose work was included in a secondary transmission identified in a special statement of account deposited under clause (1)(A); and

(C) any such owner whose work was included in nonnetwork programming consisting exclusively of aural signals carried by a cable system in whole or in part beyond the local service area of the primary transmitter of such programs.

(4) The royalty fees thus deposited shall be distributed in accordance with the following procedures:

(A) During the month of July in each year, every person claiming to be entitled to compulsory license fees for secondary transmissions shall file a claim with the Librarian of Congress, in accordance with requirements that the Librarian of Congress shall prescribe by regulation. Notwithstanding any provisions of the antitrust laws, for purposes of this clause any claimants may agree among themselves as to the proportionate division of compulsory licensing fees among them, may lump their claims together and file them jointly or as a single claim, or may designate a common agent to receive payment on their behalf.

(B) After the first day of August of each year, the Librarian of Congress shall, upon the recommendation of the Register of Copyrights, determine whether there exists a controversy concerning the distribution of royalty fees. If the Librarian determines that no such controversy exists, the Librarian shall, after deducting reasonable administrative costs under this section, distribute such fees to the copyright owners entitled to such fees, or to their designated agents. If the Librarian finds the existence of a controversy, the Librarian shall, pursuant to chapter 8 of this title, convene a copyright arbitration royalty panel to determine the distribution of royalty fees.

(C) During the pendency of any proceeding under this subsection, the Librarian of Congress shall withhold from distribution an amount sufficient to satisfy all claims with respect to which a controversy exists, but shall have discretion to proceed to distribute any amounts that are not in controversy.

(e) Nonsimultaneous Secondary Transmissions by Cable Systems.--

(1) Notwithstanding those provisions of the second paragraph of subsection (f) relating to nonsimultaneous secondary transmissions by a cable system, any such transmissions are actionable as an act of infringement under section 501, and are fully subject to the remedies provided by sections 502 through 506 and sections 509 and 510, unless--

(A) the program on the videotape is transmitted no more than one time to the cable system's subscribers; and

(B) the copyrighted program, episode, or motion picture videotape, including the commercials contained within such program, episode, or picture, is transmitted without deletion or editing; and

(C) an owner or officer of the cable system

(i) prevents the duplication of the videotape while in the possession of the system,

(ii) prevents unauthorized duplication while in the possession of the facility making the videotape for the system if the system owns or controls the facility, or takes reasonable precautions to prevent such duplication if it does not own or control the facility,

(iii) takes adequate precautions to prevent duplication while the tape is being transported, and

(iv) subject to clause (2), erases or destroys, or causes the erasure or destruction of, the videotape; and
(D) within forty-five days after the end of each calendar quarter, an owner or officer of the cable system executes an affidavit attesting

(i) to the steps and precautions taken to prevent duplication of the videotape, and

(ii) subject to clause (2), to the erasure or destruction of all videotapes made or used during such quarter; and

(E) such owner or officer places or causes each such affidavit, and affidavits received pursuant to clause (2)(C), to be placed in a file, open to public inspection, at such system's main office in the community where the transmission is made or in the nearest community where such system maintains an office; and

(F) the nonsimultaneous transmission is one that the cable system would be authorized to transmit under the rules, regulations, and authorizations of the Federal Communications Commission in effect at the time of the nonsimultaneous transmission if the transmission had been made simultaneously, except that this subclause shall not apply to inadvertent or accidental transmissions.

