OBSERVATIONS

ON

THE DEFECTS OF THE PATENT LAWS,

WITH

SUGGESTIONS FOR THE AMENDMENT OF THEM.

THE necessity for some alteration of the Patent Laws of this country has long been felt, and the time seems at length to have arrived when something must be done to satisfy the demands of the public, for such a reform of those laws as will adapt them to the present advanced state of the useful arts.

The difficulty of dealing with this subject has hitherto been the main impediment to this desirable reform; and, in order now to ensure the preparation of a useful law respecting patent inventions, it is desirable that the subject should be fully discussed, so that the new law may be made as perfect as practicable.

With this view the writer ventures to submit to the public a few observations respecting the defects of the existing laws, and the provisions required for remedying the evils which they produce.

And, firstly, with respect to the Defects of the existing Law and Practice.

The objections to the present state of the patent law have regard—to the complicated and dilatory proceedings

which must be taken to procure patents;—to the enormous cost of such grants; and—to the inefficiency of the law for the protection of the rights either of patentees or the public.

Proceedings for
obtaining Pa-
tents.

The report of the Privy Seal Commission, published some months ago, and the subsequent public discussions respecting the complex procedure for obtaining a patent, render it unnecessary to make any detailed statement of the numerous steps which must be taken before an inventor can obtain a grant of the sole use of his invention.

The proceedings may, however, be shortly stated as being,—a petition for the patent, verified by a solemn declaration, and left at the Home Office; a reference of the petition by the Secretary of State to the Attorney or Solicitor General; a report by one of those officers to the Crown in favour of the grant; a warrant under the sign manual to the Attorney or Solicitor General to prepare a bill for the patent; the preparation of the bill and two transcripts or copies of it in the Attorney General's Office, called the Patent Bill Office; the conversion of one of these copies of the bill into the Queen's Bill, upon its receiving the sign manual; the first bill being deposited in the Signet Office, a second copy is transformed into the Signet Bill by adding a few formal words to it, and sealing it with the seal of the Secretary of State; the Signet Bill being received in the Privy Seal Office, the remaining copy of the bill is in a similar manner converted into the Privy Seal Bill; the Privy Seal Bill is then delivered to the Lord Chancellor, and a patent made in the form contained in the bill.

The three bills which have been mentioned are in fact to this effect—that the Queen's Bill commands A., the signet officer, to command B., the Lord Keeper of the Privy Seal, that he command C., the Lord Chancellor, to make the intended grant. A. then issues the required command to B., who, in his turn, issues a command to C.,

and C. then directs his officers to prepare and seal a patent.

It is not very certain when this complex machinery first had its origin, but at present it is regulated, and indeed required by a statute of the twenty-seventh year of the reign of Henry the Eighth.

Sir Edward Coke, in his Second Institute (a), speaks exultingly of the provisions of our law in this respect, and says, "such was the wisdom of prudent antiquity, that whatsoever should passe the Great Seale should come through so many hands, to the end that nothing should passe that Great Seale, that is so highly esteemed and accounted of in law, that was against law or inconvenient; or that anything should passe from the king anywayes, which he intended not, by undue or surreptitious meanes."

At the time when these observations of our great legal commentator were written, it seems to have been thought that the public security against the making of improper grants by the crown was most effectually provided for by requiring that this exercise of the prerogative should be subject to the supervision of a large number of officers.

In the present day, however, the division of responsibility amongst a large number of persons appears to produce no good result, and the best mode of providing for the security of the public is by casting responsibility upon persons of high character and attainments, who can be made accountable in their places in Parliament for their official acts.

It appears, from the language of the act of the twenty-seventh of Henry the Eighth, to be very probable that the complicated machinery which has been mentioned was in former times found to be burthensome to suitors for crown grants, for it shows that the object of the statute was to prevent the officers being deprived of their fees by the making of such grants without passing the bills through

(a) Commentary on the 28th Edw. 1, stat. 3, c. vi. (*Articuli super Chartas*), 2 Inst. p. 555.

the Signet and Privy Seal offices according to ancient custom.

The natural consequence of using such cumbrous machinery for making patent grants to inventors has been that the proceedings are treated as matters of course at almost every stage, the only exceptions being that the Attorney and Solicitor-General exercise a controlling power in opposed cases, and if, when the proceedings have arrived at the last stage, the sealing of a patent be opposed, the Lord Chancellor decides whether it is just that the patent should be sealed or not.

The useless forms ought to be abolished.

The first and most obvious mode of reforming this unnecessarily complicated procedure seems to be, to abolish every part of it which is not really useful; and the want of utility is an objection which applies to every part except the proceedings before the Attorney or Solicitor-General and the Lord Chancellor.

Although these useless forms are observed with respect to patents for inventions, there are many patents of other descriptions—and, to say the least, of quite as important a character—which pass the Great Seal without the authority of either a privy seal bill, a signet bill, or queen's bill; and it is sufficient to mention, as examples, commissions of the peace, commissions of assize and patents of precedence.

The Lord Chancellor has full power of his own authority to issue letters-patent under the great seal (commonly called a commission), appointing such persons to be justices of the peace, as his Lordship may think fit; and in many other cases may, after taking her majesty's pleasure, he may issue patents without further warrant or authority.

But even if there were no precedents for dispensing with the useless forms which have been mentioned, the retention of them would be utterly indefensible for several reasons.

No security or benefit accrues to the public from these forms, for the officers preparing them issue them as of course, and the chances of error are greatly increased by

the unnecessary multiplication of documents which are in effect copies of each other.

Her majesty's labours are unnecessarily increased by being compelled to sign her name twice for every patent granted for an invention, and the completion of a patent is occasionally so much delayed as to render it worthless when obtained.

The cost of obtaining a patent is also greatly increased, and indeed nearly doubled by these superfluous forms. In obtaining a patent extending to England and the Colonies in an unopposed case by a single person, the expense of these forms amounts to about £45:19s.(a); and if there be two patentees, the useless expense amounts to about £61:18s. 6d. (b)

Great expense of useless forms.

The extra fees paid at the Home Office, the Signet Bill Office, and the Privy Seal Office, show most conclusively indeed that the sums extracted from the pockets of poor inventors at those offices can never have been intended to bear any proportion to the work to be done, unnecessary

(a) The fees are as follows:—

| | Patent for England. | | | Extra for the Colonies. | | |
|---------------------------------|---------------------|----|----|-------------------------|----|----|
| | £ | s. | d. | £ | s. | d. |
| Reference Home Office | 2 | 2 | 6 | | | |
| Warrant do. | 7 | 13 | 6 | 1 | 7 | 6 |
| Patent Bill Office | 15 | 16 | 0 | 0 | 2 | 6 |
| Queen's Bill | 7 | 13 | 6 | 1 | 7 | 6 |
| Signet Bill | 4 | 7 | 0 | 0 | 13 | 6 |
| Privy Seal Bill | 4 | 2 | 0 | 0 | 13 | 6 |
| | <hr/> | | | <hr/> | | |
| | £41 | 14 | 6 | £4 | 4 | 6 |
| | <hr/> | | | <hr/> | | |

(b) The extra fees are paid as follows:—

| | | | |
|--|-------|----|---|
| At the Home Office (for the Queen's Warrant) | 1 | 7 | 6 |
| Patent Bill Office | 1 | 7 | 6 |
| Home Office (for the Queen's Bill) | 1 | 7 | 6 |
| Signet Office | 5 | 18 | 6 |
| Privy Seal Office | 5 | 18 | 6 |
| | <hr/> | | |
| | £15 | 19 | 6 |
| | <hr/> | | |

as it is. The intention seems rather to have been to impose a tax, two persons being deemed able to pay more than one.

Thus at the Home Office, the extra fees payable for every additional name amount to £2 : 15s.; the name in fact giving hardly any, if any, additional trouble.

At the Signet Office where a patent (not extending to the Colonies) is to be granted to one person, the fee is £4 : 7s.; but if the patent is to be granted to more than one person, a further fee of £5 : 18s. 6d. is demanded for every additional name (however numerous they may be), although no extra trouble is occasioned beyond writing the additional name once or twice. And in the Privy Seal Office, the fees demanded for additional names are the same as in the Signet Office, and bear the same proportion to the services performed.

Many fees now paid into the Exchequer.

Many of these fees, including all those received in the Privy Seal Office, and a considerable portion of those received in the Signet Office, are now paid into the Exchequer by the officers who receive them; and there can therefore be no difficulty in at once abolishing the unnecessary forms in respect of which they are paid (a).

Observations as to useless forms apply to other crown grants.

The observations which have been made respecting the antiquated and useless forms of passing patents for inventions through the Home, Signet and Privy Seal Offices apply, in fact, to many other bills for crown grants which pass through those offices; and there can be little doubt that the mode of making such grants requires a thorough revision, so as to make it better adapted to the exigencies of the times.

Many of the necessary reforms have been pointed out

(a) To the fees here mentioned to be paid for useless forms, may be added £17 : 13s. 4d. of the fees paid at the Patent Office (where the patents are actually prepared) to the holder of a sinecure office, for every patent granted to a single person. And of the fees paid at the same office a further sum of £6 : 8s. 4d. is paid into the Consolidated Fund, and about £3 : 5s. 6d. into the Fee Fund of the court.

in the Report on the Signet and Privy Seal Offices, which has already been mentioned; but it may admit of great doubt whether that inquiry (useful, no doubt, as far as it proceeded) was not of too limited a description, and whether it ought not to have been extended to the modes of passing grants under the Exchequer seal, and all other grants made by public departments, whether under the provisions of special acts of parliament or otherwise.

The division of crown grants, according to their importance to the State, into those which should pass the Great Seal and those which should pass the Privy Seal, would seem to be very natural and useful; and several departments of our state machinery might be very much simplified, by providing that all crown grants should pass under the one of those seals.

If the Lord Keeper of the Privy Seal were to be made a judge of the Court of Chancery, the grants under the Privy Seal might be recorded in that court (which is in fact the great record office of the kingdom), in the same way as those which pass the Great Seal, and thus all the records of crown grants would be collected in one place (a).

If all the useless forms and proceedings for obtaining patents for inventions which have been mentioned were abolished, there would still remain the proceedings before the Attorney or Solicitor General and those in the Court of Chancery.

The mode of passing patents if useless forms abolished merely.

The petition of an inventor might then be to her Majesty in Chancery, and be referred by the Lord Chancellor to the Attorney or Solicitor General to report upon, in like manner as at present, and the patent might be pre-

(a) It may perhaps deserve consideration whether making the Lord Keeper of the Privy Seal a judge of the Court of Chancery, having coordinate jurisdiction with the Lord Chancellor in that court, would not be equivalent in effect to abolishing an office deemed by many to be useless, and at the same time relieve the Lord Chancellor of many of the duties with which he is overburthened.

pared and sealed, upon a report being made in favour of the petitioner.

In this way the Attorney or Solicitor General might be enabled to exercise precisely the same supervision over patent grants for inventions as at present, and parties would have the same right of appeal to the Lord Chancellor as they now possess.

Whether petitions for patents should be referred to Attorney and Solicitor-General.

But the question which seems to arise is, whether the petitions of inventors for patents should still continue to be referred to the Attorney and Solicitor-General.

Many persons contend that this duty ought to be transferred to some other officer, firstly, because the professional and official duties of the Attorney and Solicitor-General prevent them from giving sufficient attention to the subject; and, secondly, because it sometimes happens that an Attorney or Solicitor-General has not the requisite knowledge of practical science to enable him to determine the conflicting claims of parties soliciting and opposing such grants.

Proceedings before the Attorney-General.

In order to determine the validity of these objections, it is of importance to inquire what the Attorney or Solicitor-General does when he disposes of a petition referred to him.

If the application of an alleged inventor for a patent be not opposed, a report is made in his favour by the Attorney or Solicitor-General, as a matter of course, without any examination into the nature of the invention, or the merits of the petitioner.

If the petition for a patent be opposed, the only question which the Attorney or Solicitor-General decides between the parties is, whether the inventions of the petitioner and the opposing party are the same or different.

If he thinks that they are different, he will report in favour of the petitioner as a matter of course; but if he should think the inventions to be the same, he makes no report: and if any part of the petitioner's invention appear

to be the same as anything claimed by the opposing party, the petitioner will only obtain a report in favour of a patent for such of his claims as do not conflict with any of those of the opposing party.

This is the practice which has, it is believed, been observed by the law officers of the crown for many years, and the effect of it is that in every unopposed case there is nothing to decide, the patent passing as of course; and that in every opposed case a question respecting the similarity of opposing claims only is decided, and a report made or withheld (as to the whole or any part of an invention for which a patent is sought) upon that ground alone.

It is true that, by a regulation made by Lord Campbell when he was Attorney-General, the petitioner for a patent in every *opposed* case was compelled to deposit an outline description of his invention with the Attorney or Solicitor-General; and this, by a recent order of Sir J. Romilly when Attorney-General, was in effect extended to unopposed cases. These orders no doubt impose upon the Attorney and Solicitor-General the duty of seeing that the descriptions of inventions deposited by petitioners are sufficiently definite, and these deposits are, as far as they go, useful, as tending to protect other inventors against fraudulent claims. But these regulations do not make it necessary for the law officers of the crown to decide anything more between petitioners for patents and their opponents than was done according to the previous practice.

Outline description deposited.

The consequence of the mode of administering the law, which has been described, is that, if two parties claim the invention, and each opposes the grant of a patent to the other, no patent will be granted to either; and each of them will be refused a grant, although the one of them may really have a better claim than his antagonist, either by reason of priority of application or otherwise.

Consequence of mode of administering the law.

One great source of difficulty in performing the duty cast upon the law officers of the crown to decide between

opposing inventors arises from the necessity of hearing each party in private, and in the absence of the other. If the parties could be heard in each other's presence, in all probability neither of them would be able to mislead the Attorney or Solicitor-General; but, at a private hearing, a party may make what assertions he pleases respecting the nature of his invention; and if the Attorney or Solicitor-General happens not to be familiar with the branch of practical art to which it relates, he may very easily be grossly deceived.

And it is doubtless a grave objection to the administration of the law, that a real inventor has no means of vindicating his claim to a patent before the law officers of the crown against the pretensions of a charlatan, who may have surreptitiously obtained a knowledge of the invention.

No machinery
for deciding
upon adverse
claims.

But the truth is that the machinery for deciding safely upon such conflicting claims before the Attorney or Solicitor-General does not exist, and indeed the duty of deciding upon such claims could not with propriety be cast upon the law officers of the crown.

Discretion of
Attorney-Ge-
neral absolute.
No appeal.

It is also to be observed, that the law or rather practice now in effect vests in the Attorney or Solicitor-General the absolute discretion of granting or withholding a patent, as he may think fit; and as the grant of a patent is made merely as a grace and favour, there is no appeal, no means by which an unsuccessful applicant for a patent can obtain a review of the decision by which his petition is refused.

The existence of this power is very much complained of, and it is urged by some that an inventor should be entitled as of right to have a patent for his invention; but the fallacy of the reasons which have been brought forward in support of this claim will be presently shown.

By others it is contended (and with much greater show of reason) that, if a discretionary power is allowed to continue, the exercise of it ought to be subject to some review,

and that a right of appeal ought to be given to every person who may deem himself aggrieved by a decision made in the first instance, whether the alleged grievance be occasioned by the granting or withholding of a patent.

The question to be considered, therefore, is whether the power of deciding, in the first instance, between claimants for patents and their opponents, should be vested in the Attorney or Solicitor-General or in some other officer, and whether the exercise of that power (in whomsoever vested) should not be subjected to some appeal or control.

The chief, if not the only, advantage to be derived from this power being vested (as at present) in the Attorney and Solicitor-General is, that, those officers being necessarily men of such high character and standing in the profession and in the country, no one ever doubts their impartiality.

Advantage of power being vested in Attorney-General.

But if in every case of an application for a patent there ought to be such an examination into the claims of the petitioner as will prevent the public from being inconvenienced by grants for inventions to which the petitioner has no valid claim, or by any other description of improper grant, it seems to be quite clear that the law officers of the crown could not devote sufficient time to the subject to enable them to perform this duty.

But cannot perform all that is required.

And the duty now performed by the Attorney and Solicitor-General, which may be said (as already explained) merely to extend to deciding questions respecting the similarity of inventions or the differences between them, may clearly be at least as well performed by any other competent officer.

On the whole, it seems to be difficult to resist the conclusion, that the duty of investigating the claims of inventors and determining the extent of their rights, should be transferred from the Attorney and Solicitor-General to some other officer, who can devote more time and attention to the subject.

Duty should be transferred to some other officer.

The enormous sums which inventors must pay to obtain patents for their inventions, form one of the greatest grievances of which they have to complain.

Enormous cost of patents.

Amounts paid
for patents.

| | |
|---|-----------|
| The fees and stamps payable upon the grant of an unopposed patent to one person for England and Wales amount to | £94 17 0 |
| Extra fees for an opposition at the report | 3 10 0 |
| Extra fees when the patent extends (as it usually does) to the colonies | 4 4 6 |
| | <hr/> |
| | £102 11 6 |

| | |
|---|-----------------|
| And if there be more than one patentee, the extra fees for each additional name amount to . . . | 18 12 10 |
| | <hr/> |
| | <u>£121 4 4</u> |

So that a patent very frequently costs in fees and stamps upwards of 120*l.*, exclusive of the agent's fee (which is usually 10*l.*), and if there be an opposition at the Great Seal, the amount of the petitioner's costs there is uncertain, but it will rarely be less than 30*l.*

Further costs
for specifica-
tion.

But the unfortunate inventor is not yet done with outlay; he has to prepare and enrol his specification, and the cost of so doing is seldom less than 20*l.*, and has been known to exceed ten times that amount.

Additional cost
of Irish and
Scotch patents.

The outlay which has been mentioned, however, only enables an inventor to obtain a patent for England, Wales and the colonies, and to procure an Irish patent he must also pay about 120*l.*, and for a Scotch patent the additional cost is about 80*l.*

Total cost of
patents for the
whole kingdom.

In every case, therefore, in which an inventor seeks to secure to himself the profit arising from his invention, he must incur a cost exceeding 300*l.* for three patents, besides the expense of preparing and enrolling three specifications; and it may be assumed that the average cost of securing the sole use of an invention, in the whole of the united kingdom, is not less than 400*l.*

Effects pro-
duced by enor-

This enormous cost of patents throws very many serious difficulties in the way of inventors. Such persons are

seldom affluent, but on the contrary are generally in straightened circumstances, frequently very poor. Many intelligent workmen are possessed of very considerable inventive powers; but being unable to pay the cost of a patent for anything they may invent, they have no motive to turn aside out of the beaten track, but continue to follow the old and well known modes of operating, however imperfect they may be. In order to make and perfect any new art of manufacturing, very considerable labour and expense is generally requisite; and an artisan has no motive for exerting himself to develop such an art, so as to bring it into practical operation, when the effect of his success will be to benefit others rather than himself. And if an artisan should seek the assistance of a capitalist to enable him to obtain the means of procuring a patent, he must disclose the invention to the man of whom he is in fact asking a favour, and thus put himself wholly in the power of the capitalist, who may dictate his own terms respecting the assistance which he will afford, and the manner of doing it. In such cases poor inventors usually pay dearly for the assistance which they obtain; and it frequently happens that they fail to obtain any profit from their inventions. And if a person to whom an inventor discloses his invention should decline to render any pecuniary assistance, what security can he have against an improper use being made of the knowledge thus communicated? Many cases occur in which inventors are entirely deprived of the benefit of their inventions, by the fraudulent conduct of those persons whom they have been induced to trust in this way.

The great cost also frequently induces an inventor to include several inventions in a patent, when, if the expense was moderate, he would obtain a separate patent for each. It is always perilous to include more than one invention in a patent; for if the claim to any one of them cannot be supported, the patent is void, and will continue so until the objectionable invention is got rid of by a disclaimer,

mous cost of patents.

Too many inventions in one patent.

and in the mean time the patentee loses the entire benefit of the patent right, even as to his other inventions. And if one of the inventions, or, as usually termed, one of the parts of an invention, happens to be really useful and beneficial to the public, a person desiring to infringe may, if he possesses evidence to show that the patent includes anything for which it cannot be supported, set the patentee at defiance; and the patentee may go into court in an action against the infringer, expecting to have to try the validity of the patent as to the invaded part of it, and he may be turned round upon an objection to another part of it which is of no substantial value, by evidence of which he was ignorant previously to the trial.

Inventors have also frequently been induced, in order to save the cost of a patent, to take a course which is attended with the greatest peril to the validity of a patent.

If a person has made an invention which will not bear the cost of a patent, he looks through the list of unspecified patents, and if he can find a patent with a title large enough to include his invention, he goes to the patentee and makes a bargain with him to insert the invention in his specification, and for the consideration agreed upon to assign over so much of the patent as relates to the invention thus inserted. If a patentee has deposited a description of his invention at the time of obtaining his patent, it is of course more difficult to insert any other person's invention in his specification in this way; but titles in general are so very vague and indefinite, that a person seeking to get his invention included in another person's patent in this way will not, generally speaking, have long to wait before he finds a patentee who is able and willing to enter into an arrangement (a).

The great cost of patents also frequently produces in-

(a) These arrangements have been rendered more difficult by the descriptions now required to be deposited in every case, but they have not been entirely prevented.

Great cost
produces bad
specifications.

directly another evil, viz., bad specifications. When an inventor has expended so large a sum in obtaining his patent right, he is, of course, anxious to save as much as possible in the cost of his specification, and this frequently induces patentees to avoid having recourse to professional assistance in the preparation of that most important document. The consequence of this is, that very many vicious specifications are enrolled, and patentees frequently lose the benefit of their patents by the mistakes made in describing their inventions.

An inventor may have the clearest idea possible respecting his invention, but unless he has been in the habit of reducing his thoughts into writing, he will, most probably, fail to draw such a description of his invention as, even with the aid of drawings, will convey his ideas to those who may read his specification.

Bad specifications not only produce great loss to inventors, but also prevent the public from acquiring such accurate information respecting the nature of the inventions as they are entitled to obtain. This information, it is to be borne in mind, is not only valuable for the purpose of enabling others to work the particular invention itself when the patent has expired; but a knowledge of one invention very frequently suggests another to the mind of an ingenious person, although perhaps the invention thus suggested may be for a purpose very different from that of the previous invention.

The loss which patentees sustain from bad specifications is very serious, and sometimes it is incurable. Thus where a patentee by mistake makes a wrong claim, claiming that for which a patent cannot be supported, the mistake is fatal, although there may be something not claimed for which the patent might have been supported. And when the specification of an invention is so vicious as to render the patentee's title doubtful, parties desirous of infringing will obtain advice respecting the sufficiency of the instrument, and will frequently proceed to use the invention

Loss sustained
from bad spe-
cifications.

upon the speculation that the patentee may fail to sustain his patent, either altogether or until amended under the act 5 & 6 Will. IV. c. 83, usually called Lord Brougham's Act.

Inefficiency of the law for protecting patentees and the public.

The inefficiency of the law for the protection of the rights of patentees and the public is occasioned to a great extent by the defects in the procedure for obtaining patents, and the other defects of the law which have already been mentioned.

There are some few others which will be adverted to hereafter in the suggestions which will be made for the alterations of the law, and it is therefore only necessary here to mention some complaints made against the present state of the law with regard to the definition of what may be made the subjects of patent privileges, and the remedies of patentees against those who violate their rights.

Definition of invention said to be too limited.

It has been contended, that the restriction contained in the Statute of Monopolies, with respect to the nature of an invention which may be made the subject of a patent grant, is of too limited a description, and that it ought to be extended.

Words of the statute sufficiently extensive.

But all the substitutes which have been suggested are either included in the words of the statute, or would, if adopted, extend to things which ought not to be made the subjects of patent privileges.

The important words in the statute^(a) are, "the sole working or making of *any manner* of new manufactures;" and, according to the construction put upon them by our courts of law, they are sufficiently extensive to include anything which ought to be made the subject of a patent.

There have been very few cases in which patents have been held bad, on the ground of the inventions not being proper subjects for patent grants; and it is believed that there is not one reported case which shows that the law is not in this respect sufficiently extensive.

(a) 21 Jac. 1, c. 3, s. 6. See the observation of Mr. Justice Heath on these words in *Boulton v. Bull*, 2 H. Bl. 463, and Dav. P. C. 191.

It is alleged by some, that when once a patent has been granted, the patentee should be entitled to the undisturbed enjoyment of the grant for which, as it is said, he has paid his money, without any one being allowed to question the validity of it in any way.

Claims to have patents made unquestionable.

The large sums demanded for patents have doubtless been one great cause of originating this opinion amongst persons interested in patent privileges.