(2) If a cable system transfers to any person a videotape of a program nonsimultaneously transmitted by it, such transfer is actionable as an act of infringement under section 501, and is fully subject to the remedies provided by sections 502 through 506 and 509, except that, pursuant to a written, nonprofit contract providing for the equitable sharing of the costs of such videotape and its transfer, a videotape nonsimultaneously transmitted by it, in accordance with clause (1), may be transferred by one cable system in Alaska to another system in Alaska, by one cable system in Hawaii permitted to make such nonsimultaneous transmissions to another such cable system in Hawaii, or by one cable system in Guam, the Northern Mariana Islands, or the Trust Territory of the Pacific Islands, to another cable system in any of those three territories, if:

(A) each such contract is available for public inspection in the offices of the cable systems involved, and a copy of such contract is filed, within thirty days after such contract is entered into, with the Copyright Office (which Office shall make each such contract available for public inspection); and

(B) the cable system to which the videotape is transferred complies with clause (1)(A), (B), (C)(i), (iii), and (iv), and (D) through (F); and

(C) such system provides a copy of the affidavit required to be made in accordance with clause (1)(D) to each cable system making a previous nonsimultaneous transmission of the same videotape.

(3) This subsection shall not be construed to supersede the exclusivity protection provisions of any existing agreement, or any such agreement hereafter entered into, between a cable system and a television broadcast station in the area in which the cable system is located, or a network with which such station is affiliated.

(4) As used in this subsection, the term "videotape", and each of its variant forms, means the reproduction of the images and sounds of a program or programs broadcast by a television broadcast station licensed by the Federal Communications Commission, regardless of the nature of the material objects, such as tapes or films, in which the reproduction is embodied.

(f) Definitions.--As used in this section, the following terms and their variant forms mean the following:

A "primary transmission" is a transmission made to the public by the transmitting facility whose signals are being received and further transmitted by the secondary transmission service, regardless of where or when the performance or display was first transmitted. In the case of a low power television station, as defined by the rules and regulations of the Federal Communications Commission, the "local service area of a primary transmitter" comprises the area within 35 miles of the transmitter site, except that in the case of such a station located in a standard metropolitan statistical area which has one of the 50 largest populations of all standard metropolitan statistical areas (based on the 1980 decennial census of population taken by the Secretary of Commerce), the number of miles shall be 20 miles.

A "secondary transmission" is the further transmitting of a primary transmission simultaneously with the primary transmission, or nonsimultaneously with the primary transmission if by a "cable system" not located in whole or in part
A "cable system" is a facility, located in any State, Territory, trust Territory, or Possession, that in whole or in part receives signals transmitted or programs broadcast by one or more television broadcast stations licensed by the Federal Communications Commission, and makes secondary transmissions of such signals or programs by wires, cables, microwave or other communications channels to subscribing members of the public who pay for such service. For purposes of determining the royalty fee under subsection (d)(1), two or more cable systems in contiguous communities under common ownership or control or operating from one headend shall be considered as one system.

The "local service area of a primary transmitter" in the case of a television broadcast station, comprises the area in which such station is entitled to insist upon its signal being retransmitted by a cable system pursuant to the rules, regulations, and authorizations of the Federal Communications Commission in effect on April 15, 1976, or such station's television market as defined in section 76.55(e) of title 47, Code of Federal Regulations (as in effect on September 18, 1993), or any modifications to such television market made, on or after September 18, 1993, pursuant to section 76.55(e) or 76.59 of title 47 of the Code of Federal Regulations, or in the case of a television broadcast station licensed by an appropriate governmental authority of Canada or Mexico, the area in which it would be entitled to insist upon its signal being retransmitted if it were a television broadcast station subject to such rules, regulations, and authorizations.

The "local service area of a primary transmitter", in the case of a radio broadcast station, comprises the primary service area of such station pursuant to the rules and regulations of the Federal Communications Commission.

A "distant signal equivalent" is the value assigned to the secondary transmission of any nonnetwork television programming carried by a cable system in whole or in part beyond the local service area of the primary transmitter of such programming. It is computed by assigning a value of one to each independent station and a value of one-quarter to each network station and noncommercial educational station for the nonnetwork programming so carried pursuant to the rules, regulations, and authorizations of the Federal Communications Commission. The foregoing values for independent, network, and noncommercial educational stations are subject, however, to the following exceptions and limitations. Where the rules and regulations of the Federal Communications Commission require a cable system to omit the further transmission of a particular program and such rules and regulations also permit the substitution of another program embodying a performance or display of a work in place of the omitted transmission, or where such rules and regulations in effect on the date of enactment of this Act permit a cable system, at its election, to effect such deletion and substitution of a nonlive program or to carry additional programs not transmitted by primary transmitters within whose local service area the cable system is located, no value shall be assigned for the substituted or additional program; where the rules, regulations, or authorizations of the Federal Communications Commission in effect on the date of enactment of this Act permit a cable system, at its election, to effect the substitution of another program embodying a performance or display of a work in place of the omitted transmission, the value assigned for the substituted or additional program shall be, in the case of a live program, the value of one full distant signal equivalent multiplied by a fraction that has as its numerator the number of days in the year in which such substitution occurs and as its denominator the number of days in the year. In the case of a station carried pursuant to the late-night or specialty programming rules of the Federal Communications Commission, or a station carried on a part-time basis where full-time carriage is not possible because the cable system lacks the activated channel capacity to retransmit on a full-time basis all signals which it is authorized to carry, the values for independent, network, and noncommercial educational stations set forth above, as the case may be, shall be multiplied by a fraction which is equal to the ratio of the broadcast hours of such station carried by the cable system to the total broadcast hours of the station.

A "network station" is a television broadcast station that is owned or operated by, or affiliated with, one or more of the television networks in the United States providing nationwide transmissions, and that transmits a substantial part of the programming supplied by such networks for a substantial part of that station's typical broadcast day.

An "independent station" is a commercial television broadcast station other than a network station.

A "noncommercial educational station" is a television station that is a noncommercial educational broadcast station as defined in section 397 of title 47.

§ 119. Limitations on exclusive rights: Secondary transmissions of superstations and network stations for private home viewing
(a) Secondary transmissions by satellite carriers.--

(1) Superstations.--Subject to the provisions of paragraphs (3), (4), and (6) of this subsection, secondary transmissions of a primary transmission made by a superstation and embodying a performance or display of a work shall be subject to statutory licensing under this section if the secondary transmission is made by a satellite carrier to the public for private home viewing, and the carrier makes a direct or indirect charge for each retransmission service to each household receiving the secondary transmission or to a distributor that has contracted with the carrier for direct or indirect delivery of the secondary transmission to the public for private home viewing.

(2) Network stations.--

(A) In general.--Subject to the provisions of subparagraphs (B) and (C) of this paragraph and paragraphs (3), (4), (5), and (6) of this subsection, secondary transmissions of programming contained in a primary transmission made by a network station and embodying a performance or display of a work shall be subject to statutory licensing under this section if the secondary transmission is made by a satellite carrier to the public for private home viewing, and the carrier makes a direct or indirect charge for such retransmission service to each subscriber receiving the secondary transmission.

(B) Secondary transmissions to unserved households.--The statutory license provided for in subparagraph (A) shall be limited to secondary transmissions to persons who reside in unserved households.

(C) Submission of subscriber lists to networks.--A satellite carrier that makes secondary transmissions of a primary transmission made by a network station pursuant to subparagraph (A) shall, [O>90 days after the effective date of the Satellite Home Viewer Act of 1988, or<O] 90 days after commencing such secondary transmissions, [O>whichever is later,<O] submit to the network that owns or is affiliated with the network station a list identifying (by name and street address, including county and zip code) all subscribers to which the satellite carrier currently makes secondary transmissions of that primary transmission. Thereafter, on the 15th of each month, the satellite carrier shall submit to the network a list identifying (by name and street address, including county and zip code) any persons who have been added or dropped as such subscribers since the last submission under this subparagraph. Such subscriber information submitted by a satellite carrier may be used only for purposes of monitoring compliance by the satellite carrier with this subsection. The submission requirements of this subparagraph shall apply to a satellite carrier only if the network to whom the submissions are to be made on file with the Register of Copyrights, [O>on or after the effective date of the Satellite Home Viewer Act of 1988,<O] a document identifying the name and address of the person to whom such submissions are to be made. The Register shall maintain for public inspection a file of all such documents.