But such persons seem to forget that the principle of the law is this, that they are allowed to have grants upon the faith that their representations as to the novelty and utility of their inventions are true: and if true, they have no reason to fear the result of any contest respecting the validity of their patents. Every man who makes an invention must be deemed to have peculiar, or at all events accurate, knowledge respecting the particular branch of art to which the invention belongs, and there can be no hardship in requiring that he should give accurate information to the authorities upon the grant of his patent, respecting what he claims to be new. He is therefore allowed to make his claims in his own way, but at his own peril; and if he will be so foolish as to claim any thing old, and which is therefore the property of the public, he must for his dishonesty or carelessness suffer the penalty of having his grant avoided.

But it is alleged by some that there ought to be a preliminary inquiry respecting the novelty of any thing for which a patent is sought to be obtained, and that the determination of that inquiry should be final. It would, however, be impossible to conduct such inquiries in such a manner as to avoid doing injustice either to petitioners for patents or to the public. Knowledge of the useful arts progresses amongst us daily; what was new yesterday is not so to day, and the lapse of a single day may have effected such a publication of an art, that no one should be allowed to deprive the public of the benefit of it, by claiming it as the subject of a patent. This progression of

Preliminary inquiry not practicable.

knowledge and publication is also going on simultaneously in all parts of the empire; and in order to ascertain the absolute novelty of any thing at any particular time, it would be necessary that all persons having knowledge upon the subject, wheresoever resident within her majesty's dominions, should be called upon to give, or at all events have afforded them the opportunity of giving, information to those who might conduct an inquiry of this description.

To summon all persons having knowledge on such a subject would simply be impracticable, and it would be the height of injustice to conclude any one by an inquiry conducted in his absence. If any tradesman yesterday commenced the public sale of a new article of manufacture in a distant part of the kingdom, why should a patent be granted to day so as to prevent the tradesman from doing that which he and all the rest of the public had yesterday acquired a right to do? And yet a patent may be applied for and granted, for an invention thus recently published, but of the publication of which not only the patentee but also the authorities granting the patent were perfectly ignorant.

It is true that any person may enter an opposition to any application for a patent of which he may have notice, and in this way the grant of a patent for any thing clearly old may be prevented. But according to the principle which has hitherto (and most properly) regulated the decisions upon such oppositions, the grant of a patent is never refused in a doubtful case; and by granting the patent as requested, the patentee is placed in such a position that he will be enabled to sustain the grant if it be right that he should do so.

For these reasons it would appear that the principle upon which patent grants are at present made, without any warranty respecting their validity, is the only one which can be safely adopted; and as a petitioner knows that he must run the risk of his patent being avoided by any prior public use of his invention, although unknown to him

Patents can only be granted without warranty.

at the date of his patent, he will feel it to be his duty to acquire accurate information respecting the novelty of his invention, so as to enable him to avoid claiming in his specification any thing to which he is not entitled.

Many persons entertain an opinion that the courts of law of this country are not fitted to determine questions respecting patent rights, and they contend that peculiar tribunals ought therefore to be erected with exclusive jurisdiction over all suits respecting patents; and this complaint against our courts is very commonly set down as one of the grievances under which patentees are now suffering.

Complaints
against courts.

In our courts it is well known to be the province of the judges to decide all questions of law which may arise between the parties to suits, whilst questions of fact are submitted to juries for their determination, great care being taken to keep the two descriptions of questions separate from each other, so that each of them may be determined in the manner appointed by law for that purpose.

The complaint just mentioned cannot apply to the mode in which *the law* respecting patent privileges has in modern times been expounded by our judges, for they have uniformly given the most favourable interpretation to the law of which it was capable in favour of the rights of patentees; and although there have long been many acknowledged defects in the law, the legislature alone could apply the necessary remedies.

Complaint does
not apply to
judges.

But with respect to questions of fact arising in patent suits, there can be no doubt that juries are rarely, if ever, found to be fully competent to determine such questions. In the absence of a thorough understanding of the facts brought before them in such cases, juries are too prone to be swayed more by appeals to their feelings and prejudices than by their reason, and consequently the party having the last word at a trial is almost certain to obtain a verdict. Thus in an action for the infringement of a patent, the

Objections to
juries.

patentee being plaintiff, his counsel has the right of reply after the defendant has given his evidence; and the trial of such an action is therefore almost certain to terminate in favour of the plaintiff. But in a scire facias to repeal a patent, in which the position of the parties is reversed, that is to say, the patentee is defendant, and the prosecutor has the right to begin and to reply, the verdict will most assuredly be against the defendant.

Juries not competent.

It appears therefore that the true ground of complaint, with respect to the administration of the law in patent suits, is, that juries are not competent or not sufficiently competent to deal with the questions of fact, which usually arise in such suits. But this objection (if valid) is not confined to suits of that description, but applies to all actions in which juries are called upon to determine questions respecting matters not within the ordinary knowledge of the class of persons to which they may belong.

Objection not confined to patent suits.

And if the law is to be altered at all in this respect, it should be a general alteration, applying not only to patent suits, but to all others in which equally difficult questions of fact may arise.

No satisfactory substitute for juries.

Many grave objections have been made to trial by jury in civil cases; but it may well be doubted whether any satisfactory substitute has yet been suggested. The great cause of the unfitness of juries for determining such questions as have been alluded to arises from the limited nature of the education of the people, more particularly as to matters of science and art; and as knowledge on these subjects becomes more and more general, we shall probably find our juries become better fitted to decide the various questions of fact submitted to their determination.

Special courts for trying patent suits not expedient.

The great expense of patent suits has also been urged as a reason for instituting some other tribunal than our courts of law for taking cognizance of such suits. But the great expense of law proceedings is not confined to patent suits; and patentees have no greater claim for relief in this respect than many other classes of persons. And

those who advocate the institution of a special tribunal for the reason just mentioned, seem to forget that the expense of it would be great; probably much more in proportion to the business to be done, than the total amount of costs in patents actions tried in our courts of law; and if a special court is to be erected for the benefit of a particular class of persons, the expense of that court must be borne by that class of persons, and not paid out of the public purse.

That the civil procedure of our law courts ought to be reformed is now almost universally admitted. It is to be hoped that we shall have it made much more simple and less costly than at present; and it is very desirable, if practicable, that such a system of procedure should be adopted as may be afterwards extended to all the other superior courts in the kingdom, whether in Ireland or Scotland. Procedure in courts of law.

There would be considerable difficulty, no doubt, in overcoming the prejudices of many persons in favour of ancient forms; but the benefits arising from the adoption of one general system of civil procedure would be very great, if it be sufficiently simple to make it comprehensible by all persons of ordinary understanding. Simplicity in forms ought never to be lost sight of in framing a system of procedure, whether for obtaining a patent or for pursuing a right in a court of law. The system of procedure adopted in our courts of law (more especially that part which consists of the written pleadings) has failed to give satisfaction to the public, because it has been framed too much in accordance with a fancied perfection of reason, but without sufficient regard to the imperfections of the human mind.

Secondly, as to the Alterations which are required to be made in our Law relating to Patents.

An endeavour has been made in the foregoing pages to describe some of the more prominent defects of the present law and practice respecting patents for inventions; Alterations required.

and it is surprising that such a state of the law should have been so long tolerated in a country, which has derived so many of its advantages from improvements in the useful arts.

It is however evident that the whole system must be changed, and such alterations effected, as will make this branch of our law cease to be a reproach to the country.

What alterations ought to be made in the law, and how it should be moulded to accomplish the great objects in view, are questions now earnestly discussed, and it is to be hoped that they will speedily obtain some satisfactory solution. There are numerous parties proposing various changes, each of them advocating the alterations which would best accord with their peculiar views and interests: the difficulty is to devise such a system as shall deal equal justice to all.

Whether inventions ought to be registered or patented.

The first question which seems to present itself, when considering the alterations which ought to be made in the law is, whether an inventor ought to be allowed to acquire the sole privilege of using his invention merely by registering it, in the same way as many copyrights are now secured, or whether such privileges should, as at present, only be obtained by express grant.

Alleged reason in favour of registering inventions.

The principal reason usually given in favour of a system of registration is, that every person has a natural right to the productions of his own mind, and that when he has invented any new art of manufacturing articles of commerce, the law ought to recognize a right of property in the invention as belonging to him in the same way as any other property he may possess, without requiring any grant to be made to him of that which, it is alleged, is in fact his own.

This is at best a very specious mode of dealing with the subject, and a little examination will show that, even if the premises were to be conceded (which they cannot be), the alleged consequence does not follow.

Inventors have not the same rights as authors.

One great error committed by those who advocate a system of registration of inventions consists in supposing

that a person has the same degree of right or interest in his invention of something new in practical science, as an author, composer or designer has in the product of his imagination. But these two descriptions of things do not by any means stand upon the same foundation, nor have their authors the same claims upon the public as to their respective productions.

A work of the imagination, whether in literature or the fine arts, such as a poem, a piece of music, a painting, or a piece of sculpture, is actually created by its author, and he gives to the world that which in all probability never would be produced by any other mind. But he who invents a new practical manufacturing art, although the art may be of greater utility than any product of the imagination, does but find out that which had previous existence, in the same way as travellers discover new countries or places. Inventions in the useful arts are based upon physical laws, which are immutable; every investigation of those laws in any given direction must end in the same result, and the consequence is, that it frequently happens that several persons unknown to each other make almost precisely the same invention.

Work of imagination created by the author.

Invention had existence before discovery.

If Milton had not written *Paradise Lost*, and Handel had not composed the *Messiah*, neither of those splendid productions of the creative powers of the mind would ever have seen the light; but if Watt had not invented his famous condensing steam engine, there can be little doubt that, long ere this, it would have been discovered that great benefit results from condensing the steam of such an engine in a vessel separate from the cylinder.

The merit of an inventor, which entitles him to the consideration of the public, in truth consists in his being the first to *communicate* a knowledge of the art which he has discovered to the public, and his merit with the public is the same whether any one has before *secretly* discovered the same art or not; but he no more creates that art than Sir Isaac Newton did the law of gravitation, which he discovered.

Merit of an inventor.

“ Natural right ” of an inventor.

The “ natural right ” (as it is called), which an inventor has in his invention, without the aid of positive law, is, in fact, to keep his knowledge of the invention to himself, and if he publishes it he abandons all claim to everything but the privilege which the law may think fit to give; and to contend that he is of right entitled to more, is, in effect, to say that he is entitled to a perpetual privilege in his invention, for if he have any natural right to his invention after publication of it, what is there in the nature of such a right which can prescribe any particular duration to it?

Inventors only entitled to fair terms.

But even if it be conceded that an inventor has a natural right of any description to his invention, it does not follow that the community is bound so to legislate in his favour as to enable him to restrain all other persons from using the newly discovered art (whether they derive a knowledge of it from him or not), except upon some fair terms; and why may it not be made part of the terms that he shall accept of a grant of a patent in satisfaction of all his claims?

And the legislature has, in fact, assumed the right to deal with literary copyrights in this way, and in lieu of those natural and perpetual rights which were formerly claimed for authors, has given them rights for limited terms only, but with ample powers to make the more substantial rights thus conceded available for their profit and benefit.

Claims of inventors sufficiently great.

The claims which inventors have for sufficient, and indeed ample rewards for their services to the public are in truth sufficiently great, without it being necessary to have recourse to such (to say the least) questionable grounds as those which have been adverted to. No one can reasonably doubt that they confer great benefits upon the community, and the important question now is, how can the patent law be altered so as to give them the rewards which they so amply merit without prejudicing the rights of the public with regard to anything known before the dates of their patents. And whether the express grants are to continue to be made (in a modified form), or a system of registration substituted, is in fact a question of public expediency, and of that only.

Some persons have lately referred to the working of the act respecting the registration of designs having reference to purposes of utility (*a*), and other registration acts, as showing that a mere registration of an invention is all that should be required to secure the use of it to the first inventor. And it has been asserted that the large number of registrations of such designs, as just mentioned, and the small amount of litigation which has arisen respecting them, sufficiently show that a system of registration for inventions would work equally well.

Working of
Registration
Acts not in
favour of regis-
tering inven-
tions.

More accurate information respecting the practical working of the act for the registration of useful designs would show persons who assume this position, that there is no ground for the conclusion to which they have arrived.

The number of registrations under the act has been greatly increased by a mistaken notion, that new inventions of manufactures may be registered, and a short patent thus obtained. Many persons have, by acting upon this erroneous opinion, lost the benefit of their inventions, by registering them, and thus publishing them to the world in such a way as to prevent patents from being afterwards obtained.

Mistaken no-
tions respecting
registration
act.

Those who are affected by the registry of designs under this act have this grievance to complain of, that a registration affords so little information respecting the subject of it, that it is frequently almost impossible to ascertain, from an inspection of the entry in the register, the precise extent of the claim intended to be made.

Defects of such
registrations.

The specifications of patent inventions are at present very loose and insufficient; but if pretended inventors were allowed to register a specification of anything they might think fit, the loose generalities of their claims would give rise to most intolerable grievances to the manufacturers throughout the country.

And the real reason why there is so small an amount of litigation respecting registrations is this, that even police

Reasons which
prevent litiga-
tion respecting
such copyrights.

(a) 6 & 7 Vict. c. 65.

magistrates (usually lawyers) have frequently declined to decide upon the numerous difficult questions which arise upon the construction of the acts and the effect of a registration, the consequence of which is, that, except in a very clear case, the proprietor of the copyright in a design has no practicable remedy; for the expense and delay of an action at law respecting a right of such short duration are sufficient to deter him from having recourse to such a proceeding.

Works of art easily distinguished without specification.

Works of art, which form the greater part of the subjects of registration under other copyright statutes (*a*), are generally distinct or easily distinguishable from each other, without the aid of a specification, and in every case the entire thing registered can always be referred to, in order to see whether there is any conflict between the rights of the person who has effected the registration and those of any other person.

Inventions not so easily distinguishable, and must be specified.

But in the case of inventions it is widely different; they must be defined by written specifications; they frequently resemble or approach each other so nearly, that there is great difficulty in distinguishing them from each other, and it often happens that the distinction between two inventions can only be accurately comprehended by persons of skill in the particular branch of manufacture to which the inventions relate.

Nicety of distinctions between inventions.

It is no uncommon thing for the various parts of a complicated machine to be made the subject of a multitude of patents, one person inventing an improvement in one part of the machine, and some other person another improvement in a different part, or perhaps even a further improvement upon the same part; so that the greatest nicety is requisite in order to distinguish between the several inventions.

And, even with machinery of a less complicated description, it frequently happens that there are several inventions of various modes of constructing the machinery for carry-

(*a*) 5 & 6 Vict. c. 45; 5 & 6 Vict. c. 100; 7 & 8 Vict. c. 000.

ing out in each case the particular object in view; but yet the shades of distinction between the various inventions are so very fine that they are scarcely appreciable.

And it must be borne in mind, that, as we proceed onward in the improvement of every manufacture, the degrees of improvement (if such a term may be used) become smaller and smaller; and it becomes daily more necessary to be circumspect to prevent confusion and collision between the rights of inventors.

For these reasons it seems to be expedient, or rather absolutely necessary, that, when any person claiming to be an inventor seeks to make an alleged new art or invention the subject of an exclusive privilege, he should be compelled to describe it with such particularity as will enable every one to understand clearly the nature and extent of the claim to which the exclusive right is intended to apply, so that no one may ignorantly violate the right sought to be obtained (a). The desired privilege should also be conceded only upon condition, that the description of the invention is true, and the claim not more extensive than the law allows.

Necessary to compel inventors to describe their inventions.

To accomplish these objects by means of a system of registration would hardly be practicable, but it will be endeavoured to be shown that they may be accomplished by means of a well-regulated system of patent grants.

Registrations would not accomplish objects.

Laws for authorizing the grant of patents in various forms have been introduced into almost all civilized countries, but the writer is not aware of any country in which an inventor can acquire the sole use of his invention by registration merely, or without a formal grant being made to him by some authority in the state.

Grants required in all other countries.

The reasons which have been stated against the adoption of a system of registration, seem also to show that it would be imprudent to allow every person alleging that he has discovered a new manufacture a right to demand a patent for that which he may please to say he has invented; and

Discretionary power to grant patents should continue.

(a) See the observations respecting specifications, post, p. 38.

that a discretionary power to concede or withhold a patent grant for an invention should continue to be vested in some competent officer.

Effects discretionary power would produce.

This description of power would enable the officer in whom it might be vested to refuse a grant in every case in which the petitioner for a patent might appear to be wholly devoid of merit, or to be without title to the invention, and in every case in which the object of the alleged invention might appear to be immoral or injurious to the public.

Such a power would, in all probability, be as rarely exercised against a petitioner as that now possessed by the Attorney and Solicitor-General; but the existence of such a power would be sufficient to prevent applications for fictitious inventions by parties, who would inevitably put forward such claims if they could sustain them as of right. Any chance of abuse of this power, or injury by the mistaken exercise of it, would be remedied by giving every petitioner a right of appeal to a superior tribunal.

Conflicting claims to inventions.

Conflicting claims to inventions have frequently arisen under the present law, and there can hardly be a doubt that such claims will continue to arise under any system of law which can be devised. It has been shown (*a*) that there are not at present any adequate means of determining such questions, and any alteration of the law which may be made will be imperfect if it do not embrace this object.

Such claims should be referred to a legal officer.

In order that claims of this description may be decided fairly between the contending parties, they should be referred to some officer competent to determine legal questions, and it can hardly be doubted that against the determinations of such an officer there ought to be a power of appeal. The jurisdiction for hearing such appeals could not safely be vested anywhere except in a court of justice, and the Court of Chancery seems to be better adapted for the exercise of this jurisdiction than any other court we possess.

If it should be determined to require the printing of every specification (*a*) the number of officers requisite for

(*a*) Ante, p. 10.

(*b*) Vide post, p. 44.

managing the business of the Patent Office would not be large; and it is probable that in addition to the existing officers, it would only be necessary to appoint a competent person to whom all petitions for patents might be referred by the Lord Chancellor.

Such an officer should be invested with all the powers now exercised by the Attorney and Solicitor-General, and such further powers as may be necessary to enable him to determine the various questions submitted to him (*b*). To a competent officer of this description might be referred questions and matters of account in Chancery suits relating to patents, and it would probably be convenient, therefore, that he should have the powers of a Master in Chancery.

Such an officer should also be competent to perform several other important duties, the nature of which will be mentioned in the ensuing observations.

All applications for patents might then be made by lodging petitions in the Patent Office of the court, and there should be no necessity for applying at any other office to obtain them.

Every such petition should at once be referred or submitted to the officer just mentioned (who, for the sake of brevity, will in the succeeding observations be called the master of the Patent Office) to inquire and report to the court what ought to be done respecting the petition.

According to the present state of the law, a person who has imported a foreign invention which is new in this country, or who, according to the ordinary language of petitions in such cases, is possessed of the invention, "in consequence of a communication from a foreigner residing abroad," is deemed to be the true and first inventor *within this realm*, within the meaning of the Statute of Monopolies, and entitled to sustain a patent for the invention.

The reason alleged for this in some of our old law books is, that whether the invention "be learned by study or

Applications at one office only.

Petitions to be referred to officer.

As to granting patents for foreign inventions.

Reasons for making such grants formerly.

(*b*) Vide post, p. 36.

travail," is of no consequence, so that the patentee, at his own costs and charges, bringeth a new art or manufacture into the realm.

In ancient times the importation of any new invention might be a matter of considerable difficulty or of great expense, and the probabilities of foreign inventors introducing their inventions into this country were so small that it can hardly be questioned that it was *then* good policy to grant patents to the importers of foreign inventions.

Circumstances now different.

The circumstances of the present times, however, are widely different from those of the period (about 1568) in which it was first held, at least so far as recorded in our law books, that a patent might be legally granted to the importer of a foreign invention. This country is happily now the continual resort of foreigners from every part of the world. Every invention which may happen to be made in any country quickly finds its way into this, where it is published, either by its being made the subject of a patent, or a description of it being inserted in some of our numerous scientific periodicals.

Foreign inventors frequently defrauded by importers.

It is quite unnecessary, therefore, now to hold out any inducements to procure the importation of foreign inventions; and the present state of the law in this respect opens a door to the perpetration of numerous frauds, by means of which foreign inventors are frequently deprived of the benefit of their inventions in this country.

There are persons who make it their business to obtain early information respecting every patented or otherwise published foreign invention, and each of those which is deemed of sufficient value is immediately made the subject of a patent in this country, as an invention "communicated to the patentee by a foreigner residing abroad." In these cases the real inventor obtains no benefit from the patent right in this country, but all the profit is pocketed by persons who make a trade of patents in this way.

The inventions thus appropriated by mock inventors are always published more or less in the foreign country from which they are obtained, and it would rarely happen that any such invention would not within a very short time be described in some of the English periodicals devoted to such purposes (a).

Inventions thus appropriated have been published abroad.

The mere importers of foreign inventions, indeed, may now be said to be devoid of any merit of *their own*, and to give the public no consideration for the patents which they obtain; and they frequently anticipate the real inventors, and deprive them of the profit to be obtained from the use of their inventions in this country, the great reward for which every inventor looks forward so anxiously.

Mere importers have no merit.

It is true that in some cases foreign inventions are communicated by the inventors to their English agents, who obtain patents for their benefit; but a very large proportion of the patents for foreign inventions are not obtained for the benefit of the real inventors.

The great object of the patent law is to reward inventors, and, by so doing, to induce such persons to give the public the benefit of their inventions. This surely must extend to foreign as well as to English inventors; and it can hardly be maintained, that it is good policy to permit persons to defraud foreign inventors of the benefits which are as justly their due as if they were citizens of this country. It is also to be borne in mind, that persons surreptitiously appropriating the inventions of others, can rarely describe them for the benefit of the public so accurately as the real inventors could do; and in many cases such purloiners would be utterly incompetent to put their stolen inventions into practice. It may therefore be safely assumed, that the existing law in this respect is injurious alike to foreign inventors and to the public of this country.

Object of the law extends to foreign inventors.

The remedy for these evils seems to be very simple,

Patents might be granted to

(a) Publication in a foreign country should, *after the lapse of some period*, be equivalent to a publication here.

the assignees of
foreigners.

viz. to provide that no patent shall be granted for a foreign invention except to the actual inventor or his assignee, and this is in fact the law in the United States of America and some other countries.

If this were the law here, a foreign inventor transmitting a specification of his invention to this country, might either obtain a patent here in his own name, or, by sending an assignment also, might have it granted to his assignee.

In this way foreign inventors would be protected from the gross frauds to which they are at present subject, and we should encourage them to send us the most accurate descriptions of their inventions which they are able to give.

Patents might
be granted to
assignees.

Nor does there seem to be any real objection to permitting patents to be granted to the assignees of inventors, whether foreign or English. A patent right may be transferred the moment after it has been granted, and the permission of a previous transfer duly authenticated and filed in court could hardly be productive of any mischief to any one. All difficulty might, however, be avoided by a provision, that the title of an assignee to a patent granted to him as such should depend upon the validity of the assignment under which he claims (a).

Forms of
petitions.

According to a long established practice, the petition for a patent, as now framed, contains no other description of the invention for which a patent is sought to be obtained than a short title (afterwards inserted in the patent), which gives no definite information respecting the nature of the invention.

Abuses partially
checked.

This practice afforded facilities for numerous abuses, which have been in some measure checked, firstly by requiring (as already mentioned) petitioners in opposed cases to deposit descriptions of their inventions; and secondly by a very recent order of Sir John Romilly, when

(a) In a subsequent part of this Pamphlet the propriety of requiring the registration of all assignments of patents will be suggested.

Attorney-General, compelling every petitioner, whether opposed or not, to deposit a description of his invention before he is allowed to have a report in his favour.

The beneficial effects of these orders would be more effectually attained by requiring every petitioner to deposit with his petition at the Patent Office such a description of his invention as shall be sufficient to enable the officer of the court to understand the real nature of the invention; and also to clearly identify the invention as that to which the petition relates. And until this be done to the satisfaction of the master of the Patent Office, no proceeding upon any petition should be allowed.

Description of invention to be deposited with petition.

No one should be permitted in his petition for a patent to use what is frequently called a blind title (which gives no notion of the actual nature of the invention), or any other title calculated to mislead, but every person should be compelled to insert in his petition such a title as will be sufficient to enable the public to understand clearly the particular branch of manufacture or subject to which the invention relates.

No deceptive title should be allowed.

By some persons it has been proposed that a petitioner should be required to lodge with his petition a full and accurate specification of his invention; but, considering the difficulty in many cases of perfecting the description of inventions without performing experiments, which are almost certain to lead to a publication, it seems to be hardly fair to require so great a degree of particularity in the first instance.

Specification should not be required in the first instance.

But every person who really has invented something, can intitle it in such an intelligible manner and give such a description of it as will be sufficient to enable any competent person to understand the leading features of the invention; and until a person can do this it may well be doubted whether he can be correctly said to have invented anything, although he may have conceived some inchoate idea which may ultimately lead to a perfect invention.

Intelligible description may always be given.

Until a person has really invented something, he cannot

give any consideration to the public for the protection claimed, and it can hardly be considered expedient to encourage speculative claims which have no certain foundation.

Inventors now protected only from dates of their patents.

The protection at present given to an inventor commences only from the day of the date of his patent, and up to that time he must run the risk of being anticipated or having his claim to a patent defeated by a publication of his invention. So long as an applicant for a patent states nothing respecting his invention but the title or name he designs it to bear, it would hardly be practicable, and it would clearly be imprudent, to give him any earlier protection than the law at present affords.

Protection should be from date of petition.

But if an applicant describes his invention in such a manner that it may be distinguished from any other with reasonable facility, it is but fair that he should be entitled to protection from the date of his petition, (by which he in effect offers the public the benefit of his invention,) if after applying for a patent he proceeds to procure it to be sealed within a reasonable time, which might be allowed to vary according to the exigencies of the case, and the date of the petition might be fixed by a recital in the patent.

By adopting this course, inventors might be enabled to obtain many, if not all, of the benefits which would arise from a provisional registration of their inventions.

Oppositions prevent fraudulent applications.

The practice of entering caveats and oppositions before the Attorney and Solicitor-General has originated in the necessity for providing some means to prevent the success of fraudulent claims for patents.

With a well-regulated system of practice for granting patents, there will probably be few instances of fraudulent applications; but unless securities be provided against such applications, there can be little doubt that they will be numerous.

Titles of petitioners' inventions should be published.

For this purpose it seems expedient to publish the title of every invention for which a patent is sought to be obtained, taking care that the title shall not be such as to

mislead. Inventors cannot fairly object to this if they be protected from the dates of their petitions, and in this way the entering of caveats would be rendered unnecessary; but every person, who sees published an application for a patent which may affect his interests, might enter an opposition at the Patent Office, in like manner as now done at the office of the Attorney or Solicitor-General.

But although it may be deemed expedient to publish the titles of inventions for which patents are sought to be obtained, it is at least doubtful whether the names of the applicants should be published. For when once it is known that a man has invented some new art or manufacture, persons are upon the alert to discover what it is; and he may in this way be seriously prejudiced, if not deprived of the benefit of his invention.

Petitioners' names should not be published.

Oppositions are usually made to grants of patents by two different classes of persons; one class of those who oppose patents being persons who intend themselves to procure patents for their inventions, and fear that they may be anticipated by others; and the other class being persons who merely desire to prevent their interests being prejudiced by the grant of patents for such things as cannot legally be made the subjects of patent privileges.

Usual grounds of opposition.

Well regulated oppositions by each of those classes of persons will be useful; the first, because they will prevent grants of patents being made to those who have no right or claim to them; and the second, because they will prevent, or materially tend to prevent, the public from being vexed by the grant of improper patents.

Such oppositions useful.

But every person seeking to prevent the grant of a patent should be compelled, when he enters an opposition to it, to state the ground upon which he intends to oppose; and if he opposes on the ground that the invention is his, it seems to be but fair that he ought to be compelled to take proceedings for obtaining a patent himself, so that the public may not be deprived of the invention, or unne-

Parties opposing should state their grounds.

cessarily delayed in obtaining the advantages which may arise from it.

Officer should have power to examine parties, &c.

It has already been stated (*a*) that there are no adequate means at present of deciding properly between adverse claimants to an invention, and this defect ought to be remedied by investing the master of the Patent Office with power to award a patent for an invention to the person who may establish the least claim to it.

For this purpose, the Master of the Patent Office should have power to receive proofs by way of affidavit, or *vivâ voce* examination of the parties and their witnesses on oath, and also power to compel the attendance of witnesses.

Petitioner should be present at hearing of opposition.

In every case of opposition the applicant for a patent should, if practicable, be allowed to be present at the hearing of every part of an opposition to his petition, except perhaps so much of it (if any) as may relate to the claim of the opposing party to the invention as belonging to himself.

Number of inventions comprised in one patent.

The great cost of a patent induces an inventor to include as many things as possible in one patent, and the consequence is, that a title which in the language of a patent is deemed to be descriptive of *an invention*, usually comprises *several* inventions, and the separate claims of invention in a specification are frequently very numerous; indeed, specifications containing nearly forty of such claims have been sometimes inrolled.

Disadvantages of including several inventions in one patent.

This practice of including several inventions in one patent is very objectionable; it has led to the use of indefinite, and, indeed, it may be said, incomprehensible titles, and it imposes upon a patentee the burthen of sustaining the validity of his patent as to each of the inventions, although he may be proceeding against a party who has only infringed one of them. And the description of so many inventions in a specification as being (what in fact they are not) several parts of one invention, frequently produces much confusion in the description, and occasions

(*a*) Ante, p. 10.

great difficulty in arriving at the true meaning or construction of the instrument.

But if the cost of a patent be limited to some small reasonable sum, it might then be properly laid down as a rule of practice that only one invention should be permitted to be included in a patent, without, however, prohibiting the insertion of several claims for things necessarily connected together, or forming parts of one and the same machine, article or invention.

One invention only should be included in a patent.

If this course were to be adopted, the titles of inventions for which patents are sought might easily be so framed that when published they would convey to every one interested sufficient information to warn him of any probable danger to his interests which may ensue from allowing any proposed grant to be made without opposition.

When the Master of the Patent Office or other officer, after giving notice of an application for a patent, and hearing all oppositions (if any) to the grant, shall have decided that a patent ought or ought not to be granted for the invention, he should report his decision to the Court, and either the petitioner, or any other person who might deem himself prejudiced, should be at liberty to appeal to the Court against the decision, within a limited time after it has been made.

As to decisions upon petitions for patents and appeals.

The hearings of such appeals would be similar in effect to hearings, according to the present practice, before the Lord Chancellor upon oppositions to the sealing of patents, and the decisions upon such appeals should in like manner be final, so far as regards the issuing or withholding of the patent.

Hearings of appeals.

Upon a report being made in favour of a petitioner, and not appealed against (within a time to be limited) or confirmed upon appeal, the Lord Chancellor should in some way confirm the report, so as to entitle the applicant to his patent, and that might be done by his lordship signing the usual docket paper, or in any other form which may be deemed most convenient, for authorizing the proper officer

Confirmation of report in favour of a petitioner.

to seal a patent upon performance of such condition as may be deemed necessary for the protection of the public.

Specification should be required before patent sealed.

One condition which ought to be imposed upon every petitioner for a patent should be, that he deposit in the Patent Office a sufficient specification of his invention, and until that is done he should not have his patent. For this purpose an applicant should be allowed the same time as at present allowed to patentees, but if he fail to deposit a sufficient specification within the limited time (which might be extended if necessary) his petition should be dismissed, or at all events treated as a new petition, and subject to the opposition of any other persons who may have become interested in the making or withholding the patent.

Patentees now required to enrol specifications.

It is well known that according to the present practice a patent for an invention contains no further description of it than the short title of it given in the petition for the patent(a), but the patent contains a condition by which the patentee is obliged to enrol a detailed description of it within a limited time after the date of the patent.

This practice has been occasioned, firstly, by a desire which every inventor has to obtain protection as speedily as possible, which under the present law can only be had by sealing the patent; and, secondly, by the difficulty of describing an invention with sufficient accuracy before it has been tested in a more practical manner than can safely be done before the sealing of the patent.

Benefit of allowing time for specification.

There can be little doubt of the great practical benefit which arises from allowing patentees a reasonable time to perfect the specifications of their inventions, for in this way they are enabled more clearly to define the extent of their rights to the inventions which they claim to have made, and also more clearly to describe those inventions for the benefit of the public.

But to enable an inventor to do this with safety to himself it would not by any means be necessary that his patent

(a) Vide ante, p. 32.

should be actually sealed, if he were but protected as well against anticipation by others as also against the consequence of any publication of his invention.

And the practice of issuing patents before specifications of the inventions are deposited has given rise to a system which can hardly be termed less than fraudulent; and it cannot be wondered that the system should produce such a result when it is considered that no one has authority to exercise any control over the manner in which specifications are framed, or prevent patentees from framing them as delusively as they please.

Evil consequences of issuing patents before inventions specified.

Those interested in the continuance of the present system will no doubt say, that a specification framed in a delusive manner is bad and renders the patent void. And there can be no doubt that such a specification is bad according to the strict letter of the law, but nevertheless delusive specifications are enrolled almost daily, and such specifications will continue to be enrolled until measures be taken to put a stop to such practices.

It is at present a very common practice in the specification of a patent to describe the whole subject to which the invention relates, the particular nature of the invention being mentioned in as general terms as possible. No particular claims are inserted, or, if inserted, made as indefinite as possible, and every one reading the specification is left to put his own construction upon the instrument, and, if he can, discover to what invention the patent relates.

Present practice in framing specifications.

This is frequently a matter of no small difficulty to persons who are not in the practice of construing written instruments, and the difficulty is much increased by specifications being *purposely* framed in ambiguous language by persons who devote their attention to the subject. Patentees may avail themselves of the skill of such persons in drawing their specifications, so as to give the smallest amount of information to the public which is deemed safe; and if the validity of the patent or the specification should ever come into question, the person employed to draw the

Specifications purposely made ambiguous.

specification becomes a most convenient witness, capable of proving the validity of the patent in the most satisfactory manner possible.

Unfair advantages taken in framing specifications.

In all these proceedings the parties take into consideration and calculate upon the leaning of our courts and juries in favour of patents, and thus the very laudable desire to secure to every inventor a fair reward for his ingenuity, is taken advantage of and made available for the purpose of perpetrating fraud and deceit upon the public.

Advantage of specifying fairly.

It is not intended to be said that there are not many inventors who are thoroughly honest and straightforward, and who earnestly desire to frame their specifications fairly and so as to comprise no more than they are fairly entitled to claim. And indeed whenever a patentee has obtained a patent for a good and useful invention, he will (if he knows his own interest) prepare a specification with the utmost fidelity, carefully distinguishing his invention from every thing which preceded it. Specifications of patents framed in this manner make the patents almost unassailable, for almost every man who desires to use a patent invention, first obtains advice respecting the validity of the specification, and when it appears to have been prepared with the requisite care and fidelity, few persons venture to run the risk of invading the rights of the patentee.

Some patentees not content with profit of their own inventions.

But there are very many patents obtained by persons who are not content with the profit arising from their inventions, but seek to appropriate to themselves, by general words in their specifications, every thing that cannot be shown to be old at the dating of their patents.

Thus a person who has invented an improvement in any description of machinery, mentions in his specification the benefits which he deems his invention to have produced, and describes the whole of the improved machinery in as general terms as may be deemed safely practicable, knowing that after the lapse of two or three years it may become

difficult, if not impossible, to prove the want of novelty at the date of the patent in some parts of the machinery, which he would not dare particularly to claim at the time he is compelled to enrol his specification.

In fact, the difficulties which fraudulent patents and specifications occasionally impose upon manufacturers are far greater than could possibly be supposed by any one not called upon to advise them in their difficulties. And these lengthened observations respecting specifications have been made, because almost all persons who have written upon the subject of the amendment of the patent laws, in their desire to benefit inventors seem entirely to have lost sight of the necessity of providing fairly for the security of the public.

Difficulties occasioned by fraudulent patents.

The protection of the public against such fraudulent practices as have been mentioned might be effected by a rule compelling every applicant for a patent to set forth in his specification some clear and distinct claim or claims of invention, stating either that every thing described is intended to be claimed, or that it is intended to claim some particular part or parts only, specifying which of them.

Inventors ought to be compelled to make distinct claims.

If an applicant be allowed a reasonable time for this purpose (during which he is protected) he cannot have any reasonable ground of complaint against being compelled to deposit a sufficient specification of his invention. Indeed, the evils resulting from the present system of specifying inventions are so great, that it seems now to be a general opinion that every inventor ought to be compelled to deposit a specification of his invention before a patent is granted to him.

To prevent evasions of this rule and enforce a fair and bonâ fide specification in every case, it should be the duty of the Master of the Patent Office to examine every specification offered by a petitioner for a patent, in order to see that it contains a proper claim or claims, and, in every case in which the claims may appear to him to be insufficient, to reject the specification.

Specifications should be examined.

The performance of a rule requiring definite claims in specifications could only be insured, by refusing to seal a patent for any invention of which such a specification has not been deposited in the Patent Office; and the strict observance of this regulation would produce the greatest benefit not only to the public but also to all honest inventors.

Benefits of definite claims.

With such claims in specifications of patent inventions the public would have more specific information as to what they are prohibited from doing during the existence of the patents, and patentees would have their rights as against the public more clearly defined, and thus a great amount of useless litigation might be prevented.

How inventions now specified.

According to the present practice of the law respecting the specification of inventions, a patentee must first prepare an instrument in writing under his hand and seal describing his invention, and, if necessary, annexing drawings to the instrument to illustrate the description which it contains; and then he must cause the whole of it to be entered upon the rolls of the Court of Chancery, to which copies of the drawings (if there be any) must be annexed.

These rolls are long narrow strips of parchment, upon which specifications are copied in the old engrossing handwriting, and they are as inconvenient as they well could be for the purposes of reference.

Public prevented from acquiring knowledge of inventions.

This state of things exactly suits the objects which many patentees have in view, viz., as much as possible to prevent the public from having the means of acquiring a knowledge of the particulars of the invention. And for better effecting this object patentees frequently make their specifications as long as they possibly can, and annex a great many unnecessary drawings to them. By taking this course, not only is the difficulty of reference to the inrolment increased, but the expense of office copies is greatly enhanced, and few persons care to incur the cost of obtaining an office copy of the inrolments of specifications until they are

compelled by legal proceedings for alleged infringements being either actually commenced or threatened.

It is true that there are several periodicals which give copies of a few specifications, and one of those publications professes to give a copy, or the substance, of every specification which is enrolled in England. But none of these publications afford the public the means of obtaining the accurate information they are entitled to require respecting the extent of the patent rights, of which the law requires them to take notice at their peril.

Periodicals publish some specifications.

These publications are usually conducted by patent agents, who are enabled to give copies of such specifications as they themselves may have drawn, or which may otherwise come within their reach, but they are unable to give accurate copies of anything like all the enrolled specifications.

But cannot give correct copies of all specifications.

The writer would be sorry to say anything to disparage the publications alluded to, and which there can be no doubt have been of great public utility. But the great expense of office copies prevents them from affording the public the amount of information required, viz., an accurate knowledge of the contents of every specification of an invention enrolled in pursuance of a patent.

This knowledge the public does not at present possess anything like adequate means of obtaining, and the consequence is, that there are very many patented inventions of which specifications have been duly enrolled, but of which the public remains profoundly ignorant.

Public ignorant of many inventions.

It has happened more than once to the writer, that a client has come to ask for advice respecting a supposed new invention, which had in fact, to the knowledge of the writer, been previously made the subject of a patent, but of which the public remained in ignorance, because the specification had never been published beyond the purlieus of the Court of Chancery.

This state of things ought not to be permitted to continue; and if more extensive or effectual privileges are to be

Better information should be afforded.

granted to inventors, some better mode of affording information to the public respecting the contents of their specifications ought to be required, not only for the purpose of enabling all who may be interested to know what they are prohibited from doing, during the existence of the patent privilege, but also for the purpose of enabling those persons, who may be in possession of the most accurate information respecting the branch of manufacture to which every patent invention may relate, to see whether the patentee has claimed more than he is entitled to do.

Cost of specification, &c., would pay for printing.

The cost at present incurred in preparing and engrossing a specification, and procuring it to be enrolled, would, in almost every case, be sufficient to pay the cost of causing a considerable number of copies of the specification to be printed. And in every case in which an inventor obtains patents for the whole of the United Kingdom, he must incur the expense of preparing three specifications, and of causing each of them to be enrolled, an expense which, in almost every case, would be more than sufficient to pay the cost of printing 1000 copies of the specification.

Any figure may now be inserted in letter-press.

Some few years ago there might have been a little difficulty in printing some specifications, with the figures which are requisite for illustrating the descriptions of the inventions; but it is now perfectly easy, in the present advanced state of the art of engraving on wood, to insert in letter-press forms every description of figure which can really be required for illustrating the description of any invention. To prove this, it is only necessary to refer to the various illustrated periodicals with which every one is familiar, many of which are devoted to scientific subjects, and every week insert figures of the description which have been mentioned.

Uncoloured drawings sufficient.

It is true that, if specifications are to be printed, it will not be easy to insert in the letter-press forms the beautifully-coloured drawings which are frequently annexed to specifications; but it is very doubtful whether such drawings are more advantageous than uncoloured figures; and

it is quite certain that uncoloured figures may be drawn in such manner as to illustrate any mechanical description quite as effectually as any coloured drawing, however finely finished. Indeed, the superior manner in which drawings annexed to specifications are frequently finished, is adopted, not for the purpose of improving or better illustrating the description of the invention, but for the purpose of increasing the cost of office copies. By multiplying unnecessary expensive drawings in this manner the office copy of a specification is sometimes made to cost an enormous sum; and in one case the writer has been informed that an office copy of the specification, with all its drawings, would cost more than £100!

By compelling patentees to pay the cost of printing their specifications, all these fraudulent expedients for preventing the publication of specifications would be rendered useless, and no patentee would ever introduce any figure into his specification unless it should be necessary so to do. And even if it should ever become necessary in a specification to use larger figures than could be inserted in letter-press forms (which is not very probable if the prescribed form should be quarto or folio), such figures might be inserted in the same way as plates are usually inserted in printed books, and patentees would take care never to have recourse to them unless it should be necessary, or, at all events, to their interest so to do.

If specifications were printed in the manner which has been suggested, copies should be sent to public libraries at home and in the colonies, so that all persons in every part of the empire might be more fairly than at present required to observe the prohibitions contained in patents against the use of the inventions comprised in them.

Many copies of printed specifications might also be sold, and the produce of such sales would no doubt materially diminish the amount to be charged to patentees for printing their specifications; and there can be little doubt that patentees would soon find it to their interest to have

Effect of printing specifications.

Copies should be sent to public libraries.

Copies might be sold.

printed copies of their specifications, not only as a means of promoting the adoption of their inventions by the public, but also for the purpose of making them more easily understood when any litigation should arise respecting their patents.

Benefit arising from sale of copies.

By adopting this course, a printed copy of a specification would be in the hands of almost every one interested in the branch of manufacture to which the invention might relate, and every man would be enabled easily to ascertain to what extent existing patents interfere with anything which he might propose to do.

The mere circumstance of specifications being printed would induce every patentee to take more care in framing his specification, and so render it more certain and definite; and the general diffusion of an accurate knowledge of inventions would in all probability greatly tend to prevent infringements of the rights of patentees; for the number of persons capable of detecting such violations of their rights would be increased to such an extent, that detection would be almost certain in every case.

Patentees should pay cost of printing copies.

For the reasons which have been given, it may be inferred, that the printing of specifications would be productive of great benefit to patentees as well as to the public, and every patentee ought therefore to be compelled to pay the cost of printing a limited number of copies of his specification.

And even suppose all of the suggested benefits cannot be realized, if the alterations which shall be made in the law in other respects shall produce great advantages to patentees, it seems but fair that they should be compelled to concede something to the public, and provide sufficient means for enabling every man to ascertain with facility what any patent prohibits him from doing during the existence of the privilege which it grants.

Prints of specifications might be sent to foreign countries.

A convenient time (say two years) being allowed to every patentee to extend his patent rights over as many foreign countries as he pleases, copies of specifications might be periodically sent to other countries in exchange

for copies of the specifications of the patented inventions of those countries, and in this way we might secure a knowledge of all foreign inventions which the inventors may not think fit to take patents for in this country.

The form of patent at present in use seems to have been framed so as to contain an exposition of the law relating to the grant which it makes. Form of patent.

This may have been very proper at the time when the form of patent was first settled after the passing of the Statute of Monopolies, because the knowledge of the law relating to patent grants was then very limited, and it might be desirable that the form of such a grant should show to those ignorant on the subject the extent of the rights which were conferred by it upon the patentee.

The necessity for retaining this long, verbose form of patent does not now exist, and it can hardly be doubted that the form of the instrument cannot be made too short, if it do but express the intent with sufficient clearness. Form of patent should be short.

Patents, as now granted, always contain conditions for the protection of the public against fraudulent claims, or claims by persons having no just title to an invention, and the form of patent might be very greatly shortened by an enactment annexing to every future patent such of the conditions as may still be requisite.

Every patent should have annexed to it a copy of the patentee's specification of his invention, so that the patent may in every case afford sufficient evidence of the subject of the grant, and avoid all questions as to variances between the titles and specifications of inventions. And if specifications be printed, as already suggested (*a*), a printed copy specification should be annexed to every patent. Specification annexed to patent.

Supposing a patent to be framed in the manner which has been suggested, the next subject which seems to present itself is the extent of the right or privilege which the patent ought to confer. Extent of privilege.

(*a*) Ante, p. 44.

Copyrights, which need merely registration in London to perfect the title of authors, composers or designers, are made to extend to the whole of the united kingdom and all its colonies and dependencies.

Patent right should extend to the whole realm.

Whether a patent for England, Wales, the Channel Islands, "and all her majesty's colonies and plantations abroad," extends to the East Indies and some other parts of her majesty's dominions, seems to be doubtful; and there is no apparent reason why a patent should not grant the patentee the sole right to use his invention throughout the whole of the realm.

Fund arising from sale of specifications.

The sale of printed specifications will most probably produce a considerable fund, which should be applied in some way for the benefit of inventors and the residue of the public.

This fund may be very beneficially expended in gradually printing all the old specifications, or such of them as may be deemed of any public importance, and providing indices for facilitating references to all the old as well as modern patents and specifications.

Sum to be charged for a patent.

One of the most important questions in connection with the necessary reformation of the patent law, is what sum ought an inventor to be compelled to pay for a patent grant of the sole use of his invention?

The great amount of fees paid for unnecessary proceedings upon the passing of every patent for an invention has already been mentioned (*a*), and the impolicy of taxing inventors has already (*b*) been pointed out.

Tax upon patents.

But if inventors are to continue to be taxed, it seems to be very hard to make them pay the whole amount of the taxation upon the grant of their patents, and before they have derived any profit from their inventions. An inventor ought, therefore, to be allowed to have the option of paying the tax upon his patent, either in periodical sums during the continuance of the patent, or otherwise in a gross sum upon obtaining the patent; and if he adopt

(*a*) Ante, p. 5.

(*b*) Ante, p. 12.

the latter alternative, it seems but fair that the amount should be somewhat smaller than if he were to pay by instalments.

The grant of patents subject to the payment of a periodical tax, it has been contended, would be productive of this benefit—that patents for useless inventions would be allowed to expire by the non-payment of the tax, and in this way (it is said) many obstacles to further improvements in various branches of manufactures would be removed.

The doubtful benefit just adverted to can furnish no justification for this very impolitic tax; and if the public be protected by compelling every applicant for a patent to specify his invention in the manner which has been suggested, there need not be any fear that the public will be prejudiced by patents for useless inventions.

The amount of fees payable for patents should be adjusted so as to raise a sufficient sum to defray the cost of the establishment which may be necessary for transacting all the business connected with the granting of patents; and these fees should be paid into a separate fund, which might be called “The Patent Office Fund.” Office fees.

Considering the large number of patents granted annually, and the great augmentation of that number which will take place if the cost be diminished, and the practice of allowing several inventions to be included in one patent abolished, a fee of £20 for each patent (besides the cost of the specification) would raise a fund at least sufficient to pay all necessary office expenses. It is probable, indeed, that this amount of fee would soon be found to be more than sufficient for raising the requisite funds; and it is to be hoped, that whatever may be the amount of fee fixed upon in the first instance, it will be diminished from time to time whenever it may be practicable so to do.

There are at present some office holders who would probably claim compensation for the diminution of their Compensation
fee fund.

emoluments or the abolition of their fees, which would be occasioned by an alteration in the mode of granting patents. These persons would (according to the usual course) be compensated by annual payments, in lieu of the fees of which they would be deprived; and it is to be feared, that the House of Commons would not sanction the payment of those compensations out of the public purse.

It will therefore be necessary to raise a fund for the payment of these compensations, by charging extra fees upon patents of the amount which may be necessary for this purpose. The extra fee to be thus charged upon every patent would be about 20*l.*, if the number of patents granted during the year shall not increase; but if the number shall materially increase the amount of this fee may be proportionably diminished. These compensations will of course cease upon the death of the claimants, and, as the amount of them diminish from time to time, the extra fee may be diminished also, and totally cease when all further claim upon the fund shall be at an end.

Total proposed
cost of a patent.

If the suggestions here made were to be adopted, it is estimated that the cost of a patent would be as follows:—

| | £ | s. | d. |
|-----------------------------|------------|----------|----------|
| Office Fund | 20 | 0 | 0 |
| Compensation Fund | 20 | 0 | 0 |
| Printing Specification, say | 10 | 0 | 0 |
| Total | <u>£50</u> | <u>0</u> | <u>0</u> |

Besides which the patentee would have to pay his agent 10*l.*, and probably upon an average about 10*l.* more would be required to obtain him assistance in preparing the draft of his specification, thus making the total cost of patents average about 70*l.*

The fee for entering an opposition should be small (say 10*s.*), and the costs of the hearings before the Master should be in his discretion.