(3) Noncompliance with reporting and payment Requirements.--Notwithstanding the provisions of paragraphs (1) and (2), the willful or repeated secondary transmission to the public by a satellite carrier of a primary transmission made by a superstation or a network station and embodying a performance or display of a work is actionable as an act of infringement under section 501, and is fully subject to the remedies provided by sections 502 through 506 and 509, where the satellite carrier has not deposited the statement of account and royalty fee required by subsection (b), or has failed to make the submissions to networks required by paragraph (2)(C).

(4) Willful alterations.--Notwithstanding the provisions of paragraphs (1) and (2), the secondary transmission to the public by a satellite carrier of a primary transmission made by a superstation or a network station and embodying a performance or display of a work is actionable as an act of infringement under section 501, and is fully subject to the remedies provided by sections 502 through 506 and sections 509 and 510, if the content of the particular program in which the performance or display is embodied, or any commercial advertising or station announcement transmitted by the primary transmitter during, or immediately before or after, the transmission of such program, is in any way willfully altered by the satellite carrier through changes, deletions, or additions, or is combined with programming from any other broadcast signal.

(5) Violation of territorial restrictions on statutory license for network stations.--

(A) Individual violations.--The willful or repeated secondary transmission by a satellite carrier of a primary transmission made by a network station and embodying a performance or display of a work to a subscriber who does
not reside in an unserved household is actionable as an act of infringement under section 501 and is fully subject to the remedies provided by sections 502 through 506 and 509, except that—

(i) no damages shall be awarded for such act of infringement if the satellite carrier took corrective action by promptly withdrawing service from the ineligible subscriber, and

(ii) any statutory damages shall not exceed $5 for such subscriber for each month during which the violation occurred.

(B) Pattern of violations.--If a satellite carrier engages in a willful or repeated pattern or practice of delivering a primary transmission made by a network station and embodying a performance or display of a work to subscribers who do not reside in unserved households, then in addition to the remedies set forth in subparagraph (A)—

(i) if the pattern or practice has been carried out on a substantially nationwide basis, the court shall order a permanent injunction barring the secondary transmission by the satellite carrier, for private home viewing, of the primary transmissions of any primary network station affiliated with the same network, and the court may order statutory damages of not to exceed $250,000 for each 6-month period during which the pattern or practice was carried out; and

(ii) if the pattern or practice has been carried out on a local or regional basis, the court shall order a permanent injunction barring the secondary transmission, for private home viewing in that locality or region, by the satellite carrier of the primary transmissions of any primary network station affiliated with the same network, and the court may order statutory damages of not to exceed $250,000 for each 6-month period during which the pattern or practice was carried out.

(C) Previous subscribers excluded.--Subparagraphs (A) and (B) do not apply to secondary transmissions by a satellite carrier to persons who subscribed to receive such secondary transmissions from the satellite carrier or a distributor before the date of the enactment of [O=the Satellite Home Viewer Act of 1988<O] this section.

(D) Burden of proof.--In any action brought under this paragraph, the satellite carrier shall have the burden of proving that its secondary transmission of a primary transmission by a network station is for private home viewing to an unserved household.

(6) Discrimination by a satellite carrier.--Notwithstanding the provisions of paragraph (1), the willful or repeated secondary transmission to the public by a satellite carrier of a primary transmission made by a superstation or a network station and embodying a performance or display of a work is actionable as an act of infringement under section 501, and is fully subject to the remedies provided by sections 502 through 506 and 509, if the satellite carrier unlawfully discriminates against a distributor.

(7) Geographic limitation on secondary transmissions.--The statutory license created by this section shall apply only to secondary transmissions to households located in the United States.