This sum is quite large enough without enhancing the cost of a patent by a tax of any description; and it is therefore strongly contended, that all taxes either upon patents or specifications ought to be at once abolished, as being not only impolitic but also oppressive in the greatest degree.

All taxes upon patents ought to be abolished.

By several of the acts relating to copyrights provisions have been made for rendering valid some simple forms of transfers, the transfers being required to be registered.

Forms and registrations of transfers.

The facility with which copyrights may be transferred under these provisions has been found to be very beneficial, and the registration makes it easy for all persons to ascertain at any time the name of the proprietor of any copyright. The extension of this system to the transfers of patent rights would be beneficial not only to patentees but also to the public.

Patentees would be benefited because the title to a patent would at all times be more clear and certain, and any one inclined to purchase a patent would do so with much more confidence, and therefore give a better price, if he could be assured that no adverse claim could be set up to the patent under any instrument not previously registered.

Benefit of registering transfers.

Proprietors of patent rights would also derive advantage from a register which would enable any one at any time to find out the name of the proprietor of any patent of whom he might either desire to make a purchase or take a licence.

The public would also be benefited by the registration of transfers of patents, because not only would fraudulent claims of proprietorship be prevented, but there would be certain means of ascertaining the names of parties against whom proceedings should be taken for repealing any illegal patent.

It is unnecessary here to mention any mode in which transfers should be made or registered; there can, indeed, be little difficulty in carrying out such a system as has been suggested.

Stamps on transfers.

If it be possible to exempt transfers of patents from the payment of stamp duties, the exemption would be a great boon to poor patentees, and would cause very little diminution of the revenue.

Revocation of void patents.

No remedy for a person defrauded of his invention.

According to the present state of the law there is a remedy (by action of scire facias) by means of which any illegal patent may be repealed and cancelled. But if any person should unfairly acquire a knowledge of the invention of another, and fraudulently obtain a patent for it, the patent may, it is true, be repealed, but there are no means of restoring the real inventor to the position he would have occupied if the fraud had not been practised against him, and, therefore, he will be for ever deprived of the benefit of his invention. This is a grievance which has occurred much more frequently than the public are aware of; and the reason why such cases are not made public is, that the real inventor of an invention thus fraudulently appropriated knows that he cannot gain any pecuniary advantage by the repeal of the patent, and he is therefore too glad to make the best terms he can with the man who has defrauded him, and get the best price he can for keeping silence respecting the facts of the case.

Remedies against void patents not sufficient.

The remedy by scire facias is very expensive, and the party prosecuting such an action can never recover any costs of suit against the defendant, although he may be called upon to pay the defendant's costs if the patent be not repealed. And however frequently a patentee may be defeated in actions for the infringement of his patent, there are no means by which the patent can be repealed except an action of scire facias.

Remedies for persons defrauded.

For the purposes of remedying the first of these defects in the law, it should be provided that any person claiming to be the inventor of any patented invention, and alleging that the patentee had no title to the invention at the time the patent was granted, might petition the Lord Chancellor to have the patent revoked, and to have a grant made to him as the true inventor; and that upon every such peti-

tion such proceedings should be had as might be necessary to try and determine the rights of the respective parties and do justice between them.

And if a patent should be granted to a person claiming to be the assignee of a foreign or other inventor (a), and it should be afterwards alleged that the patentee had no title as assignee, the party claiming to be entitled should be at liberty to apply by petition to the Court in a similar manner.

And provision should also be made, that, whenever any patent should be revoked upon the petition of a person claiming and proving himself to be the true inventor, a new patent should be forthwith granted to the petitioner, to take effect as from the day of the date of the repealed patent, and to have the same validity as it would have had if it had been granted to him on that day.

Regrant of patent to the real inventor.

For the prevention of unnecessary and vexatious litigation it should also be provided, that whenever it shall be made to appear to the Lord Chancellor, by the judgment of any court of competent jurisdiction, that any patent is void for any cause, and the patentee shall not within three months remove the defect in his title (when practicable so to do), the Lord Chancellor shall have power upon petition to revoke the patent, and compel the patentee to bring it into court to be cancelled.

Prevention of vexatious litigation.

If an officer shall be appointed to perform the duty of investigating the claims of petitioners for patents, he should also be invested with the powers now given to the Attorney and Solicitor-General with respect to disclaimers and memorandums of alteration, and it would be useful to consolidate all the provisions upon this subject into one enactment. If parties be compelled to frame their specifications in the manner which has been suggested, disclaimers and alterations will not often be found necessary.

Disclaimers.

The powers of the Court to amend erroneous patents and specifications, and proceedings relating to them, might

Amendment of patents, &c.

(a) Vide ante, p. 32.

also be extended with great advantage; and the Court should have power to act upon the complaint of any person, either claiming that he is interested in a patent, or alleging that he is prejudiced by it in any way.

Summary of suggested Alterations of the Law.

The statute 27 Hen. VIII. c. 11, which makes it necessary that patents should pass by bill signed (or Queen's Bill), Signet Bill and Privy Seal Bill to be repealed, and the Lord Chancellor to be authorized to grant patents to inventors upon petition.

No patent for an invention to be granted to any person, except the actual inventor or his assignee.

That a person to whom an invention shall have been communicated by a foreigner, shall not be deemed to be an inventor.

That when a description of an invention in print shall have been published in a foreign country for a considerable period (say twelve months), the publication shall be equivalent to a publication here.

All the present preliminary proceedings for obtaining patents to be abolished.

Every application for a patent to be made by petition left at the Patent Office in Chancery, the petition to include only one invention, which must be accurately *intituled*.

Every petitioner to deposit with his petition such a description of his invention as shall be sufficient to explain the nature of it and distinguish it from any other. If the title or description of an invention be insufficient, no proceeding to take place upon the petition until amended.

No publication of an invention after an inventor has deposited his petition, with a proper title and description of the invention, to defeat a patent afterwards granted to him, if he procure it to be sealed within a limited time.

Notice to be given in the Gazette of every application

for a patent (mentioning the title of the invention, but not name of the petitioner), and all persons to be entitled within a limited time to enter an opposition.

All petitions for patents to be referred to an officer of the Court of Chancery to be appointed for that purpose, who shall have authority to inquire into the truth of every petition, the nature and extent of the petitioner's claim to his alleged invention, and report the result to the Lord Chancellor.

Every person, who shall duly enter an opposition at the Patent Office, to be entitled to be heard against the grant of a patent.

The Chancery officer to have power to take evidence upon oath, and to compel the attendance of witnesses.

Every person alleging that he is aggrieved by a report of the officer, either in favour of or against the grant of a patent, to be entitled to appeal to the Lord Chancellor within a limited time.

That in every case, in which it shall be decided that the prayer of a petition ought to be granted, an order shall be made for the sealing of the patent so soon as the applicant shall have filed a sufficient specification of his invention, and paid the fees, &c.

That every specification shall contain some clear and distinct claim or claims of invention to the satisfaction of the officer of the court, and shall be filed within a definite time after a decision in favour of the petitioner; but that the description of an invention deposited with the petition may be accepted as a specification, if it contains sufficient claims.

That every patentee shall pay the cost of printing a limited number (say 250) copies of his specification by the printer of the Patent Office, a further number of copies being printed for public sale.

That the copies of a specification paid for by the patentee shall be distributed amongst public libraries in this kingdom and the colonies.

Every patent to have a printed copy of the specification annexed to it, and the form of the grant to be made as short as practicable.

Every condition and provision necessary for the protection of patentees or the public to be annexed to every patent grant, by express enactment.

The fees to be charged for patents not to exceed the amount necessary for paying the office expenses connected with the grant of patents; the fees to be paid into a separate fund, and the amount to be diminished from time to time when found practicable.

Such further sums to be paid for patents as shall be required to raise the annual amount necessary for the payment of compensations, those sums to be paid into a separate fund (which may be called "The Compensation Fee Fund"), the fees to be diminished from time to time as the claims upon the fund diminish, and to cease upon the termination of the compensation payments.

All taxes upon patents and specifications to be abolished.

It is estimated that the office charges upon the grant of a patent, if regulated in the manner suggested, would at the commencement be about £50 (a).

The privilege granted by a patent to extend to the whole realm, and no separate patent for Ireland or Scotland to be necessary.

The powers of the Attorney and Solicitor-General respecting disclaimers and memorandums of alterations to be transferred to the Chancery Officer appointed to report upon petitions for patents.

A short form of transfer to be given by act of parliament, and all transfers to be registered in the Patent Office within three months after their dates, or within one month after their arrival in England from abroad.

The Lord Chancellor to have power upon petition to revoke a patent fraudulently obtained for an invention by

(a) Vide ante, p. 50.

a person not the inventor, and to grant it to the true inventor; and his lordship to have power to direct any trial or inquiry for determining the rights of the parties.

The Lord Chancellor also to have power to revoke a patent which by any court of competent jurisdiction shall have been adjudged to be void, unless the patentee shall within a limited time remove the defect (when practicable) by disclaimer or alteration.

That the Lord Chancellor shall also have power to alter and amend patents and specifications in such manner as may be necessary to do justice to patentees or other parties claiming to be prejudiced.

WORKS BY J. H. BALFOUR BROWNE,
REGISTRAR TO THE RAILWAY COMMISSIONERS.

This day is published, in one volume, 8vo., price 18s., cloth,

**THE PRACTICE BEFORE THE RAILWAY COMMISSIONERS
UNDER THE REGULATION OF RAILWAYS ACTS, 1873 and 1874 ;**

With the Amended General Orders of the Commissioners, Schedule of Forms, and Table of Fees : together with the Law of Undue Preference, the Law of the Jurisdiction of the Railway Commissioners, Notes of their Decisions and Orders, Precedents of Forms of Applications, Answers and Replies ; and Appendices of Statutes and Cases.

BY J. H. BALFOUR BROWNE,

Of the Middle Temple, Barrister-at-Law, and Registrar to the Railway Commissioners.

This day is published, in one thick volume, 8vo., price 25s., cloth lettered,

THE PRINCIPLES OF THE LAW OF RATING

OF

HEREDITAMENTS in the OCCUPATION of COMPANIES.

BY J. H. BALFOUR BROWNE,

Of the Middle Temple, Barrister-at-Law ; Registrar to the Railway Commissioners.

TABLE OF CONTENTS.

Chap. I. Introduction—concerning Rateable Value. II. Railway Rating. III. Canal Rating. IV. The Rating of Waterworks. V. Gas Companies, the Rating of their Property and Works. VI. The Rating of Docks and Harbours. VII. The Rating of Mines and Quarries. VIII. The Rating of Bridges. IX. Cemetery Companies, the Rating of their Property. X. The Rating of Ferries and Wayleaves. XI. The Rating of Tramways. Appendix No. 1. Statutes. No. 2. The Manchester, Sheffield, and Lincolnshire Railway Case. No. 3. Valuations. A copious Index.

"The tables and specimen valuations which are printed in an appendix to this volume, will be of great service to the parish authorities, and to the legal practitioners who may have to deal with the rating of those properties which are in the occupation of Companies, and we congratulate Mr. Browne on the production of a clear and concise book of the system of Company Rating. There is no doubt

that such a work is much needed, and we are sure that all those who are interested in, or have to do with public rating, will find it of great service. Much credit is therefore due to Mr. Browne for his able treatise—a work which his experience as Registrar of the Railway Commission peculiarly qualified him to undertake."—*Law Magazine.*

Just published, in 8vo., price 7s. 6d., cloth,

THE LAW OF USAGES and CUSTOMS:

A Practical Law Tract.

BY J. H. BALFOUR BROWNE,

Of the Middle Temple, Barrister-at-Law ; Registrar to the Railway Commissioners.

"Mr. Browne has in this work chosen for exposition an interesting and difficult branch of the law. He has discharged his duty with great ability and industry.

"We look upon this treatise as a valuable addition to works written on the Science of Law."—*Canada Law Journal.*

"This is a very elegantly produced volume, and is written in an extremely scientific and agreeable style.

"As a tract upon a very troublesome department of law it is admirable—the principles laid down are sound, the illustrations are well chosen, and the decisions and *dicta* are harmonised so far as possible, and distinguished when necessary."—*Irish Law Times.*

"This work is really a bold and successful attempt to reduce to something like scientific order the many confused and confusing decisions that exist on the law relating to Usages and Customs. We consider Mr. Browne's book to be both valuable and practical."—*The Law.*

"As a book of reference we know of none so comprehensive dealing with this particular branch of Common Law. . . . In this way the book is invaluable to the practitioner."—*Law Magazine.*

THE LAW OF CORPORATIONS.

Just published, in 8vo., price 21s., cloth,

A TREATISE ON THE DOCTRINE

OF

ULTRA VIRES:

BEING

AN INVESTIGATION OF THE PRINCIPLES WHICH LIMIT
THE CAPACITIES, POWERS, AND LIABILITIES

OF

CORPORATIONS,

AND MORE ESPECIALLY OF

JOINT STOCK COMPANIES.

BY

SEWARD BRICE, M.A., LL.D., LONDON,

Of the Inner Temple, Barrister-at-Law.

"Here is a volume of 500 pp. upon a title to which, so far as we are aware, not even a chapter of any text-book in this country has been devoted, and to which we are quite sure no distinct heading has ever been assigned in an American Digest. . . . Upwards of 1100 Cases are cited in this work, of which it may be fairly assumed that few do not involve pecuniary interests of considerable magnitude. In the next decade we may be sure that the doctrine of Ultra Vires as applicable to railroads, municipal and other chartered bodies in the United States, will assume a large political as well as legal importance. We welcome his pioneer volume as a fair result of the author's 'attempt, though, perhaps, nothing more,' to collect and group the more important of these various decisions. . . . This is the only work of its kind afforded the profession of either country. The English cases, many of great authority with us, are here collected and lucidly arranged. Besides the questions constantly presented to the Courts, it happens frequently that Corporation Counsel are called upon to give advice which may affect property of great value. In such an emergency this volume would be of essential service."—*American Law Review*, October 1874.

"Much as one may be surprised at the confusion which clouds the doctrine of Ultra Vires, it is all the more pleasant to notice the lucid manner in which it has been handled by the author. His arrangement of the work is logical, and his treatment of the parts clear and concise. The work is arranged under four main heads. Each part appears to be well and appropriately filled up. The references to decided cases are full and accurate. The result is a body of law essential as an appendix to any work on Corporations, and such as should be on the shelves of any lawyer who assumes to have a useful and reliable library of modern law."—*Canada Law Journal*.

"Mr. Brice writes with knowledge and with precision; and his volume is probably as good as was possible in the present stage of the law."—*The Daily News*.

"A guide of very great value. Much information on a difficult and unattractive subject has been collected and arranged in a manner which will be of great assistance to the seeker after the law on a point involving the powers of a company."—*Law Journal*.

"Mr. Brice himself calls his work an attempt to reduce a vast mass of authorities to something like order, and to deduce from them some general conclusions. To our mind it is a very creditable and courageous attempt, and really of the same class as those which started our present excellent text-books in other branches of the law. But here the author has chosen for himself a subject of great difficulty, and one in which he will find it difficult to interest the general student. The doctrine of Ultra Vires is of very modern growth, and took its rise in the attempt of our Courts to make old law fit a new state of facts by using and refining upon a maxim. The doctrine is thus, as Mr. Brice says, purely the creature of judicial decisions, and for this reason it forms a most embarrassing and awkward subject for any legal writer. In this case the author has certainly worked hard, and displayed great industry and research. He has endeavoured, and that successfully, to force his subject into some logical order, and to arrange a mass of vague decisions under different heads as clearly as was possible. He has, at all events, laid the foundation for, perhaps, a more complete and systematic text-book; which at some future time, when the Courts are themselves more logical in their decisions, will be written. He has certainly called attention to a most important branch of our law, which has hitherto been much neglected. It is a branch, also, which is daily growing in importance with the growth of Corporations and the increase of Joint Stock Companies. To investigate the principles which limit their capacity, power, and liabilities, is certainly a task worthy of the undertaking by any lawyer, more especially at the present time. We congratulate Mr. Brice on his success in so far as he has gone, and look forward to the time when some future edition of his work shall, the law itself on Ultra Vires having become more settled, be considered as one of our standard works upon its own special subject."—*The Law*.

"It is an exceedingly valuable work at this time when the rights and powers of Corporations are matters of so much interest in the United States, as well as in Great Britain, and its manifold cases furnish as interesting reading to the business man generally as to the lawyer or justice."—*Boston (U. S.) Journal of Commerce*.

Just published, one thick volume, 8vo., cloth, 21s.,

ENGLISH CONSTITUTIONAL HISTORY.

Designed as a Text-Book for Students and Others.