(8) Transitional signal intensity measurement procedures.--

(A) In general.--Subject to subparagraph (C), upon a challenge by a network station regarding whether a subscriber is an unserved household within the predicted Grade B Contour of the station, the satellite carrier shall, within 60 days after the receipt of the challenge—

(i) terminate service to that household of the signal that is the subject of the challenge, and within 30 days thereafter notify the network station that made the challenge that service to that household has been terminated; or

(ii) conduct a measurement of the signal intensity of the subscriber's household to determine whether the household is an unserved household after giving reasonable notice to the network station of the satellite carrier's intent to conduct the measurement.
(B) Effect of measurement.--If the satellite carrier conducts a signal intensity measurement under subparagraph (A) and the measurement indicates that--

(i) the household is not an unserved household, the satellite carrier shall, within 60 days after the measurement is conducted, terminate the service to that household of the signal that is the subject of the challenge, and within 30 days thereafter notify the network station that made the challenge that service to that household has been terminated; or

(ii) the household is an unserved household, the station challenging the service shall reimburse the satellite carrier for the costs of the signal measurement within 60 days after receipt of the measurement results and a statement of the costs of the measurement.

(C) Limitation on measurements.--

(i) Notwithstanding subparagraph (A), a satellite carrier may not be required to conduct signal intensity measurements during any calendar year in excess of 5 percent of the number of subscribers within the network station's local market that have subscribed to the service as of the effective date of the Satellite Home Viewer Act of 1994.

(ii) If a network station challenges whether a subscriber is an unserved household in excess of 5 percent of the subscribers within the network's station local market within a calendar year, subparagraph (A) shall not apply to challenges in excess of such 5 percent, but the station may conduct its own signal intensity measurement of the subscriber's household after giving reasonable notice to the satellite carrier of the network station's intent to conduct the measurement. If such measurement indicates that the household is not an unserved household, the carrier shall, within 60 days after receipt of the measurement, terminate service to the household of the signal that is the subject of the challenge and within 30 days thereafter notify the network station that made the challenge that service has been terminated. The carrier shall also, within 60 days after receipt of the measurement and a statement of the costs of the measurement, reimburse the network station for the cost it incurred in conducting the measurement.

(D) Outside the predicted grade b contour.--

(i) If a network station challenges whether a subscriber is an unserved household outside the predicted Grade B Contour of the station, the station may conduct a measurement of the signal intensity of the subscriber's household to determine whether the household is an unserved household after giving reasonable notice to the satellite carrier of the network station's intent to conduct the measurement.

(ii) If the network station conducts a signal intensity measurement under clause (i) and the measurement indicates that--

(I) the household is not an unserved household, the station shall forward the results to the satellite carrier who shall, within 60 days after receipt of the measurement, terminate the service to the household of the signal that is the subject of the challenge, and shall reimburse the station for the costs of the measurement within 60 days after receipt of the measurement results and a statement of such costs; or

(II) the household is an unserved household, the station shall pay the costs of the measurement.

(9) Loser pays for signal intensity measurement; recovery of measurement costs in a civil action.--In any civil action filed relating to the eligibility of subscribing households as unserved households--

(A) a network station challenging such eligibility shall, within 60 days after receipt of the measurement results and a statement of such costs, reimburse the satellite carrier for any signal intensity measurement that is conducted by that carrier in response to a challenge by the network station and that establishes the household is an unserved household; and

(B) a satellite carrier shall, within 60 days after receipt of the measurement results and a statement of such costs, reimburse the network station challenging such eligibility for any signal intensity measurement that is conducted by that station and that establishes the household is not an unserved household.
(10) Inability to conduct measurement.--If a network station makes a reasonable attempt to conduct a site measurement of its signal at a subscriber's household and is denied access for the purpose of conducting the measurement, and is otherwise unable to conduct a measurement, the satellite carrier shall within 60 days notice thereof, terminate service of the station's network to that household.