BY

T. P. TASWELL-LANGMEAD, B.C.L.,

Of Lincoln's Inn, Barrister-at-Law, late Vinerian Scholar in the University of Oxford, and Tancred Student in Common Law.

~~~~~  
*Extracts from some Reviews of this Work:--*

"Mr. Taswell-Langmead has produced a useful and convenient text-book on the historical development of our political institutions. It is well written, carefully arranged, and supplies a trustworthy and fairly full outline of the subject of which the author treats; valuable alike for the purposes of refreshing the memory of those to whom it is still already familiar, and of directing the curiosity of those to whom it is still new. The book is of course a compilation. But it is a judicious compilation, and a compilation from the best authorities. Mr. Taswell-Langmead has drawn freely upon Mr. Hallam, Sir Erskine May, Mr. Freeman, and Professor Stubbs. But he has done more than merely borrow facts and phrases from his authors. He has caught the spirit of recent historical research, at once minute in its accuracy and wide in the views it suggests, of which Mr. Freeman and Professor Stubbs are among the most eminent exponents, and of the effects of which in their writings they have given some of the most conspicuous examples. On the whole, we think Mr. Taswell-Langmead may be congratulated upon having compiled an elementary work of conspicuous merit."—*Pall Mall Gazette*.

"Here is a book against which there is not a word to be said. . . . It is a remarkably good specimen of its class. . . . The matter of Mr. Taswell-Langmead's book is almost always very good. He has got up his subject exceedingly well, and in a manner highly creditable to his own studies."—*Saturday Review*.

"It bears marks of great industry on the part of the compiler, and is most completely stocked with all the important facts in the Constitutional History of England, which are detailed with much conciseness and accuracy, . . . and is very full and clear."—*Spectator*.

"We may therefore state shortly the opinion which we have formed, that Mr. Langmead was thoroughly qualified for the labour which he undertook, and that he has executed his work most ably and most conscientiously. For students of history we do not know any work which we could more thoroughly recommend."—*Law Times*.

"Mr. Taswell-Langmead's work is intended to furnish a guide to the law student. He has availed himself largely of Hallam and Sir Erskine May, and by judiciously combining the pith of those authors with that of other authorities, has, in our opinion, produced a text-book of no small value, accurate, full, yet not unwieldy, and calculated to smooth very considerably the path of the student. The execution seems to be even and careful throughout, and though the book does not profess to be more than a compilation, it is compiled from a wide range of authorities, and is written in so easy a style as to be likely to attract the general reader."—*Solicitors' Journal*.

"It is a safe, careful, praiseworthy digest and manual of all constitutional history and law."—*Globe*.

"We have here, in the compass of one goodly volume, a handy book both for the student at the Universities and Inns of Court, and for the general reader, embracing every topic of constitutional importance, from the days of the Witan to the return of John Mitchel for Tipperary. Mr. Taswell-Langmead's book has the merit of being written in clear language, which is equally adapted for students 'and others.' . . . For conciseness, comprehensiveness, and clearness, we do not know of a better modern book than Mr. Taswell-Langmead's 'English Constitutional History.'"—*Notes and Queries*.

# ENGLISH CONSTITUTIONAL HISTORY.

## REVIEWS OF THE WORK—*continued.*

“The volume on English Constitutional History, by Mr. Taswell-Langmead, is exactly what such a history should be. Mr. Taswell-Langmead writes clearly and concisely, and yet, even when treating of dry subjects, he is always readable. To students of constitutional history the work will be of great value, while it is well worth the careful perusal of all Englishmen who feel any interest in knowing how that constitution of which all Englishmen are so proud, but of which most Englishmen are profoundly ignorant, has grown up. The notes are numerous and well selected, and references are always given to the authorities quoted. The index is full and copious—an important point in a book intended for reference as well as for study.”—*Standard.*

“But we must say a few words about the book before us, and they will be words of high praise. The author has, of course, made ample use of Hallam, Stubbs, Freeman, Erskine May, and other authorities, and a text-book which did not freely use the leading authorities would be valueless. Yet we do not hesitate to describe Mr. Taswell-Langmead's book as an original, as well as a very meritorious, work. It is not a mere compilation. It is the fruit of extensive and well-digested reading. The author has an easy and lucid style, but he has not hesitated to quote from his authorities when there has been no need for condensation. He adopts the chronological method, though not without exception—as, e.g., chapter vii., which is an excellent account of the ‘Origin of Parliament.’ As a text-book for the student this work will be invaluable, because it is very comprehensive, and yet so arranged and written that it leaves a definite impression of the history, as a whole, on the mind. For young men, and we will add for women who have not the time and opportunity for reading constitutional history, this work is especially adapted. As a text-book for students, we regard it as an exceptionally able and complete work.”—*Law Journal.*

“Mr. Taswell-Langmead has endeavoured in the present volume to bring together all the most prominent features in the Constitutional History of England, and explain their origin and development. The latter portion of his work contains an admirable account of the action of parties in the State since the Revolution, untinged, however, by partisanship, and it is possible to gain from a hundred pages of Mr. Langmead's work a knowledge of the growth and progress of the present system, which elsewhere could only be obtained in many volumes.”—*Irish Law Times.*

“Under the title of ‘English Constitutional History: a text-book for students and others,’ Mr. Taswell-Langmead has produced a very useful volume, in which he has brought together the results of the labours of Hallam, Professor Stubbs, Mr. Freeman, Sir Erskine May, and other high authorities. The work forms a valuable introduction to the more systematic study of the subject with which it deals, and its simple style, clear arrangement, and, we must add, copious index, adapt it for convenient and rapid reference.”—*Daily News.*

“Every one who takes a real interest in the history of the past and of the present—the true and living scion of that past—will gladly welcome the publication of such manuals as Mr. Taswell-Langmead's, which, at reasonable length and in readable form and language, will do much to make popularly known the origin and the growth of our institutions, and the reasons for their continued existence or moderate and harmonious reform. Such manuals when compiled with the conscientious carefulness here manifested on every page, are not only useful to the large and growing class of students, but are handy summaries of history which no library can do without. . . . The plan of this compendium appears to have been well considered—an element often miserably disregarded—and the materials which the author has chosen to form the solid texture of his work have been judiciously selected. Nothing can be better than the use of Professor Stubbs' admirable volumes, Dr. Freeman's ‘Norman Conquest,’ and Lappenberg's ‘England under the Anglo-Saxons,’ for the groundwork of the earlier chapters. . . . The ample commentary on Magna Charta, to which the whole of a long chapter is devoted, is both useful and interesting, and the author has wisely given in the notes the whole of the original text of this celebrated ‘landmark in Constitutional History.’ . . . Mr. Taswell-Langmead has thoroughly grasped the bearings of his subject. It is, however, in dealing with that chief subject of constitutional history—parliamentary government—that the work exhibits its great superiority over its rivals.”—*Academy.*

INJUNCTIONS, ADVERTISEMENTS, AND OTHER ORIGINAL

DOCUMENTS OF LEGAL AUTHORITY.

BY SEWARD BRICE, LL.D.,

OF THE INNER TEMPLE, BARRISTER-AT-LAW.

*"To the vast number of people who in various ways are interested in the working of the Act, Mr. Brice's volume cannot fail to be welcome. It is well conceived and carefully executed."*—THE TIMES.

"This excellent compilation of the law relating to a subject of very great interest and importance. . . . it is well arranged; the practitioner will find all the material ready to his hand, Mr. Brice having spared no pains in describing the procedure as elucidated by the decisions of the Privy Council. In Mr. Brice's work the ecclesiastical practitioner and the church authorities will be provided with a reliable guide to Church Law under the Act of 1874."—*Law Times*.

"Dr. Brice's book upon the law relating to public worship has been, as may be supposed, specially framed for the use of clergymen, churchwardens and others, interested in the regulation of our Church services. Here there is condensed in one volume all the material for the guidance and control of public worship, and both ecclesiastics and laymen can, by aid of the index, find out at a glance the exact state of the law as interpreted by the highest authorities upon any given point; and churchwardens and others can ascertain the exact steps which should be followed by those who desire to put a stop to breaches of the law. The work deserves, and will no doubt have, a very extensive sale."—*Standard*.

"To law students the very clear exposition of the various statutes relating to rites and sacraments, ceremonials, vestments, ornamentation, ecclesiastical remedies and punishments, the jurisdiction of the ordinary, &c., will be of the greatest value, as well for the methodical arrangement which characterises it, as for the erudition displayed in the comments, and the clearness and lucidity of the style in which they are couched. Several authoritative enactments relating to public worship, and the various editions of the articles, are given in

*extenso*; and the numerous cases incidentally alluded to throughout the volume are alphabetically arranged and tabulated."—*Morning Post*.

"Dr. Brice's large and learned work is a very complete manual for its purpose."—*Guardian*.

"Dr. Brice's book contains a great mass of information on ecclesiastical matters, which must at all times be valuable for reference."—THE RECORD.

"We can confidently recommend the treatise to all those who are concerned in the subject. To students it will be as useful as a compendium of ecclesiastical law. To lawyers it will be a handy book of reference. To clergymen and parishioners it will be a valuable guide, and may perhaps prevent some useless litigation. An index of twenty-two pages, and a table of upwards of 300 cases, testify to the labour bestowed upon this treatise; but it is not a mere compilation, and only an author who has thoroughly mastered the subject could have written the book."—*Law Journal*.

"The purpose of Mr. Seward Brice's treatise on 'The Law Relating to Public Worship' is, as stated in the preface, to give 'a full exposition of the Law of Public Worship, in so far as it concerns the external forms and cultus enforced or merely permissible by the rules of the Church of England,' special prominence being assigned to the subjects of ornaments, ceremonial, and vestments. The work is very carefully and thoroughly done, and includes not only a clear account both of the substantive law and of the means of enforcing it, but the text of the pertinent statutes and of other documents bearing upon the matters discussed."—*Daily News*.

In one thick volume, 8vo., 1873, price 30s., cloth lettered,

## THE LAW AND PRACTICE IN BANKRUPTCY;

Comprising the Bankruptcy Act, 1869; the Debtors Act, 1869; the Insolvent Debtors and Bankruptcy Repeal Act, 1869; together with the General Rules and Orders in Bankruptcy, at Common Law and in the County Courts;

With the Practice on Procedure to Adjudication, Procedure to Liquidation, Procedure to Composition, and Procedure under Debtors' Summons, Scales of Costs and of Allowance to Witnesses.

Copious Notes, References, and a very full Index. Second Edition. By HENRY PHILIP ROCHE and WILLIAM HAZLITT, Barristers-at-Law, and Registrars of the Court of Bankruptcy.

### From THE LAW.

"The aim of the authors in writing this book has been to make it useful to the profession, and in this they have eminently succeeded. Bringing to their task a long and varied experience of Bankruptcy laws, they have been able, from their position as Registrars of the Court, also to acquire more knowledge of the practical working of the new Act than could well have been obtained by any other writer, however gifted and industrious. The last statute, which by itself looked so simple, has, from the number and complexity of the rules framed thereunder, probably surpassed all its predecessors in accumulating a mass of forms and ceremonies. Therefore it is that a book like the above becomes absolutely necessary, more especially to solicitors who have but a small practice in Bankruptcy. The portion of the work which to such will be found most useful, is that on the practical procedure; where they will find plain and minute directions as to setting about the commencement of a Bankruptcy or Liquidation, and also as to its continuance and conclusion. There is also a special and carefully written chapter on Costs. There are included in the work all the statutes, rules, forms, and scales of costs, which can be wanted in a Bankruptcy case; while the Index is a book of itself, and seems unusually complete. The type and binding could not well be better. Altogether we can say of this book that it is the product of hard work, by men who know of what they write, and that it is worthy to stand beside our best text-books on the shelves of every lawyer."

### From the LAW TIMES.

"This work is one which has naturally carried with it more weight than any other text-book, having been written by two registrars of the Court of Bankruptcy. In practice it has been found to realise the anticipations formed concerning it, in proof of which we have now in our hands a second edition. Perhaps the most valuable feature of the work is the fulness of the practical details which enable a tyro to transact his business with tolerable security. The first half of the work comprises the Bankruptcy Act and the Debtors Act, which have been carefully and ably noted with all the decisions; and the latter half is devoted mainly to practice and procedure. The Bills of Sale Act and one or two other enactments are incorporated which are frequently consulted by the bankruptcy practitioner. A very elaborate index ends the volume."

### From the LAW JOURNAL.

"The work before us also contains the Debtors Act of 1869, the Bankruptcy Repeal Act of 1869, the Absconding Debtors Act, 1869, with several other Acts and all the General Rules in Bankruptcy, printed and annotated in the same manner as the principal Act. There is also a very full collection of forms and bills of costs; but the portion of the work which is decidedly the most novel, and we imagine will prove extremely useful, is that comprised in pages 355-474, which contain an exposition by the authors on the practice on procedure to adjudication, liquidation, and composition with creditors, and on procedure under a debtors' summons. It is not often that a practising lawyer is able to turn to a book on Practice written by the judges of the particular Court to which it relates, and, as it were, stamped with the seal of authority. . . . In conclusion, we have only to say that Messrs. Roche and Hazlitt have appended to their work a very full and copious index, and that we can cordially and conscientiously recommend it to the notice of the legal profession."

### From the SOLICITORS' JOURNAL.

"In the book before us, a reader is enabled by means of large consecutive figures at the head of each margin to reach the section and cases he requires without the trouble of referring to the index. In the hurry of daily practice this will probably be found no small advantage. In the subsequent chapters on adjudication, liquidation, composition, and debtors' summons, the arrangement adopted is the convenient one for practical purposes of tracing each consecutive step of the procedure, and welding together the provisions of the Acts, Rules, and Forms, with the substance of the cases. This appears to us to be successfully accomplished, and the book, as a whole, constitutes a useful digest of the statutory and case law. As regards the former, the work appears to contain every provision relating to or connected with the subject, including even the orders made in December, 1869, transferring business then pending. The cases are taken from a wide range of reports and include a considerable number cited from MSS. notes. The index is unusually full, combining both an analysis and index; and, lastly, the type and paper are all that can be desired."

Just published, Third Edition, in 8vo., price 20s., cloth,

# THE PRINCIPLES OF EQUITY.

Intended for the Use of Students and the Profession.

BY EDMUND H. T. SNELL,

OF THE MIDDLE TEMPLE, BARRISTER-AT-LAW.

THIRD EDITION.

By JOHN R. GRIFFITH, of Lincoln's Inn, Barrister-at-Law.

In One Vol., 8vo., 1874.

\* \* *This Work has become a Standard Class-Book in England, Ireland, India, and the Colonies.*

"The second edition of this Treatise was noticed in this *Review* in October, 1872; the first edition had appeared in 1868. We are glad to see evidence of its growing popularity. As a *second book* in equity we are inclined to think it is the best which has been published. Mr. Snell's Treatise presents compactly, and (considering the size of the book) with remarkable comprehensiveness, the leading points on the various heads of Equity jurisdiction. Its selection of the most recent Cases is very valuable for the student and for the practitioner who desires a convenient *vade-mecum*, this book can be safely recommended."—*American Law Review*, January, 1875.

"We know of no better introduction to the Principles of Equity. While affording to the Student an insight to principles of which as yet, he is not master, it places at the service of those familiar with the doctrines of Equity, the most recent cases establishing or qualifying well understood principles."—  
CANADA LAW JOURNAL.

"Equity can never be made easy, nor is it desirable that it should be so; but in the fact of the large equitable jurisdiction conferred recently—that is, since 1853—upon Common Law Courts, and the extension of equitable principles and rules, to the exclusion of Common Law, contemplated by the Judicature Bill, it behoves every practitioner to know as much as possible of equity with as little expense of time as possible, and for this purpose we know of no better work than Mr. Snell's. It presents in a small compass the substance of 'The Leading Cases,' and of Story's work on 'Equity Jurisprudence;' while students will be delighted to find clear, logical, and intelligible explanations of its most mysterious process and development. The work professes to be based on the lectures of Mr. Birkbeck, but it has now reached its third edition in a few years, and is admirably noted up with the latest decisions and enactments. We find particularly good information concerning the equitable and statutable rights of married women, and the priorities of equitable and legal, registered and unregistered, mortgages. Counsel, attorney, and student, will find it a useful, and especially a *safe* guide in what it professes to teach."—*Irish Law Times*.

"The great merit of the book now under consideration is its scientific arrangement and accuracy. It, therefore, becomes a most excellent guide to

those Common Lawyers who have somehow acquired the notion that Equity is a vague term for a sort of natural justice, and that it recognises no rules such as are found in the Common Law. This book is indeed a most praiseworthy and successful attempt to reduce Equity Jurisprudence to a science, and as such deserves every commendation that can be bestowed; for by doing so it makes one more step towards that complete codification of our law which should be the aim and the desire of every true lawyer. To the ordinary student of Equity it is indeed unnecessary for us to say one word in its praise and recommendation. But as every Common Lawyer must before long add to his knowledge some idea of equitable doctrine, it is to them especially that we commend this book. They will find in it the principles of Equity set out and illustrated in a really scientific and, we may say, workmanlike way, and for this reason they will recognise in its method the style of thought and manner to which they have long been accustomed."—*The Law*.

"We have received the third edition of Snell's Equity, by Mr. J. R. Griffith. The statute and case law has been brought down to the time of publication, and this admirable standard work may therefore be used without any more assistance than is afforded by the current reports."—*Law Times*.

Just published, in one volume, 8vo., price 18s., cloth,

# PRINCIPLES OF CONVEYANCING.

AN ELEMENTARY WORK FOR THE USE OF STUDENTS.

By HENRY C. DEANE, of Lincoln's Inn, Barrister-at-Law, Lecturer to the Incorporated Law Society of the United Kingdom.

"Mr. Deane is one of the Lecturers of the Incorporated Law Society, and in his elementary work intended for the use of students, he embodies some lectures given at the hall of that society. It would weary our readers to take them over the ground necessarily covered by Mr. Deane. The first part is devoted to Corporeal Hereditaments, and the second to Conveyancing. The latter is prefaced by a very interesting "History of Conveyancing," and for practical purposes the chapter (Ch. 2, Part II.) on Conditions of Sale is decidedly valuable. The most recent legislation is handled by Mr. Deane in connexion with the old law, the Judicature Act and the Vendor and Purchaser Act both being considered in this chapter on Conditions of Sale. We might make some interesting quotations, but the work is one which those engaged in conveyancing should purchase and put on their shelves, and welcome it with the recommendations which we have already recorded."—*Law Times*.

"We hope to see this book, like Snell's Equity, a standard class-book in all Law Schools where English law is taught."—CANADA LAW JOURNAL.

"This is, as its author states, a purely elementary work. It may indeed be called the A B C of conveyancing. In the clearest and simplest language the student will find an outline, firstly, of the various forms of ownership in land, and, secondly, of the ordinary modes of conveyances used in transferring such land from one person to another. The second portion is founded upon lectures that were delivered by the author at the Incorporated Law Society, and is accordingly very clear and practical. The whole work is very well and thoroughly done. Mr. Deane has, we believe, succeeded in writing the very simplest work ever published on the abstruse subject of conveyancing; and has by his language and illustrations, explained points of law in a way that cannot be misunderstood. For this reason, and as being the most elementary work combining the elements of real property law with the principles of practical conveyancing, we can heartily recommend it as a first book on the subject of which it treats. As such we should think it would be both worthy and suitable to be named as one of the books that are required to be read as a preparation for the various Law Examinations."—*The Law*.

"We can confidently recommend Mr. Deane's work on the 'Principles of Conveyancing.' It is not exhaustive, and does not pretend to go fully into the laws of trusts, powers, or remainders, but it fully explains the several different legal and equitable estates in land and the tenure of land, and the modes of alienation used in conveyances *inter vivos* and by will. It also fully explains the meaning and value of the several parts of the conveyances, the covenants, conditions, provisions, exceptions and reservations, habendums, and the proper form of recitals, &c., &c.—a point frequently neglected in other and more pretentious treatises. It contains excellent

chapters on purchase deeds, leases, mortgages, settlements, and wills; and, in addition, Mr. Deane treats of conditions of sale most fully and clearly. It seems essentially the book for young conveyancers, and will, probably, in many cases supplant Williams. It is, in fact, a modern adaptation of Mr. Watkin's book on conveyancing, and is fully equal to its prototype."—*Irish Law Times*.

"A general review of the scope of Mr. Deane's volume and a perusal of several of its chapters have brought us to the conclusion that, though its contents are purely elementary, and it contains nothing which is not familiar to the practitioner, it may be extremely useful to students, and especially to those gentlemen who are candidates for the various legal examinations. There are so many questions set now on case law that they would do well to peruse this treatise of Mr. Deane's, and use it in conjunction with a book of questions and answers. They will find a considerable amount of equity case law, especially in the second part of Mr. Deane's book, which comprises in substance some lectures delivered by the author at the Law Institution."—*Law Journal*.

"As Mr. Deane's work is addressed to the rising generation of conveyancers, 'students entering upon the difficulties of real property law,' it may be presumed that he does not fear the immediate annihilation of that noble science in its traditional forms by any legislative changes. The first part of the volume is composed of a series of chapters on corporeal hereditaments, and the second part of some lectures on conveyancing recently delivered by the author at the Law Institution. It is enough to say that Mr. Deane writes clearly and to the point."—*Saturday Review*.

Just published, in one volume, 8vo., price 21s., cloth,

# A NEW LAW DICTIONARY, AND Institute of the whole Law;

EMBRACING FRENCH AND LATIN TERMS, AND REFERENCES TO THE  
AUTHORITIES, CASES, AND STATUTES.

BY ARCHIBALD BROWN,

M.A. Edin. and Oxon, and B.C.L. Oxon, of the Middle Temple, Barrister-at-Law, Author  
of the "Law of Fixtures," "Analysis of Savigny's Obligations in Roman Law, &c.

*"Mr. Brown has succeeded in the first essential, that of brevity. He has compressed into a wonderfully small compass a great deal of matter. Our impression is that the work has been carefully executed."*—SOLICITORS' JOURNAL.

"For the purposes of working law students nothing could be more useful. Besides explaining every legal term, new and old, the author gives short notes upon points of law, which are excellent specimens of clear and compressed writing. References to cases and statutes are abundant, as also to the best text writers on each subject. As an example of Mr. Brown's resolute endeavour to reduce even the vaguest and widest portions of our law to some clear first principles, we may refer readers to the title 'Fraud,' where they will find nine columns of compressed learning scientifically arranged. French and Roman law terms and doctrines are also carefully explained, while even the growth and character of the British Constitution are shortly but clearly set out under their proper headings. As already stated, the book is, for students, invaluable; but members of the profession will also find it useful for ready reference; and certainly the public could find a great deal of curious information in its pages."—*The Law*.

"In Mr. A. Brown's 'New Law Dictionary,' the object has been to present a complete institute of the whole law of England, expressing briefly, but without inaccuracy or meagreness, the rules and principles of the common law, of Chancery law, of real property or conveyancing law, of mercantile law, of constitutional law, and of public or general, that is, international law. In carrying out this comprehensive scheme the author has arranged the rules and principles of doctrine, evidence, or procedure in lexicographical order, giving

prominence to modern law, but giving the ancient law when serviceable in explaining modern principles or phrases. This work, laborious and difficult as it was, has been admirably carried out, and the work is really what it professes to be, a complete compendium. An index to a dictionary is a novelty, but from the exceptional nature of the contents an index was likely to be most useful, and accordingly Mr. Brown has prefixed to the book a copious index by which a student can at once turn to the main body of the work and obtain the information he requires. Authorities and cases are abundantly cited, and Mr. Brown can claim with justice to call his book an institute of the whole law."—*Standard*.

"In a modest preface Mr. Brown introduces us to a rather ambitious work. He has endeavoured to compress into less than four hundred pages the whole law of England, and has evidently bestowed much pains on the execution of the task. He does not, however, aim at anything higher than rendering a service to students preparing for the Bar or for the lower branch of the profession, and there can be no doubt that he has produced a book of reference which will be useful to the class he has had in view. Mr. Brown has perhaps done about as much as any one, not a rare genius, could do, and his Dictionary will be serviceable to those who are in want of hints and references, and are content with a general idea of a law or legal principle. It is a handy book to have at one's elbow."—*Saturday Review*.

*"This book has now been for some time published, and we have had many opportunities of referring to it. We find it an admirable Law Dictionary, and something more, inasmuch as it contains elaborate historical and antiquarian analyses of our legal system under the several headings. The student and the literary man will find the book very useful in reading and writing. Indeed the people who are not lawyers, but who nevertheless feel a desire or are under a necessity to use legal terms, or who meet them in their course of study, cannot do better than obtain a copy of this work and use it judiciously; they will thereby be enabled to avoid the ludicrous errors into which novelists in particular, and public speakers too, are often led by the inappropriate use of terms whose meanings they do not perfectly comprehend."*—IRISH LAW TIMES.

COGHLAN'S HINDU LAW.

Nearly ready, in 8vo., uniform with "Indermaur's Epitomes,"

*An EPITOME of HINDU LAW CASES, chiefly of Western India;*

With some Short Notes thereon.

By WILLIAM M. P. COGHLAN,

BOMBAY CIVIL SERVICE, JUDGE AND SESSIONS JUDGE OF TANNA.

THE ELEMENTS OF ROMAN LAW.

This day is published, in 216 pages 8vo., price 10s., cloth,

A CONCISE DIGEST OF THE INSTITUTES

OF

GAIUS AND JUSTINIAN,

*With copious References arranged in Parallel Columns, also Chronological and Analytical Tables, Lists of Laws, &c. &c.*

Primarily designed for the Use of Students preparing for Examination at Oxford, Cambridge, and the Inns of Court.

By SEYMOUR F. HARRIS, B.C.L., M.A.,

OF WORCESTER COLLEGE, OXFORD, AND THE INNER TEMPLE, BARRISTER-AT-LAW.

*"Mr. Harris's digest ought to have very great success among law students both in the Inns of Court and the Universities. His book gives evidence of praiseworthy accuracy and laborious condensation."*—LAW JOURNAL.

*"Mr. Harris deserves the credit of having produced an epitome which will be of service to those numerous students who have no time or sufficient ability to analyse the Institutes for themselves."*—LAW TIMES.

CHRONOLOGICAL TABLE of and INDEX to the STATUTES, to the end of the Session of 1874. Third Edition, imperial 8vo., £1 5s.

## MR. INDERMAUR'S BOOKS FOR STUDENTS.

"Mr. Indermaur's books are admirably adapted to the purpose for which they are written, and we heartily recommend them to students and teachers, who will find them exceedingly convenient compendiums of the law."—*American Law Review*.

### THE NEW JUDICATURE ACTS.

This day is published, in 8vo., price 6s., cloth,

## THE STUDENT'S GUIDE TO THE JUDICATURE ACTS, 1873 and 1875;

AND THE RULES THEREUNDER:

Being a book of Questions and Answers intended for the use of Law Students. By JOHN INDERMAUR, Solicitor, Author of "Self-preparation for the Final Examination," and "Epitomes of Leading Common Law, and Equity and Conveyancing Cases."

In 8vo., 1874, price 3s., cloth,

## SELF-PREPARATION FOR THE FINAL EXAMINATION.

CONTAINING A COMPLETE COURSE OF STUDY, WITH STATUTES,  
CASES, AND QUESTIONS;

And intended for the use, during the last four months, of those Articled Clerks who read by themselves. By JOHN INDERMAUR, Solicitor (Clifford's Inn Prizeman, Michaelmas Term, 1872); Author of "Epitomes of Leading Common Law, and Equity and Conveyancing Cases."

Third Edition, in 8vo., 1875, price 6s., cloth,

## AN EPITOME OF LEADING COMMON LAW CASES; WITH SOME SHORT NOTES THEREON.

Chiefly intended as a Guide to "SMITH'S LEADING CASES." By JOHN INDERMAUR, Solicitor (Clifford's Inn Prizeman, Michaelmas Term, 1872).

"This should be placed in the handy-volume series of law books. Its title expresses its object—that of an Epitome and Guide to Leading Cases. The Cases themselves are stated with admirable brevity and clearness, and the notes turn out to be more full and instructive than their material size would seem to indicate. The type and binding are excellent, and in several respects this is an improvement on the first edition."—*American Law Review*.

"We have received the third edition of the 'Epitome of Leading Common Law Cases,' by Mr. Indermaur, Solicitor. The first edition of this work was published in February, 1873, the second in April, 1874, and now we have a third edition dated September, 1875. No better proof of the value of this book can be furnished than the fact that in less than three years it has reached a third edition. In this edition the author has inserted the well-known case of *Currie v. Misa* immediately after *Miller v. Race*."—*Law Journal*.

Second Edition, in 8vo., 1874, price 6s., cloth,

## AN EPITOME OF LEADING CONVEYANCING AND EQUITY CASES;

WITH SOME SHORT NOTES THEREON, FOR THE USE OF  
STUDENTS.

By JOHN INDERMAUR, Solicitor, Author of "An Epitome of Leading Common Law Cases."

"We have received the second edition of Mr. Indermaur's very useful Epitome of Leading Conveyancing and Equity Cases. The work is very well done."—*Law Times*.

"The Epitome well deserves the continued patronage of the class—Students—for whom it is especially intended. Mr. Indermaur will soon be known as the 'Students' Friend.'"—*Canada Law Journal*.

Second Edition, in one thick volume, crown 8vo., price 20s., cloth,

## THE PROBATE, LEGACY, AND SUCCESSION DUTY ACTS:

Comprising 36 Geo. III. cap. 52; 45 Geo. III. cap. 28; 55 Geo. III. cap. 184; and 16 & 17 Vict. cap. 51; with an Introduction, copious Notes and References to all the decided Cases in England, Scotland and Ireland, to Michaelmas Term 1870; together with an Appendix of Statutes, Forms, Tables of Duties, and a full Index. By ALFRED HANSON, Esq., Comptroller of Legacy and Succession Duties.

"It is the only complete book upon a subject of great importance, but which does not come within the regular course of professional study, and therefore requires to be read up when a case having reference to it comes into the solicitor's office.

"Mr. Hanson is peculiarly qualified to be the adviser at such a time. Hence, a volume without a rival."—*Law Times*.

"Since Mr. Hanson produced his first edition he has been appointed Comptroller of Legacy and Succession Duties. His book is in itself a most useful one; its author knows every in and out of the subject, and has presented the whole in a form easily and readily handled, and with good arrangement and clear exposition."—*Solicitors' Journal*.

In one volume, 8vo., 1870, price 18s., cloth lettered,

## THE LAW OF COPYRIGHT,

In Works of Literature and Art; including that of the Drama, Music, Engraving, Sculpture, Painting, Photography, and Ornamental and Useful Designs; together with International and Foreign Copyright, with the Statutes relating thereto, and References to the English and American Decisions. By WALTER ARTHUR COPINGER, of the Middle Temple, Barrister-at-Law.

"A book that is certainly the most complete treatise upon the complex subject of copyright which has ever been published in England."—*Athenaeum*.

"A work much needed, and which he has done exceedingly well."—*American Law Review*.

"The book is a thoroughly good one."—*The Bookseller*.

"We refer our readers to this capital book on Copyright."—*The Publishers' Circular*.

In 8vo., 1873, price 10s. 6d., cloth,

## THE BOVILL PATENT.

A Collection of the Summings-up and Judgments in the Litigation under the Patent of 5th June, 1849, granted to the late G. H. BOVILL for Improvements in the Manufacture of Flour. With an Introduction and some Observations by W. W. WYNNE, Attorney-at-Law.

In 8vo., 1872, price 12s., cloth,

## AN EXPOSITION OF THE LAWS OF MARRIAGE AND DIVORCE.

As administered in the Court for Divorce and Matrimonial Causes, with the Method of Procedure in each kind of Suit; Illustrated by Copious Notes of Cases. By ERNST BROWNING, of the Inner Temple, Barrister-at-Law.

In 8vo., 1867, price 16s., cloth,

## THE CHARITABLE TRUSTS ACTS, 1853, 1855, 1860; THE CHARITY COMMISSIONERS JURISDICTION ACT, 1862; THE ROMAN CATHOLIC CHARITIES ACTS:

Together with a Collection of Statutes relating to or affecting Charities, including the Mortmain Acts, Notes of Cases from 1853 to the present time, Forms of Declarations of Trust, Conditions of Sale, and Conveyance of Charity Land, and a very copious Index. Second Edition.

By HUGH COOKE and R. G. HARWOOD, of the Charity Commission.

"Charities are so numerous, so many persons are directly or indirectly interested in them, they are so much abused, and there is such a growing desire to rectify those abuses and to call in the aid of the commissioners for a more beneficial application of their funds, that we are not surprised to receive a

second edition of a collection of all the statutes that regulate them, admirably annotated by two such competent editors as Messrs. Cooke and Harwood, whose official experience peculiarly qualifies them for the task."—*Law Times*.

## THE LAW OF INJUNCTIONS.

In two volumes, royal 8vo., 1872, price 70s., cloth,

# THE LAW AND PRACTICE OF INJUNCTIONS.

EMBRACING ALL THE SUBJECTS IN WHICH  
COURTS OF EQUITY AND COMMON LAW  
HAVE JURISDICTION.

BY WILLIAM JOYCE,  
OF LINCOLN'S INN, BARRISTER-AT-LAW.

### REVIEWS.

"A work which aims at being so absolutely complete, as that of Mr. Joyce upon a subject which is of almost perpetual recurrence in the Courts, cannot fail to be a welcome offering to the profession and, doubtless, it will be well received and largely used, for it is as absolutely complete as it aims at being. . . . This work is, therefore, eminently a work for the practitioner, being full of practical utility in every page, and every sentence, of it. . . . We have to congratulate the profession on this new acquisition to a digest of the law, and the author on his production of a work of permanent utility and—fame."—*Law Magazine and Review*.

"Mr. Joyce has produced not a treatise but a complete and compendious *exposition* of the Law and Practice of Injunctions both in equity and common law.

"Part III. is devoted to the practice of the Courts. *Contains an amount of valuable and technical matter nowhere else collected.*

"Mr. Joyce's work, within the limits which he has assigned himself, is well done. He has been evidently diligent in the collection of cases, and the points decided are stated with accuracy, and with more fulness of detail than in any work on injunctions with which we are familiar. It cannot fail to be useful in instructing practitioners in the proper employment of this much abused method of procedure."—*American Law Review*.

"Mr. Joyce has produced a clear, scientific, and thorough treatise upon the subject of injunctions which, unlike most English works, will be nearly as useful to the American as to the English practitioner.

"We doubt if there can be a single case of any note found upon injunctions in the English law that is not cited in these volumes."—*Chicago Legal News*.

"This work, considered either as to its matter or manner of execution, is no ordinary work. It is a complete and exhaustive treatise both as to the law and the practice of granting injunctions. It must supersede all other works on the subject. The terse statement of the practice will be found of incalculable value. We know of no book as suitable to supply a knowledge of the law of injunctions to our common law friends as Mr. Joyce's exhaustive work. It is alike indispensable to members of the Common Law and Equity Bars. Mr. Joyce's great work would be a casket without a key unless accompanied by a good index. His index is very full and well arranged. We feel that this work is destined to take its place as a standard text-book, and *the* text-book on the particular subject of which it treats. The author deserves great credit for the very great labour bestowed upon it. The publishers, as usual, have acquitted themselves in a manner deserving of the high reputation they bear."—*Canada Law Journal*.

"From these remarks it will be sufficiently perceived what elaborate and painstaking industry, as well as legal knowledge and ability, has been necessary in the compilation of Mr. Joyce's work. No labour has been spared to save the practitioner labour, and no research has been omitted which could tend towards the elucidation and exemplification of the general principles of the Law and Practice of Injunctions."—*Law Journal*.

"He does not attempt to go an inch beyond that for which he has express written authority; he allows the cases to speak, and does not speak for them.

"The work is something more than a treatise on the Law of Injunctions. It gives us the general law on almost every subject to which the process of injunction is applicable. Not only English, but American decisions are cited, the aggregate number being 3,500, and the statutes cited 160, whilst the index is, we think, the most elaborate we have ever seen—occupying nearly 200 pages. The work is probably entirely exhaustive."—*Law Times*.

In one volume, royal 8vo., 1869, price 30s., cloth lettered,

# CASES AND OPINIONS ON CONSTITUTIONAL LAW,

AND VARIOUS POINTS OF ENGLISH JURISPRUDENCE.

*Collected and Digested from Official Documents and other Sources ;*

WITH NOTES.

By WILLIAM FORSYTH, M.A., Q.C.,

*Standing Counsel to the Secretary of State in Council of India,*

Author of "Hortensius," "History of Trial by Jury," "Life of Cicero," etc., late  
Fellow of Trinity College, Cambridge.

#### From the CONTEMPORARY REVIEW.

"We cannot but regard with interest a book which, within moderate compass, presents us with the opinions or *responsa* of such lawyers and statesmen as Somers, Holt, Hardwicke, Mansfield, and, to come down to our own day, Lyndhurst, Abinger, Denman, Cranworth, Campbell, St. Leonards, Westbury, Chelmsford, Cockburn, Cairns, and the present Lord Chancellor Hatherley. At the end of each chapter of the 'Cases and Opinions,' Mr. Forsyth has added notes of his own, containing a most excellent summary of all the law bearing on that branch of his subject to which the 'Opinions' refer. . . . Our space precludes us from dwelling upon the contents of this work at any greater length, but we think we have said enough to show that it is worthy of a place on the book-shelves of our statesmen, and all who take an interest in constitutional, or rather, national and colonial questions."

#### From the LAW MAGAZINE and LAW REVIEW.

"Mr. Forsyth has largely and beneficially added to our legal stores. His work may be regarded as in some sense a continuation of 'Chalmers's Opinions of Eminent Lawyers.' . . . The constitutional relations between England and her colonies are becoming every day of more importance. The work of Mr. Forsyth will do more to make these relations perfectly clear than any which has yet appeared. Henceforth it will be the standard work of reference in a variety of questions which are constantly presenting themselves for solution both here and in our colonies. . . . Questions of colonial law by no means occupy an exclusive share of the volume. . . . Among other questions on which 'opinions' are given, and of which careful summaries and generalisations have been added by Mr. Forsyth, are those relating to vice-admiralty jurisdiction and piracy; the prerogatives of the Crown in relation to treasure trove, land in the colonies, mines, cession of territory, &c.; the power of courts-martial, extra-territorial jurisdiction, allegiance, the *lex loci* and the *lex fori*, extradition, and appeals from the colonies. The volume bears marks of extreme care and regard to accuracy, and is in every respect a valuable contribution to constitutional law."

#### From the CANADA LAW JOURNAL.

"Mr. Forsyth at the present juncture has done good service not only to his profession, but to all men who take any interest in public affairs, and we therefore hope that those for whom the book is especially intended will not be backward in giving to it that support which the industry and ability of its author, and the public spirit and enterprise of its publishers, so well deserve."

#### From the LAW TIMES.

"This one volume of 560 pages or thereabouts is a perfect storehouse of law not readily to be found elsewhere, and the more useful because it is not abstract law, but the application of principles to particular cases. Mr. Forsyth's plan is that of classification. He collects in separate chapters a variety of opinions bearing upon separate branches of the law. Thus, the first chapter is devoted to cases on the common law, and the law applicable to the colonies; the second to the ecclesiastical law relating to the colonies; the third to the powers and duties, civil and criminal liabilities, of governors of colonies; the next to vice-admiralty jurisdiction and piracy; the fifth to certain prerogatives of the Crown: such as lands in the colonies, grants, escheats, mines, treasure trove, royal fish, felon's goods, writ *ne creat regno*, proclamation, cession of territory, and creation of courts of justice; the sixth chapter contains opinions on martial law and courts-martial; the seventh on extra-territorial jurisdiction; the eighth on the *lex loci* and *lex fori*; the ninth on allegiance and aliens; and then successively on extradition; on appeals from the colonies; on the revocation of charters; on the Channel Islands; on the nationality of a ship, and other matters relating to ships; on the power of the Crown to grant exclusive rights of trade; on writs of habeas corpus; on certain points relating to the criminal law; and lastly, on miscellaneous subjects, such as the declaration of war before hostilities; on the right of war, booty and prize, and on the grant of a marriage licence. . . . This is a book to be read, and therefore we recommend it not to all lawyers only, but to every law student. The editor's own notes are not the least valuable portion of the volume."

Third Edition, in Svo., 1875, price 21s., cloth,

# THE LAW OF COMPENSATION

FOR LANDS, HOUSES, &c.,

Under the Lands Clauses, Railways Clauses Consolidation and Metropolitan Acts,  
THE ARTIZANS & LABORERS' DWELLINGS IMPROVEMENT ACT, 1875.  
WITH A FULL COLLECTION OF FORMS AND PRECEDENTS.

*Third Edition (much enlarged).*

By EYRE LLOYD,

OF THE INNER TEMPLE, BARRISTER-AT-LAW.

"This new edition of Mr. Lloyd's book will sustain its reputation as a useful practical treatise on a branch of law of considerable importance and difficulty. The new cases have been diligently noted up, and we may notice, as a feature of the book, that references to four sets of reports are appended to nearly all the recent decisions. An important addition has been recently made to the

law of compensation by the Artizans' Dwellings Act. Mr. Lloyd prints the Act in full in his Appendix, and gives in chapter xi. an outline of the procedure. He also gives a summary of the portions of the Public Health Act of last session bearing upon the subject of compensation. As a careful digest of the law of compensation it will be found of service to the profession."—*Solicitors' Journal.*

In Svo., 1875, price 12s., cloth,

# THE LAW OF FIXTURES.

*Third Edition,*

Including the Law under the

## *AGRICULTURAL HOLDINGS ACT, 1875,*

Incorporating the principal American Decisions, and generally bringing the law down to the present time.

By ARCHIBALD BROWN, M.A. Edin. and Oxon. and B.C.L. Oxon.,

OF THE MIDDLE TEMPLE, BARRISTER-AT-LAW.

"We can recommend the book to the practitioner, because it is an intelligent construction, and not a mere string of head-notes. It will be a useful book, and is well got up and printed in a large clear type."—*SOLICITORS' JOURNAL.*

"It is a good and very sensible and readable book to the practical and common sense English and American lawyer. It takes up a difficult subject, begins at the very beginning, tracing the decisions in the order of time, and showing how they gradually extended a principle here, then another there, until finally a system is built up, somewhat incoherent, but good enough for all practical purposes, and enabling the lawyer, to use our author's words, 'to advise upon Modern Cases.' We have read it with much zest, and greatly admire it. . . . We can recommend it as being an exhaustive compilation."—*The Southern Law Review.*

"Mr. Brown seems admirably adapted to the

task of writing on the law of fixtures. He is strongly convinced of the influence of history upon law. In his opening sentence he tells us that 'it has been said of history that it finds its entablature in law; it may conversely be said of law that it finds its explanation in history.' The sentence is a good opening upon a subject which owes so much of its law to arbitrary rules rather than general principles as fixtures. . . . Mr. Brown's seventh and last chapter will be found to contain a most serviceable enumeration of the recent cases, arranged according as the conflict was between landlord and tenant, mortgagor and mortgagee, and so on."—*Law Journal.*

In one thick volume, 8vo., 1869, price 32s., cloth,

## THE LAW OF RAILWAY COMPANIES.

Comprising the Companies Clauses, the Lands Clauses, the Railways Clauses Consolidation Acts, the Railway Companies Act, 1867, and the Regulation of Railways Act, 1868; with Notes of Cases on all the Sections, brought down to the end of the year 1868; together with an Appendix giving all the other material Acts relating to Railways, and the Standing Orders of the Houses of Lords and Commons; and a copious Index. By HENRY GODEFROI, of Lincoln's Inn, and JOHN SHORTR, of the Middle Temple, Barristers-at-Law.

"The title of this book is the best possible explanation of its contents. Here we have all the statutes affecting Railway Companies, with the standing orders of Parliament, in a volume exquisitely printed, and of most convenient size and form. We have also, what in effect to the practitioner is a complete manual of reference of all the decided cases on Railway Law, together with an index of so copious and accurate a nature, as to render the discovery of every section and every authority easy in the highest degree. . . . We find pages of authorities on 'transfer of shares,' 'calls,' 'forfeiture of shares,' 'sci. fa.,' 'Lloyd's bonds,' 'contracts by companies,' and 'dividends.' Then

comes a mass of matter relating to the voluntary and compulsory acquisition of lands by Railway Companies, while the 'compensation' cases stretch over some fifty pages. So also under the third statute, there are a dozen pages on the powers and duties of Railway Companies in the construction of their works, while the liability of the Companies as carriers of passengers and goods is also elucidated in the most elaborate style. The 'Rating of Railways' adds several pages of authorities. . . . We believe that we have said enough to show that this book will prove to be of pre-eminent value to practitioners, both before Parliamentary committees and in the Courts of Law and Equity."—*Law Journal*.

In 8vo., price 2s. 6d.,

## MORIARTY ON PERSONATION AND DISPUTED IDENTITY AND THEIR TESTS.

In a handy volume, crown 8vo., 1870, price 10s. 6d., cloth,

## THE LAW OF SALVAGE,

As administered in the High Court of Admiralty and the County Courts; with the Principal Authorities, English and American, brought down to the present time; and an Appendix, containing Statutes, Forms, Table of Fees, etc. By EDWYN JONES, of Gray's Inn, Barrister-at-Law.

"This book will be of infinite service to lawyers practising in the maritime law courts and to those engaged in shipping. In short, Mr. Jones's book is a complete guide, and is full of information upon all phases of the subject, tersely and clearly written. It will be quite as useful to, as it is as much needed by, the American lawyer as the English, because the salvage laws of America and England are much alike, and Mr. Jones makes constant reference to American authorities. The book is all the more welcome because the subject upon which it treats is but little understood except by a favoured few. Now, however, if interested people remain ignorant it is their own fault. Mr. Jones has treated a very complicated and difficult subject in a simple and concise manner, and his success is commensurate with

his simplicity of style."—*Liverpool Journal of Commerce*.

"An admirable treatise on an important branch of jurisprudence is compiled by Mr. Edwyn Jones, of Gray's Inn, Barrister-at-Law, who, in a compact volume, gives us a very comprehensive statement of 'The Law of Salvage,' as administered in the High Court of Admiralty and the County Courts; with the principal authorities, English and American, brought down to the present time, and an Appendix containing statutes, forms, tables of fees, &c. Mr. Jones has consulted a wide range of cases, and systematised with much skill and clearness the leading principles deducible from numerous judgments and precedents, both here and in the United States. His work is likely to become a text-book on the law in question."—*Daily News*.

In 8vo., 1867, price 1s., sewed,

## LLOYD'S BONDS; THEIR NATURE AND USES.

By HENRY JEFFERD TARRANT, of the Middle Temple, Barrister-at-Law.

In 8vo., 1870, price 7s. 6d., cloth,

## THE HISTORY OF THE LAW OF TENURES OF LAND IN ENGLAND AND IRELAND.

By W. F. FINLASON, of the Middle Temple, Barrister-at-Law.

"Mr. W. F. Finlason has done good service in publishing a concise, well-written history of the law of tenures of land in England and Ireland, with particular reference to inheritable tenancy, leasehold tenure, tenancy at will, and tenant right.

Confining himself to the facts of legal history, he has collected and presented, in an admirably compact form, all the really useful information it contains."—*Ob. Rev.*

This day is published, Second Edition, in 8vo., 1875, price 26s., cloth,  
**THE LAW AND PRACTICE UNDER THE COMPANIES ACTS,**  
 1862, 1867, 1870;

**THE LIFE ASSURANCE COMPANIES ACTS,**  
 1870, 1871, 1872;

**AND OTHER ACTS RELATING TO JOINT STOCK COMPANIES,**  
 Together with Rules, Orders, and Forms, &c. &c. By H. BURTON BUCKLEY, M.A., of  
 Lincoln's Inn, Barrister-at-Law, and Fellow of Christ's College, Cambridge.

\* \* *In the preparation of the Second Edition the Reports have been carefully re-searched, and numerous authorities added. Table A. of The Companies Act, 1862, is now printed with Notes, in which many points not touched upon in the First Edition are discussed. The authorities, including those in the Albert and European Arbitrations, are brought down to the date of publication.*

### A TREATISE ON THE STATUTES OF ELIZABETH AGAINST FRAUDULENT CONVEYANCES,

*The Bills of Sale Registration Acts, and the Law of Voluntary  
 Dispositions of Property generally.*

By H. W. MAY, B.A. (Ch. Ch. Oxford), and of Lincoln's Inn, Barrister-at-Law.

"This treatise has not been published before it was wanted. The statutes of Elizabeth against fraudulent conveyances have now been in force for more than three hundred years. The decisions under them are legion in number, and not at all times consistent with each other. An attempt to reduce the mass of decisions into something like shape, and the exposition of legal principles involved in the decisions, under any circumstances, must have been a work of great labour, and we are pleased to observe that in the book before us there has been a combination of unusual labour with considerable professional skill. . . . We cannot conclude our notice of this work without saying that it reflects great credit on the publishers as well as the author. The facilities afforded by Messrs. Stevens and Haynes for the publication of treatises by rising men in our profession are deserving of all praise. We feel assured that they do not lightly lend their aid to works presented for publication, and that in consequence publication by such a firm is to some extent a guarantee of the value of the work published."—*Canada Law Journal*.

"Examining Mr. May's book, we find it constructed with an intelligence and precision which render it entirely worthy of being accepted as a guide in this confessedly difficult subject. The subject is an involved one, but with clean and clear handling it is here presented as clearly as it could be. . . . On the whole, he has produced a very useful book of an exceptionally scientific character."—*Solicitors' Journal*.

"The subject and the work are both very good. The former is well chosen, new, and interesting; the latter has the quality which always distinguishes original research from borrowed labours."—*American Law Review*.

"We are happy to welcome his (Mr. May's) work as an addition to the, we regret to say, brief catalogue of law books conscientiously executed. We can corroborate his own description of his labours, 'that no pains have been spared to make the book as concise and practical as possible, without doing so at the expense of perspicuity, or by the omission of any important points.'"—*Law Times*.

Now ready, in two volumes, royal 8vo., cloth lettered, price 70s.,

# THE LAW

RELATING TO

## SHIPMASTERS AND SEAMEN.

*THEIR APPOINTMENT, DUTIES, POWERS, RIGHTS,  
LIABILITIES AND REMEDIES.*

By JOSEPH KAY, Esq., M.A., Q.C.,

OF TRIN. COLL. CAMBRIDGE, AND OF THE NORTHERN CIRCUIT;  
SOLICITOR-GENERAL OF THE COUNTY PALATINE OF DURHAM; ONE OF THE JUDGES OF THE COURT OF  
RECORD FOR THE HUNDRED OF SALFORD;  
AND AUTHOR OF "THE SOCIAL CONDITION AND EDUCATION OF THE PEOPLE  
IN ENGLAND AND EUROPE."

### ANALYSIS OF CONTENTS.

#### Part I.—THE PUBLIC AUTHORITIES.

Chap. I. The Board of Trade: its General Functions with reference to Masters and Seamen. II. Local Marine Boards. III. Mercantile Marine Offices. IV. Naval Courts.

#### Part II.—THE APPOINTMENT, CERTIFICATES, &c., OF THE MASTER.

Chap. I. Who may appoint or succeed him, and how long his authority continues. II. His Qualifications. III. His Examination and Certificates. IV. In what cases Colonial Certificates are valid. V. His Remuneration. VI. Who may remove him, or cancel or suspend his Certificate. VII. His Offences. VIII. Legal Procedure for infliction of Penalties, &c.

#### Part III.—DUTIES AND RESPONSIBILITIES OF THE MASTER.

Chap. I. The Master's general duties and authorities on the Voyage. II. His duty to see that the Ship is seaworthy. III. His duties with respect to receiving, stowing, and taking care of the Cargo. IV. His duty in the preparation of the Ship for sea. V. His duties when the Ship has to proceed to a Foreign Port and load there. VI. His duty to obtain the necessary Clearances, &c. VII. What Documents he must procure and keep. VIII. His duty to carry proper Colours. IX. His duties after all is ready to Sail. X. When he is bound to set Sail on the Voyage. XI. When he must sail with Convoy. XII. His duty not to deviate.

XIII. His duty not to delay. XIV. What circumstances justify or excuse a delay or a deviation. XV. His duty not to commit Barratry. XVI. His duties in case of a Collision. XVII. His duties to the Underwriters on abandonment. XVIII. His duties in a Port of Discharge. XIX. His duties to the authorities of the Harbour. XX. The Master's Protests.

#### Part IV.—THE MASTER'S DUTIES AND POWERS WITH RESPECT TO THE CARGO.

Chap. I. Generally. II. His duties with respect to receiving, stowing, and taking care of the Cargo. III. When he may Hypothecate the Cargo. IV. When he may Sell it. V. When he should Tranship it. VI. Freight. VII. His lien on the Cargo. VIII. His duties with reference to Delivery.

#### Part V.—BILLS OF LADING.

Chap. I. What a Bill of Lading is, and its form. II. When Master may sign Bills of Lading. III. The effect of the Bill of Lading as evidence. IV. When and how the Bill of Lading may be Transferred. V. The effect of the Transfer of the Bill of Lading upon the PROPERTY in the goods named in the Bill. VI. The effect of the Transfer of the Bill of Lading upon the CONTRACT contained in the Bill of Lading. VII. The effect of the Bill of Lading upon the liabilities of Owners, Master and Charterers. VIII. The Master's duties as to delivery of the Goods. IX. The meaning of the exceptions in the Bill of Lading.