(b) Statutory license for secondary transmissions for private home viewing.--

(1) Deposits with the Register of Copyrights.--A satellite carrier whose secondary transmissions are subject to statutory licensing under subsection (a) shall, on a semiannual basis, deposit with the Register of Copyrights, in accordance with requirements that the Register shall prescribe by regulation--

(A) a statement of account, covering the preceding 6-month period, specifying the names and locations of all superstations and network stations whose signals were transmitted, at any time during that period, to subscribers for private home viewing as described in subsections (a)(1) and (a)(2), the total number of subscribers that received such transmissions, and such other data as the Register of Copyrights may from time to time prescribe by regulation; and

(B) a royalty fee for that 6-month period, computed by--

(i) multiplying the total number of subscribers receiving each secondary transmission of a superstation during each calendar month by [O>12 cents<O] 17.5 cents per subscriber in the case of superstations not subject to syndicated exclusivity under the regulations of the Federal Communications Commission, and 14 cents per subscriber in the case of superstations subject to such syndicated exclusivity;

(ii) multiplying the number of subscribers receiving each secondary transmission of a network station during each calendar month by [O>3<O] 6 cents; and

(iii) adding together the totals computed under clauses (i) and (ii).

(2) Investment of fees.--The Register of Copyrights shall receive all fees deposited under this section and, after deducting the reasonable costs incurred by the Copyright Office under this section (other than the costs deducted under paragraph (4)), shall deposit the balance in the Treasury of the United States, in such manner as the Secretary of the Treasury directs. All funds held by the Secretary of the Treasury shall be invested in interest-bearing securities of the United States for later distribution with interest by the Librarian of Congress as provided by this title.

(3) Persons to whom fees are distributed.--The royalty fees deposited under paragraph (2) shall, in accordance with the procedures provided by paragraph (4), be distributed to those copyright owners whose works were included in a secondary transmission for private home viewing made by a satellite carrier during the applicable 6-month accounting period and who file a claim with the Librarian of Congress under paragraph (4).

(4) Procedures for distribution.--The royalty fees deposited under paragraph (2) shall be distributed in accordance with the following procedures:

(A) Filing of claims for fees.--During the month of July in each year, each person claiming to be entitled to statutory license fees for secondary transmissions for private home viewing shall file a claim with the Librarian of Congress, in accordance with requirements that the Librarian of Congress shall prescribe by regulation. For purposes of this paragraph, any claimants may agree among themselves as to the proportionate division of statutory license fees among them, may lump their claims together and file them jointly or as a single claim, or may designate a common agent to receive payment on their behalf.

(B) Determination of controversy; distributions.--After the first day of August of each year, the Librarian of Congress shall determine whether there exists a controversy concerning the distribution of royalty fees. If the Librarian of Congress determines that no such controversy exists, the Librarian of Congress shall, after deducting reasonable administrative costs under this paragraph, distribute such fees to the copyright owners entitled to receive them, or to their designated agents. If the Librarian of Congress finds the existence of a controversy, the Librarian of Congress shall, pursuant to chapter 8 of this title, convene a copyright arbitration royalty panel to determine the distribution of royalty fees.
(C) Withholding of fees during controversy.--During the pendency of any proceeding under this subsection, the Librarian of Congress shall withhold from distribution an amount sufficient to satisfy all claims with respect to which a controversy exists, but shall have discretion to proceed to distribute any amounts that are not in controversy.

(c) Adjustment of royalty fees.--

(1) Applicability and determination of royalty fees.--The rate of the royalty fee payable under subsection (b)(1)(B) shall be effective until [O>December 31, 1992,<O] unless a royalty fee is established under paragraph (2), (3), or (4) of this subsection. After that date, the fee shall be determined either in accordance with the voluntary negotiation procedure specified in paragraph (2) or in accordance with the compulsory arbitration procedure specified in paragraphs (3) and (4).