For Reviews of the Work, see *post*.

# THE LAW RELATING TO SHIPMASTERS AND SEAMEN.

## ANALYSIS OF CONTENTS—*continued.*

### Part VI.—STOPPAGE IN TRANSITU.

Chap. I. What it is. II. Who may exercise the right. III. Under what circumstances the Consignor is entitled to exercise the right. IV. In what manner the right may be exercised. V. How long the transit and the right to stop continue. VI. How the right to stop may be defeated. VII. Master's duties as to delivery. VIII. The effect of the exercise of this right on the Contract of Sale.

### Part VII.—WHEN THE MASTER MAY MAKE THE OWNERS LIABLE UPON HIS PERSONAL CONTRACTS.

Chap. I. When he may bind them in Contracts relating to the usual course of the Ship's employment. II. When he may bind them for matters which are necessary for the prosecution of the voyage. III. What Owners are made liable by the Master's Contracts. IV. When the Master may sell the Ship.

### Part VIII.—HYPOTHECATION.

Chap. I. The form, contents, and nature of the Contract. II. Under what circumstances the Master may Hypothecate the Ship. III. The legal effect and operation of the Contract. IV. Under what circumstances the Master may Hypothecate the Freight. V. Under what circumstances the Master may Hypothecate the Cargo.

### Part IX.—THE CREW.

Chap. I. Interpretation of Terms. II. Seamen, how protected and regarded by the Courts. III. The duties of the Crew. IV. As to Apprentices. V. The engagement of Seamen. VI. Allotment of Wages. VII. Discharge and Payment of Wages. VIII. Remittance of Wages and Savings Bank for Seamen. IX. Legal rights to Wages. X. Mode of recovering Wages and Seamen's lien. XI. Relief to Seamen's Families out of Poor Rates. XII. Wages and Effects of deceased Seamen. XIII. Leaving Seamen abroad. XIV. Volunteering into the Navy. XV. Provisions, Health, and Accommodation. XVI. Power of making Complaint, and protection of Seamen from Imposition. XVII. Discipline, and forfeiture of Wages. XVIII. Legal Procedure.

### Part X.—PILOTS.

Chap. I. Origin of Pilots. II. Definition of Terms used by and application of Sections of Merchant Shipping Act relating to Pilots. III. Pilotage authority. IV. Licensing of Masters and Mates. V. Pilot Boats and Pilot Licenses. VI. What signals must be used and displayed when a Pilot is wanted. VII. When it is the Master's duty, in respect of the Statute, to employ a Pilot, and the consequences of his not doing so. VIII. Compulsory Pilotage. IX. The Master's duties and authority while the Pilot is in charge of the Ship. X. The

authority of the Pilot while the Ship is under his care. XI. The Limitation of the Liability of Owners and Master where Pilotage is compulsory. XII. Rights, Privileges, and Remuneration of Pilots. XIII. Offences of Pilots. XIV. The Trinity House. XV. When Pilots may claim Salvage.

### Part XI.—PASSENGERS.

Chap. I. The Master's authority over the Passengers. II. The Master's duties to the Passengers irrespective of the Statutes. III. The Rights and Liabilities of Passengers under their contract irrespective of the Statutes. IV. The Statutable Provisions for the Protection of the Passengers. V. Penalties on Drunken or Disorderly Passengers on a Passenger Steamer.

### Part XII.—COLLISIONS.

Chap. I. Liability of Masters and Owners for Damage by Collision. II. Rights of the Parties in a Court of Common Law when both Ships have been in Fault. III. If the Collision was the consequence of unavoidable Accident, neither party can recover either in a Court of Law or the Court of Admiralty. IV. What Remedy Owners of Injured Ship have in the Court of Admiralty. V. The Law relating to Sailing Ships, Steam Ships, and Lights, prior to 25 & 26 Vict. c. 63. VI. The Statutable Provisions and Regulations now in Force for preventing Collisions at Sea, with Diagrams. VII. The Cases decided upon the Regulations. VIII. Duties of Master in case of Collision.

### Part XIII.—SALVAGE.

Chap. I. What Salvage Services are, and when they should be rendered. II. When Salvage Reward is payable. III. Who *may claim* as Salvors. IV. What claim Salvors have when there are several sets. V. What Amount will be awarded to Salvors. VI. The Apportionment of the Salvage. VII. What conduct forfeits the whole or part of the Salvage. VIII. What remedies the Salvors have for securing the payment of the Salvage. IX. Wrecks and Casualties.

### Part XIV.—THE MASTER'S REMEDIES.

Chap. I. The Master's remedies before "The Merchant Shipping Act, 1854." II. The Suitable Provisions as to his remedies. III. The Master's remedies since "The Merchant Shipping Act, 1854," and "The Admiralty Court Act, 1861." IV. When the Master may sue in his own name. V. When the Master may sue the Owners.

### Part XV.—THE MASTER'S LIABILITIES.

Chap. I. Liability of Master on Contracts entered into for the Owners. II. Liability of the Masters for Wrongs. III. Liability of Master under the Customs Acts.

APPENDIX. Forms, Rules, Regulations, &c.

For Reviews of the Work, see next page.

# THE LAW RELATING TO SHIPMASTERS AND SEAMEN.

## REVIEWS OF THE WORK.

From the NAUTICAL MAGAZINE, July, 1875.

"The law-books of the present day are mostly of two classes: the one written for lawyers, and only to be understood by them; the other intended for the use of non-professional readers, and generally in the form of handy books. The first, in the majority of cases, is of some benefit, if looked upon merely as a compilation containing the most recent decisions on the subject; whilst the second only aims, and not always with success, at popularising some particular branch of legal knowledge by the avoidance of technical phraseology.

"It is rarely that we find a book fulfilling the requirements of both classes; full and precise enough for the lawyer, and at the same time intelligible to the non-legal understanding. *Yet the two volumes by Mr. Kay on the law relating to shipmasters and seamen will, we venture to say, be of equal service to the captain, the lawyer, and the Consul, in their respective capacities, and even of interest to the public generally, written as it is in a clear and interesting style, and treating of a subject of such vast importance as the rights and liabilities and relative duties of all, passengers included, who venture upon the ocean; more than that, we think that any able-seaman might read that chapter on the crew with the certainty of acquiring a clearer notion of his own position on board ship.*

"Taking the whole British Empire, the tonnage of sailing and steam vessels registered in the year 1873 was, we learn in the preface, no less than 7,294,230, the number of vessels being 36,825, with crews estimated, inclusive of masters, at 330,849; but the growth of our mercantile fleet to such gigantic proportions is scarcely attributable to any peculiar attention on the part of the Legislature to its safety and welfare, for, as Mr. Kay justly says, 'it is remarkable that in England, the greatest maritime State the world has ever seen, no proper precautions were taken before the year 1850 to protect the public from the appointment of ignorant and untrustworthy men to these important posts'—the command of vessels, 'in which property and life are committed to them under circumstances which necessarily confer almost absolute power and at the same time preclude for long periods the possibility of any supervision.' The French, he tells us, had an ordinance as early as the year 1584, requiring the master to be examined touching his experience, fitness, and capacity. But in England the indifference on this subject was more apparent than real; it arose, we believe, out of the dislike of interference with personal concerns and private enterprise which is so strongly marked in our national character, nor must we forget that some of the most glorious achievements in our nautical annals have been accomplished by men not strictly trained to the sea, and this fact, no doubt, contributed to the reluctance manifested by the Legislature to apply the principles of paternal government to the protection of our seamen; for the going and coming of hundreds of thousands over the ocean for the purposes of business or pleasure had then but

lately commenced; and, moreover, probably it was feared that too much care for the welfare of our seamen would have the effect of diminishing the hardihood, self-reliance, and daring which had up to that time made them the envy of the world.

"In 1854 the Merchant Shipping Act was passed, repealing the Act of 1850. Under its provisions the Board of Trade received its present extensive authority over merchant ships and seamen, Local Marine Boards were constituted for the examination of masters and mates of foreign-going and home passenger ships, Mercantile Marine officers established for the registration of seamen, and Naval Courts for the investigation of complaints against masters, and other matters. Without doubt the result of this system of compulsory examination has been beneficial, and the master may also possess those other qualifications which cannot be subjected to examination. But it is not enough now-a-days that he should be honest, skilful, courageous, and firm; he must also, if he would steer clear of rocks other than those marked on the chart, be something of a lawyer. This, it might seem, would apply equally to all men having the conduct of important interests, and coming into contact with large numbers of men, but to no one else is so large a discretionary power granted, and the very fact that his use of it is not very severely scrutinised, only adds to the caution with which it should be exercised. And then there are many incongruities in his position. He may have a share in a ship, and yet he is but the agent of the other owners; though, if he has no share, and in a case of necessity hypothecate the ship, he also binds himself in a penalty to repay the sum borrowed. We can make no charge of redundancy or omission against our author; but if we were called upon to select any one out of the fifteen parts into which the two volumes are divided as being especially valuable, we should not hesitate to choose that numbered three, and entitled 'The Voyage.' There the master will find a succinct and compendious statement of the law respecting his duties, general and particular, with regard to the ship and its freight from the moment when, on taking command, he is bound to look to the seaworthiness of the ship, and to the delivery of her log at the final port of destination. In Part IV. his duties are considered with respect to the cargo, this being a distinct side of his duplicate character, inasmuch as he is agent of the owner of the cargo just as much as the owner of the ship.

"Next in order of position come 'Bills of Lading' and 'Stoppage in Transitu.' We confess that on first perusal we were somewhat surprised to find the subject of the delivery of goods by the master given priority over that of bills of lading; the logical sequence, however, of these matters was evidently sacrificed, and we think with advantage to the author's desire for unity in his above-mentioned chapters on 'The Voyage.' That this is so is evidenced by the fact that after his seventh chapter

# THE LAW RELATING TO SHIPMASTERS AND SEAMEN.

## REVIEWS OF THE WORK—*continued.*

on the latter subject he has left a blank chapter with the heading of the former and a reference *ante*. 'The power of the master to bind the owner by his personal contracts,' 'Hypothecation,' and 'The Crew,' form the remainder of the contents of the first volume, of which we should be glad to have made more mention, but it is obviously impossible to criticize in detail a work in which the bare list of cited cases occupies forty-four pages.

"The question of compulsory pilotage is full of difficulties, which are well summed up by Mr. Kay in his note to page 763:—"In the United States no ship is bound to take on board a pilot either going in or coming out of the harbour, but if a pilot offers and is ready, the ship must pay pilotage fees whether he is taken on board or not." Ships do not exist for pilots, but pilots for ships, so that this option in the use of the pilot, and obligation in the matter of fees, appears to us to be exactly that solution of the difficulty which should not have been arrived at; and, moreover, it is open to the first objection urged by Mr. Kay against the compulsory system of pilotage, which is, that it obliges many ships which do not require pilots to pay for keeping up a staff for those who do. Seven other cogent reasons, for which we must refer the reader to the book itself, though most of them, indeed, will instantly present themselves to the minds of sailors without even an effort of memory, are noted. Section 338 of the Merchant Shipping Act provides that no owner or master of any ship shall be answerable to any person whatever for any loss or damage occasioned by the fault or incapacity of any qualified pilot acting in charge of such ship within any district where the employment of a pilot is compulsory by law. If he interferes to correct the pilot in the handling of a ship, with the peculiarities of which the latter cannot generally be acquainted, he may render himself and the owners liable in case of accident, and so a premium is offered to his indifference, proof being always required that the damage was occasioned solely by the pilot's neglect or fault, to entitle the owners to the benefit of this section. The decision in the case of the *General de Caen* well illustrates some of the difficulties surrounding the subject. She was a French ship upon the Thames, where the employment of a pilot is compulsory, and she, therefore, took on board a pilot as well as a waterman to take the wheel in consequence of none of the crew being able to understand English. The waterman put her helm up instead of luffing as the pilot ordered, whereby a barge was run into and damaged. The French owner claimed under Section 389 of 17 and 18 Vic., c. 104. It was held that the pilot was not answerable for the waterman's incapacity or fault; that the pilot gave the proper orders; that it would be contrary to justice to say that the pilot was solely liable for the collision; that the waterman was the servant of the owners, and that they, therefore, were liable. The real question at issue seems to have been whether the English pilot ought to have spoken French or the French ship to have had on board a helmsman who could understand English, and the corollary, when the decision had been given in favour of the former, that the Govern-

ment officer, when engaging the helmsman, was acting merely as the agent of the French owners.

"The master has a large authority over the passengers on board his ship, equal in cases of great emergency to that which he possesses over the crew. Lord Ellenborough has decided—it will comfort intending travellers by sea to hear, especially if this country should again become involved in a war with a nation which, unlike Ashanti and Abyssinia, possesses a navy—that a master exceeded the limits of his authority in placing a passenger who refused to fight on the poop, though willing to do so elsewhere, in irons all night on that particular part of the ship to which he had objected.

"It is for the interest and security of commerce and navigation that it should be generally known that the amount of service rendered is not the only or proper test by which the amount of salvage reward is estimated, but the Court will grant to successful salvage an amount which much exceeds a mere remuneration for work and labour in order that the salvors should be encouraged to run the risk of such enterprises and go promptly to the succour of lives or vessels in distress, though they must take care that they do not by their subsequent conduct forfeit their claims to such reward.

"That it should be necessary to entice men by money to save the lives of their fellow-creatures is not a matter for congratulation; still it was no doubt to some extent anomalous that formerly, whilst large proportionate sums were paid for the recovery of property, for the rescuing of human life unless associated with property, no salvage reward could be recovered. But by Section 458 of the Merchant Shipping Act the preservation of human life is made a distinct ground of salvage reward, with priority over all other claims for salvage where the property is insufficient, and if the value of the property is not adequate to the payment of the claim for life-salvage alone, the Board of Trade is empowered to award to the salvors such sum as it deems fit, either in part or whole satisfaction.

"There is, perhaps, no species of service liable to a greater variety of circumstances under which it can be performed than salvage. Consequently we cannot be surprised that questions of this kind frequently come before the Courts, and that the number of decided cases is very large; but Mr. Kay has succeeded in an admirable way in extracting the main points connected with each case, and in presenting them in as few words as possible. Of course fuller information may sometimes be required, but the reader will then know where to find it.

"In conclusion, we can heartily congratulate Mr. Kay upon his success. His work everywhere bears traces of a solicitude to avoid anything like an obtrusive display of his own powers at the expense of the solid matter pertaining to the subject, whilst those observations which he permits himself to make are always of importance and to the point; and in face of the legislation which must soon take place, whether beneficially or otherwise, we think his book, looking at it in other than a professional light, could scarcely have made its appearance at a more opportune moment."

# THE LAW RELATING TO SHIPMASTERS AND SEAMEN.

## REVIEWS OF THE WORK—*continued.*

### From the LIVERPOOL JOURNAL OF COMMERCE.

“The Law relating to Shipmasters and Seamen—such is the title of a voluminous and important work which has just been issued by Messrs. Stevens and Haynes, the eminent law publishers, of London. The author is Mr. Joseph Kay, Q.C., and while treating generally of the law relating to shipmasters and seamen, he refers more particularly to their appointment, duties, rights, liabilities, and remedies. It consists of two large volumes, the text occupying nearly twelve hundred pages, and the value of the work being enhanced by copious appendices and index, and by the quotation of a mass of authorities. . . . In a short note of dedication Mr. Kay observes that he had been engaged on it for the last ten years. The result of this assiduity and care has been the production of a standard work on the subject to which it relates. . . . As to the value of the work itself, it can hardly be properly treated of in limited space. It is divided into fifteen parts

which have reference to the public authorities having control in shipping matters, the appointment, certificates, &c., of the master, his duties on the voyage, his duties and powers with respect to the cargo, bills of lading, stoppage *in transitu*, personal contracts binding the shipowner, hypothecation, the crew, pilots, passengers, collisions, salvage, the master's remedies and his liabilities. From this range of topics it will be seen that *the work must be an invaluable one to the shipowner, shipmaster, or consul at a foreign port.* The language is clear and simple, while the legal standing of the author is a sufficient guarantee that he writes with the requisite authority, and that the cases quoted by him are decisive as regards the points on which he touches. The work is excellently ‘got up,’ and its appearance is quite consistent with its standard character as a treatise on the law relating to shipmasters and seamen.”

### From the BOSTON (U. S.) JOURNAL OF COMMERCE.

“Of volumes with such a magnitude of pages, filled with abstruse matter, made plain and clear, we have only room to give the heads of the Analysis of Contents, without alluding to the various branches. They are laid out in fifteen parts, viz.: The Public Authorities; Appointment, Certificates, &c. of the Master; the Voyage; Master's Duties and Powers with respect to Cargo; Bills of Lading; Stoppage in Transitu; When the Master may bind the Shipowner by his Personal Contract; Hypothecation; the Crew; Pilots; Passengers; Collisions; Salvage; the Master's Remedies and his Liabilities. Then follow the appendices, thirty-four in number, which contain a great deal of maritime law information, as also the ‘Index to Cases,’ and here the immense labour of the compiler is seen in its fullest and most distinct sense. The index of

cases decided in Courts of Final Appeal, relating to maritime disputes, enumerated in lines alphabetically, makes forty-two long pages. These are necessarily brief in abstract, but they are *really of interest to all shippers and consignees, to masters, owners, and seamen, to underwriters, and to the assured.* It would seem hardly possible that so much valuable and really interesting information could be thrown into so confined a space.

“In the abstracts of law cases the decisions of the Supreme Court of the United States are referred to very frequently, as precedents in maritime law, and we note, under the head of ‘The Master's Duties to the Passengers, irrespective of the statutes,’ that the decisions of our courts are oftentimes mentioned.”

### From the LAW JOURNAL.

“The author tells us that for ten years he has been engaged upon it. . . . Two large volumes containing 1181 pages of text, 81 pages of appendices, 98 pages of index, and upwards of 1800 cited cases, attest the magnitude of the work designed and accomplished by Mr. Kay.

“The total merchant shipping of the United Kingdom consisted in 1873 of 21,581 vessels of 5,748,097 tons, manned by 202,239 seamen; and the total merchant shipping of the whole British Empire consisted of 36,825 vessels of 7,294,230 tons, manned by 330,849 seamen. Mr. Kay justly observes upon these figures: ‘For such a vast mercantile fleet, one would have thought that every thing would have been done to render the law affecting such a vital part of our Imperial Empire as clear, as simple, and as easily to be inquired into and understood, as was possible.’ Unfortunately, everyone knows that the exact contrary is the case, and that, confused as is the condition of almost every department of English jurisprudence, no one department is in a more hopeless and chaotic state

than that which embraces the merchant-shipping laws and regulations. Mr. Kay tells us that these laws are to be discovered by researches into ‘thirty-five statutes, seventeen orders in council, great numbers of instructions of the Board of Trade; great numbers of bye-laws and regulations of the Trinity House and of the different ports; and great numbers of cases decided on numberless points in the various courts.’ Now, in default of a code setting forth in a clear and comprehensive manner the law contained in this *rudis indigestaque moles*, and until such a code is formed, the only anchor of salvation to mariners and lawyers alike is some one or more treatises on which reliance can be placed. Mr. Kay says that he has ‘endeavoured to compile a guide and reference book for masters, ship agents, and consuls.’ He has been so modest as not to add lawyers to the list of his pupils; but *his work will, we think, be welcomed by lawyers who have to do with shipping transactions, almost as cordially as it undoubtedly will be by those who occupy their business in the great waters.*

# THE LAW RELATING TO SHIPMASTERS AND SEAMEN.

## REVIEWS OF THE WORK—*continued.*

"We must not be understood as intimating that all and every part of this work has a legal interest. Much of it concerns only the practical life of the master and crew. But there are many chapters to which members of both branches of the profession, and especially solicitors residing at the great ports, will turn with gratitude to the author in moments of difficulty. For example, Part IV. is on the master's duties and powers with respect to the cargo, and deals with hypothecation, freight, lien, and delivery. Part V. contains an exhaustive treatise on bills of lading, with special reference to the effect of the transfer of the bill of lading upon the property named in the bill. Part VI. explains fully the right of stoppage *in transitu*, and Part VII. teaches when the master may bind the shipowner by the master's personal acts. So again Part XIII. deals with the principles of salvage, and the nature and reward of salvage services. The great bulk of the book, however, is devoted to the consideration of the rights, duties, and obligations of the master and of the crew. After explaining the powers and prerogatives of the several public authorities to whose control mariners are subject, the author proceeds to the appointment, certificates, &c. of the master, his general duties and authorities on the voyage towards the shipowner, the charterer, the underwriter, and the harbour master. Next are

considered the duties and powers of the master with respect to the cargo, his power to bind the shipowner by contracts either for necessary supplies or for absolute sale of the ship, and his power of hypothecation. Having so considered the position of the master, the author next deals with the crew, their engagement, wages, legal rights to wages, and modes of recovery; their discipline, and the legislation for their protection in life, limb, and pocket. Pilots and pilotage are then considered at great length; and then we have a survey of the rights and liabilities of passengers, and the statutable provisions for their protection. Collisions, salvage, the master's personal remedies and liabilities, complete the list of subjects. The appendices contain an immense variety of forms, tables, scales, &c., embracing fees, medicines, boats, protests, bottomry, and *respondentia* bonds, orders in council, instructions to emigration officers, lights, bye-laws as to pilots, remuneration of receivers, and other matters and things too numerous for detail.

"The volumes are well printed, with wide margins, and present a smart appearance both in cover and page; and, while they will find their way to the cabins of the masters of all big passenger steamers and merchantmen, they will, we believe, also adorn the shelves of many lawyers."

### From the MANCHESTER EXAMINER.

"In a brief notice no idea could be given of the importance, or even the extent, of the details referred to in Mr. Kay's book, and a catalogue of the contents would constitute a small pamphlet. There are also in the course of the treatise interesting historical references, and the duties and responsibilities of passengers are not overlooked. Speaking generally of the law of shipping, as defined and described in the book before us, we may say that the seaman has a Magna Charta of his own. The rights of the owner, of the ship's officers, and of the sailors are all clearly recognised on the statute book, and the penalty for the infringement is in every case specified. We read of the precautions for the safety of life and property exacted by the authorities, and of the conditions which must be fulfilled before a vessel is pronounced seaworthy; yet we learn with amazement that before 1850 no proper precautions were taken in England to protect the public from

the appointment of ignorant and untrustworthy men as masters of ships. In illustration of the various branches of his subject Mr. Kay refers to more than a thousand cases. The appendices also contain a considerable amount of valuable information, and the index is so complete that it indirectly serves the additional purpose of a glossary. In his preface Mr. Kay modestly hopes that his book 'may prove to be a useful book of reference for intelligent masters and for ship agents and consuls in foreign ports on matters relating to shipmasters and seamen.' That it will prove useful to them we have no doubt whatever, and that it will be gratefully accepted as a boon by many others we are equally sure. Directly or indirectly, it cannot but prove an important work of reference to all who are engaged in the shipping trade, and Mr. Kay deserves the thanks of the commercial as well as of the shipping community for having so successfully carried out his arduous task."

Just published, in one volume, 8vo., price 25s., cloth,

## AN ESSAY

ON

# THE RIGHTS OF THE CROWN

AND THE

PRIVILEGES OF THE SUBJECT

## In the Sea Shores of the Realm.

By ROBERT GREAM HALL, of Lincoln's Inn, Barrister-at-Law. Second Edition. Revised and corrected, together with extensive Annotations, and references to the later Authorities in England, Scotland, Ireland, and the United States. By RICHARD LOVELAND LOVELAND, of the Inner Temple, Barrister-at-Law.

"This is an interesting and valuable book. It treats of one of those obscure branches of the law which there is no great inducement for a legal writer to take up. Questions of foreshore, when they arise, are sure to have a great deal of law in them; but they are few and far between, and Mr. Loveland can scarcely expect his book to obtain the demand it deserves in this country, although we hope that the well-known *penchant* of American lawyers for subjects with a flavour of legal antiquity will give the publishers a market on the other side of the Atlantic. Mr. Hall, whose first edition was issued in 1830, was a writer of considerable power and method. Mr. Loveland's editing reflects the valuable qualities of the 'Essay' itself. He has done his work without pretension, but in a solid and efficient manner. The 'Summary of Contents' gives an admirable epitome of the chief points discussed in the 'Essay,' and indeed, in some twenty propositions, supplies a useful outline of the whole law. Recent cases are noted at the foot of each page with great care and accuracy, while an Appendix contains much valuable matter; including Lord Hale's treatise *De Jure Maris*, about which there has been so much controversy, and Serjeant Merewether's learned argument on the rights in the river Thames. The book will, we think, take its place as the modern authority on the subject."—*Law Journal*.

"The essay of which this is a reproduction was first published in 1830, and Mr. Loveland has simply supplied annotations and appended Lord Chief Justice Hale's 'De Jure Maris,' the case of *Dickens v. Shaw*, the speech of Serjeant Mere-

wether in the case of the *Attorney-General v. The Mayor and Corporation of London*, and forms in use by the Board of Trade. Thus we have a very useful compendium upon a branch of law which for a long time has been and still is in a very unsettled state.