(2) Fee set by voluntary negotiation.--

(A) Notice of initiation of proceedings.--On or before [O>July 1, 1991<O] July 1, 1996, the Librarian of Congress shall cause notice to be published in the Federal Register of the initiation of voluntary negotiation proceedings for the purpose of determining the royalty fee to be paid by satellite carriers under subsection (b)(1)(B).

(B) Negotiations.--Satellite carriers, distributors, and copyright owners entitled to royalty fees under this section shall negotiate in good faith in an effort to reach a voluntary agreement or voluntary agreements for the payment of royalty fees. Any such satellite carriers, distributors, and copyright owners may at any time negotiate and agree to the royalty fee, and may designate common agents to negotiate, agree to, or pay such fees. If the parties fail to identify common agents, the Librarian of Congress shall do so, after requesting recommendations from the parties to the negotiation proceeding. The parties to each negotiation proceeding shall bear the entire cost thereof.

(C) Agreements binding on parties; filing of agreements.--Voluntary agreements negotiated at any time in accordance with this paragraph shall be binding upon all satellite carriers, distributors, and copyright owners that are parties thereto. Copies of such agreements shall be filed with the Copyright Office within 30 days after execution in accordance with regulations that the Register of Copyrights shall prescribe.

(D) Period agreement is in effect.--The obligation to pay the royalty fees established under a voluntary agreement which has been filed with the Copyright Office in accordance with this paragraph shall become effective on the date specified in the agreement, and shall remain in effect until [O>December 31, 1994,<O] December 31, 1999, or in accordance with the terms of the agreement, whichever is later.

(3) Fee set by compulsory arbitration.--

(A) Notice of initiation of proceedings.--On or before [O>December 31, 1991<O] January 1, 1997, the Librarian of Congress shall cause notice to be published in the Federal Register of the initiation of arbitration proceedings for the purpose of determining a reasonable royalty fee to be paid under subsection (b)(1)(B) by satellite carriers who are not parties to a voluntary agreement filed with the Copyright Office in accordance with paragraph (2). Such arbitration proceeding shall be conducted under chapter 8.

(B) Factors for determining royalty fees.--In determining royalty fees under this paragraph, the copyright arbitration royalty panel appointed under chapter 8 shall consider the approximate average cost to a cable system for the right to secondarily transmit to the public a primary transmission made by a broadcast station, the fee established under any voluntary agreement filed with the Copyright Office in accordance with paragraph (2), and the last fee proposed by the parties, before proceedings under this paragraph, for the secondary transmission of superstations or network stations for private home viewing. The fee shall also be calculated to achieve the following objectives:

(i) To maximize the availability of creative works to the public.

(ii) To afford the copyright owner a fair return for his or her creative work and the copyright user a fair income under existing economic conditions.
(iii) To reflect the relative roles of the copyright owner and the copyright user in the product made available to the public with respect to relative creative contribution, technological contribution, capital investment, cost, risk, and contribution to the opening of new markets for creative expression and media for their communication.

(iv) To minimize any disruptive impact on the structure of the industries involved and on generally prevailing industry practices.

(C) Period during which decision of arbitration panel or order of Librarian effective.--The obligation to pay the royalty fee established under a determination which--

(i) is made by a copyright arbitration royalty panel in an arbitration proceeding under this paragraph and is adopted by the Librarian of Congress under section 802(f), or

(ii) is established by the Librarian of Congress under section 802(f), shall become effective as provided in section 802(g) or July 1, 1997, whichever is later.

(D) Persons subject to royalty fee.--The royalty fee referred to in subparagraph (C) shall be binding on all satellite carriers, distributors, and copyright owners, who are not party to a voluntary agreement filed with the Copyright Office under paragraph (2).<O

(D) Establishment of royalty fees.--In determining royalty fees under this paragraph, the Copyright Arbitration Panel shall establish fees for the retransmission of network stations and superstations that most clearly represent the fair market value of secondary transmissions. In determining the fair market value, the Panel shall base its decision on economic, competitive, and programming information presented by the parties, including--

(i) the competitive environment in which such programming is distributed, the cost for similar signals in similar private and compulsory license marketplaces, and any special features and conditions of the retransmission marketplace;

(ii) the economic impact of such fees on copyright owners and satellite carriers; and

(iii) the impact on the continued availability of secondary transmissions to the public.

(d) Definitions.--As used in this section--

(1) Distributor.--The term "distributor" means an entity which contracts to distribute secondary transmissions from a satellite carrier and, either as a single channel or in a package with other programming, provides the secondary transmission either directly to individual subscribers for private home viewing or indirectly through other program distribution entities.

[O><(2) Network station.--The term "network station" has the meaning given that term in section 111(f) of this title, and includes any translator station or terrestrial satellite station that rebroadcasts all or substantially all of the programming broadcast by a network station.<O]

(2) Network station.--The term "network station" means--

(A) a television broadcast station, including any translator station or terrestrial satellite station that rebroadcasts all or substantially all of the programming broadcast by a network station, that is owned or operated by, or affiliated with, one or more of the television networks in the United States which offer an interconnected program service on a regular basis for 15 or more hours per week to at least 25 of its affiliated television licensees in 10 or more States; or

(B) a noncommercial educational broadcast station (as defined in section 397 of the Communications Act of 1934).

(3) Primary network station.--The term "primary network station" means a network station that broadcasts or rebroadcasts the basic programming service of a particular national network.
(4) **Primary transmission.**--The term "primary transmission" has the meaning given that term in section 111(f) of this title.

(5) **Private home viewing.**--The term "private home viewing" means the viewing, for private use in a household by means of satellite reception equipment which is operated by an individual in that household and which serves only such household, of a secondary transmission delivered by a satellite carrier of a primary transmission of a television station licensed by the Federal Communications Commission.

(6) **Satellite carrier.**--The term "satellite carrier" means an entity that uses the facilities of a satellite or satellite service licensed by the Federal Communications Commission and operates in the Fixed-Satellite Service under part 25 of title 47 of the Code of Federal Regulations or the Direct Broadcast Satellite Service under part 100 of title 47 of the Code of Federal Regulations, to establish and operate a channel of communications for point-to-multipoint distribution of television station signals, and that owns or leases a capacity or service on a satellite in order to provide such point-to-multipoint distribution, except to the extent that such entity provides such distribution pursuant to tariff under the Communications Act of 1934, other than for private home viewing.

(7) **Secondary transmission.**--The term "secondary transmission" has the meaning given that term in section 111(f) of this title.

(8) **Subscriber.**--The term "subscriber" means an individual who receives a secondary transmission service for private home viewing by means of a secondary transmission from a satellite carrier and pays a fee for the service, directly or indirectly, to the satellite carrier or to a distributor.

(9) **Superstation.**--The term "superstation" means a television broadcast station, other than a network station, licensed by the Federal Communications Commission that is secondarily transmitted by a satellite carrier.

(10) **Unserved household.**--The term "unserved household", with respect to a particular television network, means a household that--

(A) cannot receive, through the use of a conventional outdoor rooftop receiving antenna, an over-the-air signal of grade B intensity (as defined by the Federal Communications Commission) of a primary network station affiliated with that network, and

(B) has not, within 90 days before the date on which that household subscribes, either initially or on renewal, to receive secondary transmissions by a satellite carrier of a network station affiliated with that network, subscribed to a cable system that provides the signal of a primary network station affiliated with that network.

(11) **Local market.**--The term "local market" means the area encompassed within a network station's predicted Grade B contour as that contour is defined by the Federal Communications Commission.

(e) Exclusivity of this section with respect to secondary transmissions of broadcast stations by satellite to members of the public.--No provision of section 111 of this title or any other law (other than this section) shall be construed to contain any authorization, exemption, or license through which secondary transmissions by satellite carrier for private home viewing of programming contained in a primary transmission made by a superstation or a network station may be made without obtaining the consent of the copyright owner.