"The treatise, as originally published, was one of considerable value, and has ever since been quoted as a standard authority. But as time passed, and cases accumulated, its value diminished, as it was necessary to supplement it so largely by reference to cases since decided. A tempting opportunity was, therefore, offered to an intelligent editor to supply this defect in the work, and Mr. Loveland has seized it, and proved his capacity in a very marked manner. As very good specimens of annotation, showing clear judgment in selection, we may refer to the subject of alluvion at page 109, and the rights of fishery at page 50. At the latter place he begins his notes by stating under what expressions a 'several fishery' has been held to pass, proceeding subsequently to the evidence which is sufficient to support a claim to ownership of a fishery. The important question under what circumstances property can be acquired in the soil between high and low water mark is lucidly discussed at page 77, whilst at page 81 we find a pregnant note on the property of a grantee of wreck in goods stranded within his liberty.

"We think we can promise Mr. Loveland the reward for which alone he says he looks—that this edition of Hall's Essay will prove a most decided assistance to those engaged in cases relating to the foreshores of the country."—*Law Times*.

"The entire book is masterly."—ALBANY LAW JOURNAL.

In 8vo., Second Edition, price 21s., cloth,

# A TREATISE ON THE LAW OF DAMAGES.

COMPRISING THEIR MEASURE,

THE MODE IN WHICH THEY ARE ASSESSED AND REVIEWED,

The Practice of Granting New Trials, and the Law of Set-off,

By JOHN D. MAYNE,

Of the Inner Temple, Barrister-at-Law.

SECOND EDITION,

By LUMLEY SMITH, of the Inner Temple, Barrister-at-Law.

"Few modern text-books have a higher authority than Mayne on Damages. An argument is seldom heard in the courts upon a question of the measure of damages without the work being referred to; and there are several points upon which there was, at the date of the first edition (1856), either an absence or a conflict of authority, and upon which the views advanced by the author have since been held to be law by the courts. . . . It is fortunate for the reputation of the work that so good an editor has been found for it as Mr. Lumley Smith. The additions to the text of the former edition are distinguished by brackets. Mr. Lumley Smith's work has been well done, and the new cases are skilfully incorporated. . . . Probably there is no other one subject upon which the cases reported as well as unreported so frequently present the same difficulty of extracting from complicated statements of fact, special in their character and not likely to occur again, the legal principles involved in the decision, so as to be available for guidance in other cases. It is exactly this difficulty which makes the subject one upon which a good text-book such as the present is peculiarly valuable."—*Solicitors' Journal*.

"We are glad that this useful work fell into the hands of so capable an editor as Mr. Lumley Smith. It is always a great advantage gained when an editor has had practical experience of the subject with which he deals, and it is a positive gain to the law when busy lawyers can find time to do well the work which is so apt to fall into the hands of those who have little learning and less practice. The law relating to damages is a branch of our jurisprudence peculiarly practical in its nature and highly important to suitors and the profession; it is, moreover, surrounded by difficulties which require a clear explanation before they become intelligible to the ordinary mind. . . .

"The concluding chapter (c. 19) is very important, and we should like to make copious extracts from it. It deals with the 'powers of the court or judge in regard to damages.' We recommend it to the attention of our readers, as indeed we do the entire work, which is excellently executed, with an entire freedom from verbosity, and a good index."—*Law Times*.

"In the year 1856 Mr. John D. Mayne, a gentleman of the bar, now enjoying a very extensive practice in the Indian Empire, published a treatise on the Law of Damages. Mr. Mayne conferred a great boon on the profession by his labours, and for sixteen years his book has been regarded with high respect in Westminster Hall. In the ordinary course of things such a lapse of time, from the natural accretion of precedents, would have created a demand for a new edition, but in the particular department of law investigated by Mr. Mayne there has been an extraordinary development of principles, exhibited in numerous cases, upon which the judges have expended a large amount of time, industry, and learning. Consequently, the publication of a new edition is not premature. On the contrary, it was high time that the profession should be supplied with a treatise condensing and arranging the matter brought into existence by the contested cases of that period. It is perfectly intelligible that Mr. Mayne's absence from England and the toil of his professional career have prevented him from undertaking this duty himself. But the performance of it has fallen on a deputy, whose success in the discharge thereof might fairly have been anticipated, and who in the result has, we think, not disappointed the reasonable expectations formed concerning him.

"Mr. Lumley Smith has evidently been actuated by a modest desire not to despoil the original author of well-earned fame. He has, as far as possible, retained the primary form of the book, and has distinguished what Mr. Mayne wrote from what he himself has written, by enclosing all the later matter in brackets, adding a brief separate chapter on the assessment of damages in the Court of Chancery under Lord Cairns's Act, 21 & 22 Vict. c. 27. He has also cited many Scotch and Irish cases, and the leading American decisions of recent date.

"One word with regard to the book itself will not be out of place. It is well printed, in an excellent form, and of a convenient size—no small considerations in a text-book, which, from the nature of its contents, is useful rather for reference than for study. Good looks in a book set off its intrinsic merits, just as an imposing appearance adds to the dignity and influence of a judge."—*Law Journal*.

## MERCANTILE LAW.

In one volume, demy 8vo., 1866, price 10s. 6d., cloth,

## PRINCIPLES OF THE LAW OF STOPPAGE IN TRANSITU, RETENTION, AND DELIVERY.

By JOHN HOUSTON, of the Middle Temple, Barrister-at-Law.

"We have no hesitation in saying, that we think Mr. Houston's book will be a very useful accession to the library of either the merchant or the lawyer."  
—*Solicitors' Journal*.

"We have, indeed, met with few works which so

successfully surmount the difficulties in the way of this arduous undertaking as the one before us; for the language is well chosen, it is exhaustive of the law, and is systematised with great method."  
—*American Law Review*.

A REPORT OF THE CASE OF

## THE QUEEN v. GURNEY AND OTHERS.

In the Court of Queen's Bench before the Lord Chief Justice COCKBURN. With an Introduction, containing a History of the Case, and an Examination of the Cases at Law and Equity applicable to it; or Illustrating THE DOCTRINE OF COMMERCIAL FRAUD. By W. F. FINLASON, Barrister-at-Law.

"It will probably be a very long time before the prosecution of the Overend and Gurney directors is forgotten. It remains as an example, and a legal precedent of considerable value. It involved the immensely important question where innocent misrepresentation ends, and where fraudulent misrepresentation begins.

"All who perused the report of this case in the columns of the *Times*, must have observed the remarkable fulness and accuracy with which that

duty was discharged, and nothing could be more natural than that the reporter should publish a separate report in book form. This has been done, and Mr. Finlason introduces the report by one hundred pages of dissertation on the general law. To this we shall proceed to refer, simply remarking before doing so, that the charge to the jury has been carefully revised by the Lord Chief Justice."  
—*Law Times*.

12mo., 1866, price 10s. 6d., cloth,

## A TREATISE ON THE GAME LAWS OF ENGLAND & WALES:

Including Introduction, Statutes, Explanatory Notes, Cases, and Index. By JOHN LOCKE, M.P., Q.C., Recorder of Brighton. The Fifth Edition, in which are introduced the GAME LAWS of SCOTLAND and IRELAND. By GILMORE EVANS, of the Inner Temple, Barrister-at-Law.

In royal 8vo., 1867, price 10s. 6d., cloth,

## THE PRACTICE OF EQUITY BY WAY OF REVIVOR & SUPPLEMENT.

With Forms of Orders and Appendix of Bills.

By LOFTUS LEIGH PEMBERTON, of the Chancery Registrar's Office.

"Mr. Pemberton has, with great care, brought together and classified all these conflicting cases, and has, as far as may be, deduced principles which

will probably be applied to future cases."  
—*Solicitors' Journal*.

In 8vo., 1873, price 5s., cloth,

## THE LAW OF PRIORITY.

A Concise View of the Law relating to Priority of Incumbrances and of other Rights in Property. By W. G. ROBINSON, M.A., Barrister-at-Law.

"Mr. Robinson's book may be recommended to the advanced student, and will furnish the practi-

tioner with a useful supplement to larger and more complete works."  
—*Solicitors' Journal*.

# ELECTION LAW.

In crown 8vo., 1874, price 14s., cloth lettered,

## A MANUAL OF THE PRACTICE OF PARLIAMENTARY ELECTIONS

*Throughout Great Britain and Ireland.*

COMPRISING

THE DUTIES OF RETURNING OFFICERS AND THEIR DEPUTIES,  
TOWN, CLERKS, AGENTS, POLL-CLERKS, &c.,

AND THE

*Law of Election Expenses, Corrupt Practices, & Illegal Payments.*

WITH

AN APPENDIX OF STATUTES AND AN INDEX.

BY HENRY JEFFREYS BUSHBY, ESQ.,

One of the Metropolitan Police Magistrates, sometime Recorder of Colchester.

FOURTH EDITION,

*Adapted to and embodying the recent changes in the Law, including the Ballot Act, the Instructions to Returning Officers in England and Scotland issued by the Home Office, and the whole of the Statute Law relating to the subject.*

Edited by HENRY HARDCASTLE,

OF THE INNER TEMPLE, BARRISTER-AT-LAW.

"We have just received at a very opportune moment the new edition of this useful work. We need only say that those who have to do with elections will find 'Bushby's Manual' replete with information and trustworthy, and that Mr. Hardcastle has incorporated all the recent changes of the law."—*Law Journal.*

"As far as we can judge, Mr. Hardcastle, who

is known as one of the joint editors of O'Malley and Hardcastle's Election Reports, has done his work well. . . . For practical purposes, as a handy manual, we can recommend the work to returning officers, agents, and candidates; and returning officers cannot do better than distribute this manual freely amongst their subordinates, if they wish them to understand their work."—*Solicitors' Journal.*

A Companion Volume to the above, in crown 8vo., price 8s. cloth, lettered,

## THE LAW AND PRACTICE OF ELECTION PETITIONS,

With an Appendix containing the Parliamentary Elections Act, 1868, the General Rules for the Trial of Election Petitions in England, Scotland, and Ireland, Forms of Petitions, &c. By HENRY HARDCASTLE, of the Inner Temple, Barrister-at-Law.

"Mr. Hardcastle gives us an original treatise with foot notes, and he has evidently taken very considerable pains to make his work a reliable guide. Beginning with the effect of the Election Petitions Act, 1868, he takes his readers step by step through the new procedure. His mode of treating the subject of 'particulars' will be found

extremely useful, and he gives all the law and practice in a very small compass. In an Appendix is supplied the Act and the Rules. We can thoroughly recommend Mr. Hardcastle's book as a concise manual on the law and practice of election petitions."—*Law Times.*

Now ready, Volume I., price 30s.; Volume II., price 24s.;  
and Volume III., Part I., price 5s.

## REPORTS OF THE DECISIONS

OF THE

## JUDGES FOR THE TRIAL OF ELECTION PETITIONS IN ENGLAND AND IRELAND.

PURSUANT TO THE PARLIAMENTARY ELECTIONS ACT, 1868.

BY EDWARD LOUGHLIN O'MALLEY AND HENRY HARDCASTLE,  
BARRISTERS-AT-LAW.

Stevens and Haynes' Series of Reprints of the Early Reporters.

## SOME RARE LAW BOOKS.

[From "THE ALBANY LAW JOURNAL."]

"Law books are not generally things of beauty. There is nothing particularly gratifying to the esthetic department of the human organism in the conventional typography and sheep-skin. Some of our publishers give considerable attention to the mechanical execution of their books, and deserve and receive a good degree of credit therefor. But, after all, their labours seldom please the eye. In most marked contrast to even the very best of our books, are a series of law books that have been recently issued by Messrs. STEVENS & HAYNES, of London. They are reprints of some of the scarcest of the Old English Reports, and in their mechanical execution would delight the heart of Aldus Manutius, Thuanus, or any other admirer of elegant editions. The black letter type of the originals is faithfully reproduced, the curious old-style spelling and interchange of letters have been closely followed, while the rich antique calf covers are, no doubt, superior to anything that served to encase the original Reports. These editions have been carefully prepared, and some of the volumes have been enriched with notes added in MS. to some copy of the original by its learned owner generations ago.

"This enterprise of Messrs. STEVENS & HAYNES is a matter of universal interest, and appeals to every lover of elegant books. The works which they have reproduced are those which were the scarcest, and for copies of which the most exorbitant prices were demanded. The following is a brief description of the matter of these volumes."

### BELLEWE'S CASES, T. RICHARD II.

In 8vo., price 3*l.* 3*s.*, bound in calf antique,

## LES ANS DU ROY RICHARD LE SECOND.

Collect' ensembl' hors les abridgments de Statham, Fitzherbert, et Brooke. Per RICHARD BELLEWE, de Lincolns Inne. 1585. Reprinted from the Original Edition.

"No public library in the world, where English law finds a place, should be without a copy of this edition of Bellewe."—*Canada Law Journal*.

"We have here a *fac-simile* edition of Bellewe, and it is really the most beautiful and admirable reprint that has appeared at any time. It is a perfect gem of antique printing, and forms a most interesting monument of our early legal history. It belongs to the same class of works as the Year-Book of Edward I, and other similar works which have been printed in our own time under the auspices of the Master of the Rolls; but is far superior to any of them, and is in this respect

highly creditable to the spirit and enterprise of private publishers. The work is an important link in our legal history; there are no year books of the reign of Richard II., and Bellewe supplied the only substitute by carefully extracting and collecting all the cases he could find, and he did it in the most convenient form—that of alphabetical arrangement in the order of subjects, so that the work is a digest as well as a book of law reports. It is in fact a collection of cases of the reign of Richard II., arranged according to their subjects in alphabetical order. It is, therefore, one of the most intelligible and interesting legal memorials of the Middle Ages."—*Law Times*.

## CUNNINGHAM'S REPORTS.

In 8vo., price 3*l.* 3*s.*, calf antique,

CUNNINGHAM'S (T.) Reports in K. B., 7 to 10 Geo. II.; to which is prefixed a Proposal for rendering the Laws of England clear and certain, humbly offered to the Consideration of both Houses of Parliament. Third Edition, with numerous Corrections. By THOMAS TOWNSEND BUCKNILL, Barrister-at-Law.

"The instructive chapter which precedes the cases, entitled 'A proposal for rendering the Laws of England clear and certain,' gives the volume a degree of peculiar interest, independent of the value of many of the reported cases. That chapter begins with words which ought, for the information of every people, to be printed in letters of gold. They are as follows: 'Nothing conduces more to the

peace and prosperity of every nation than good laws and the due execution of them.' The history of the civil law is then rapidly traced. Next a history is given of English Reporters, beginning with the reporters of the Year Books from 1 Edw. III. to 12 Hen. VIII.—being near 200 years—and afterwards to the time of the author."—*Canada Law Journal*.

Stevens and Haynes' Series of Reprints of the Early Reporters.

**CHOYCE CASES IN CHANCERY.**

In 8vo., price 2l. 2s., calf antique,

**THE PRACTICE OF THE HIGH COURT OF CHANCERY.**

With the Nature of the several Offices belonging to that Court. And the Reports of many Cases wherein Relief hath been there had, and where denied.

"This volume, in paper, type, and binding (like "Bellewe's Cases") is a facsimile of the antique edition. All who buy the one should buy the other."—*Canada Law Journal*.

In 8vo., price 3l. 3s., calf antique,

**SIR G. COOKE'S COMMON PLEAS REPORTS**

In the Reigns of Queen Anne, and Kings George I. and II.

The Third Edition, with Additional Cases and References contained in the Notes taken from L. C. J. EYRE'S MSS. by Mr. Justice NARES, edited by THOMAS TOWNSEND BUCKNILL, of the Inner Temple, Barrister-at-Law.

"Law books never can die or remain long dead so long as Stevens and Haynes are willing to continue them or revive them when dead. It is certainly surprising to see with what facial accuracy

an old volume of Reports may be produced by these modern publishers, whose good taste is only equalled by their enterprise."—*Canada Law Journal*.

**BROOKE'S NEW CASES WITH MARCH'S TRANSLATION.**

In 8vo., 1873, price 4l. 4s., calf antique,

BROOKE'S (Sir Robert) New Cases in the time of Henry VIII., Edward VI., and Queen Mary, collected out of Brooke's Abridgment, and arranged under years, with a table, together with MARCH'S (John) *Translation of BROOKE'S New Cases* in the time of Henry VIII., Edward VI., and Queen Mary, collected out of BROOKE'S Abridgment, and reduced alphabetically under their proper heads and titles, with a table of the principal matters. In one handsome volume. 8vo. 1873.

"Both the original and the translation having long been very scarce, and the mispaging and other errors in March's translation making a new and corrected edition peculiarly desirable, Messrs.

Stevens and Haynes have reprinted the two books in one volume, uniform with the preceding volumes of the series of Early Reports."—*Canada Law Journal*.

**KELYNGE'S (W.) REPORTS.**

In 8vo., 1873, price 4l. 4s., calf antique,

KELYNGE'S (William) Reports of Cases in Chancery, the King's Bench, &c., from the 3rd to the 9th year of His late Majesty King George II., during which time Lord King was Chancellor, and the Lords Raymond and Hardwicke were Chief Justices of England. To which are added, seventy New Cases not in the First Edition. Third Edition. In one handsome volume. 8vo. 1873.

**KELYNG'S (SIR JOHN) CROWN CASES.**

In 8vo., 1873, price 4l. 4s., calf antique,

KELYNG'S (Sir J.) Reports of Divers Cases in Pleas of the Crown in the Reign of King Charles II., with Directions to Justices of the Peace, and others; to which are added, Three Modern Cases, viz., Armstrong, and Lisle, the King and Plummer, the Queen and Mawgridge. Third Edition, containing several additional Cases never before printed, together with a TREATISE UPON THE LAW AND PROCEEDINGS IN CASES OF HIGH TREASON, first published in 1793. The whole carefully revised and edited by RICHARD LOVELAND LOVELAND, of the Inner Temple, Barrister-at-Law.

"We look upon this volume as one of the most important and valuable of the unique reprints of Messrs. Stevens and Haynes. Little do we know of the mines of legal wealth that lie buried in the old law books. But a careful examination, either of the reports or of the treatise embodied in the volume now before us, will give the reader some idea of the

good service rendered by Messrs. Stevens & Haynes to the profession. . . Should occasion arise, the Crown prosecutor as well as counsel for the prisoner will find in this volume a complete *vade mecum* of the law of high treason and proceedings in relation thereto."—*Canada Law Journal*.

Other Volumes are in Progress.

**BIBLIOTHECA LEGUM.**

In 12mo. (nearly 400 pages), price 2s., cloth lettered,

**A CATALOGUE OF LAW BOOKS,**

Including all the Reports in the various Courts of England, Scotland, and Ireland; with a Supplement to January, 1876. By HENRY G. STEVENS and ROBERT W. HAYNES, Law Publishers and Booksellers; Exporters of Law and Miscellaneous Literature; Foreign and Colonial Literary Agents, &c. &c.

In small 4to., price 2s., cloth lettered, beautifully printed, with a large margin, for the special use of Librarians,

**A CATALOGUE of the REPORTS of CASES**

IN THE VARIOUS COURTS OF THE

**UNITED KINGDOM of GREAT BRITAIN and IRELAND,**

ETC., ETC.

ARRANGED BOTH IN ALPHABETICAL AND CHRONOLOGICAL ORDER.

BY STEVENS & HAYNES,

*Law Publishers.*

In royal 8vo., 1872, price 28s., cloth lettered,

AN INDEX TO

**TENTHOUSAND PRECEDENTS IN CONVEYANCING,**

AND TO

**COMMON AND COMMERCIAL FORMS.**

Arranged in Alphabetical order with Subdivisions of an Analytical Nature; together with an Appendix containing an Abstract of the Stamp Act, 1870, with a Schedule of Duties; the Regulations relative to, and the Stamp Duties payable on, Probates of Wills, Letters of Administration, Legacies, and Successions. By WALTER ARTHUR COPINGER, of the Middle Temple, Barrister-at-Law, Author of "The Law of Copyright in Works of Literature and Art."

"We cannot close this review of Mr. Copinger's publication better than with the apt quotation with which he inaugurates it: 'Knowledge is of two kinds; we know a subject ourselves, or we know where we can find information upon it.'

"Mr. Copinger has not only designed an Index which cannot fail to be of practical use, but has

successfully elaborated the work designed by combining a perspicuous order of arrangement with a most exhaustive table of contents, and most copious references to precedents. The Index is arranged in alphabetical order, with subdivisions of an analytical nature, the latter being made throughout subservient to the former."—*Law Journal.*

In 8vo., 1871, price 5s., cloth,

**THE LAW OF NEGLIGENCE,**

Illustrated by the Recent Decisions of the Courts of the United Kingdom and America. By ROBERT CAMPBELL, Advocate of the Scotch Bar, and of Lincoln's Inn, Barrister-at-Law.

In this Essay, the Author reviews old principles in the light of recent decisions; combining the point of view of the practitioner—noting the latest phase of judicial opinion; with the attempt to digest and harmonize the law, so that (if possible) new decisions may seem to illustrate old and familiar principles, or that the extent and direction of the change introduced by each decision may be correctly estimated.

"I would also refer to some ingenious remarks as to the misapplication of the term '*gross negligence*,' which are to be found in a very good book—Campbell's Law of Negligence."—*Mr. Justice Willes in the case of "Oppenheim v. White Lion Hotel Co."*

"We presume from this being styled the first of a series of practical Law Tracts, that Mr. Campbell

is about to devote his attention to other subjects, which, from the success of his first attempt, we shall expect to see him elucidate considerably. If, however, he should ever find time to expand this tract on the Law of Negligence into a complete treatise, we shall expect to find it one of the most satisfactory text-books on English law."—*Solicitors' Journal.*

THE  
LAW MAGAZINE & REVIEW.

---

NOTICE TO SUBSCRIBERS AND THE PUBLIC.

THIS old-established Legal Periodical (commenced in 1828) having passed into the hands of new proprietors, and under new editorship, is now published in its old form, as a Quarterly, in November, February, May, and August, at Five Shillings per number. The first number of the Fourth Series was published on the 1st November, 1875.

Special arrangements have been made by the Proprietors for giving to this, the only English Quarterly Review of Jurisprudence, unique information on Legal Bibliography and the Progress of Juridical Science on the Continent, which will be confided to their Foreign Editor, with the assistance of eminent Continental Jurists. A feature of great practical utility will be

A QUARTERLY DIGEST OF CASES

REPORTED IN THE

Law Reports, Law Journal, Law Times, and Weekly Reporter. Particular attention will also be paid to American and Colonial Jurisprudence, and the Magazine will, as ever, afford its best support to all measures calculated to advance the true interests of Legal Science and of the Profession.

---

*The Number for February 1876, being the Second of the Fourth Series, will contain, with other Papers, the following Articles:—*

- The Exterritoriality of Public Ships of War in Foreign Ports. By Sir TRAVERS TWISS, Q.C., D.C.L.
- The Public Worship Regulation Act 1874. By Chancellor BURTON.
- Education for the Bar. By Sir EDWARD CREASY.
- Insurable Interests. By G. STEGMANN GIBB, L.L.B.
- Memoir of the late Sir EDWARD VAUGHAN WILLIAMS.
- Punishments under Hindu Law. By WILLIAM RAYMOND FINK.
- Quarterly Digest of Cases. &c. &c. &c.
- 

An Annual Subscription of 20s., paid in advance to the Publishers, will secure the receipt of the LAW MAGAZINE, free by post, within the United Kingdom, or for 23s. to the Colonies and Abroad.

# AMERICAN AND COLONIAL LAW WORKS.

\* \* \* Should the Profession have any difficulty in procuring any of the following Books through their usual Bookseller, application to STEVENS & HAYNES will meet with prompt attention.

## ABBOTT'S NEW YORK DIGEST.

Entirely recast, revised, corrected, and consolidated. A Digest of New York Statutes and Reports from the Earliest Period to the Year 1873. Comprising the Adjudications of all the Courts of the State, together with the Statutes of General Application. By BENJAMIN VAUGHAN ABBOTT and AUSTIN ABBOTT. In 6 royal 8vo. volumes, price 9*l.* 15*s.*, bound.

Now ready, Volumes I. to XIV.,

## THE AMERICAN REPORTS.

CONTAINING ALL CASES OF GENERAL VALUE,

DECIDED BY THE COURT OF LAST RESORT IN EVERY STATE  
IN THE UNION.

The Reports of the Courts of Last Resort of the several States contain cases of great general importance, and which are always considered as high authority by the Courts of the other States, but they are buried beneath a mass of practice and local cases of no value outside of the States in which they are decided.

In "The American Reports" the plan is to give all cases having a general value, hereafter decided by the Court of Last Resort in every State, unencumbered by Practice Cases and those of local importance only.

In 8vo., 1873, price 15*s.*, bound,

## MANUAL OF THE LAWS AND COURTS OF THE UNITED STATES,

AND OF THE SEVERAL STATES AND TERRITORIES.

By HORACE ANDREWS, of the New York Bar.

This book is a complete summary in convenient form of the Jurisdiction of all the Courts, and of the Laws of the United States and all the other States and Territories, for the use of Lawyers, Notaries, Commissioners, Collecting Agents and business men.

## FIRE INSURANCE CASES.

Being a Collection of all the Reported Cases on Fire Insurance in England, Ireland, Scotland, and America, from the earliest period to the present time, Chronologically arranged. With Notes and References. By EDMUND H. BENNETT. Vol. I., covering the period from 1729 to 1839; Vol. II., from 1840 to 1849. Vol. III., from 1849 to 1854. Three vols., royal 8vo. 1872-4. Price 5*l.* 10*s.*, law calf.

Royal 8vo., 1873, price 42*s.*, law calf,

## BIGELOW'S INDEX OF OVERRULED CASES.

The attempt has been made in this Volume to collect all the reported cases from the earliest period to the present time which have been

REVISED, OVERRULED, DENIED, DOUBTED, OR MODIFIED,

With such of the cases explained or distinguished as were deemed important; and, for the accomplishment of this purpose, all the Reports of the English, Irish, and American Courts have been examined, and for the most part page by page. The number of cases amounts to twenty thousand.

"A book which every lawyer will find it useful to have at his elbow."—*Solicitors' Journal*.

## AMERICAN AND COLONIAL LAW WORKS—*continued.*

### LIFE AND ACCIDENT INSURANCE REPORTS.

Vol. I.—Containing Reports of all the published Life and Accident Insurance Cases determined in the American Courts prior to January, 1871. With Notes to English Cases. Vol. II.—Containing all the Cases adjudicated on in the American and English Courts since the publication of Vol. I.; together with the prior leading English Life and Accident Insurance Cases. Vols. III. and IV. embrace the cases decided since January 1872, and also all the Scotch and Canadian cases of general interest, and such of the English and Irish cases as were not published in the second volume. The Scotch cases are as valuable as they are inaccessible to the Profession generally. By MELVILLE M. BIGELOW, of the Boston Bar. Four vols., royal 8vo. 1871-4. Price 7*l.* 10*s.*, law calf.

\*\* Any Foreign Works not in stock can be supplied (if in print) in a few weeks from date of order.

In 8vo. 1876, price 2s., sewed,

## AN ESSAY

ON

### THE ABOLITION OF CAPITAL PUNISHMENT.

EMBRACING MORE PARTICULARLY AN ENUNCIATION AND ANALYSIS  
OF THE PRINCIPLES OF LAW AS APPLICABLE TO CRIMINALS OF  
THE HIGHEST DEGREE OF CLASS.

BY WALTER ARTHUR COPINGER,

OF THE MIDDLE TEMPLE, ESQ., BARRISTER-AT-LAW.

Author of "The Law of Copyright in Works of Literature and Art," "Index to  
Precedents in Conveyancing," "On the Custody and Production of Title Deeds."

In one volume, 8vo., 1876,

## A TREATISE

ON THE

### LAW OF REVIEW IN CRIMINAL CASES.

WITH A COMMENTARY

*ON THE SUMMARY PROCEDURE ACT, 1864, AND THE SUMMARY  
PROSECUTIONS APPEALS (SCOTLAND) ACT, 1875.*

WITH AN APPENDIX

CONTAINING THE STATUTES; WITH NOTES AND CASES.

BY THE HON. HENRY J. MONCREIFF,

ADVOCATE.

In royal 8vo., 1876, price 2s. 6d., sewed,

The Supreme Court of Judicature Acts, 1873 and 1875.

## THE REMUNERATION TO SOLICITORS,

WITH AN ACCOUNT OF MEASURES RELATING TO THE AMENDMENT  
OF THE LAW SINCE 1831,

AND ALSO AN EXAMINATION OF THE PROPOSED ABOLITION OF THE  
APPELLATE JURISDICTION OF THE HOUSE OF LORDS.

BY JOHN TURNER,

SOLICITOR AND PARLIAMENTARY AGENT;

Author of "Registration of Titles," "Justice and its Miscarriages," "Professional  
Remuneration," &c.

This day is published, in 8vo., price 21s., cloth,

## A TREATISE ON THE LAW AND PRACTICE RELATING TO INFANTS.

BY ARCHIBALD H. SIMPSON, M.A.,

*Of Lincoln's Inn, Esq., Barrister-at-Law, and Fellow of Christ's College, Cambridge.*

"Its law is unimpeachable. We have detected no errors, and whilst the work might have been done more scientifically, it is, beyond all question, a compendium of sound legal principles."—*Law Times*.

In preparation, and to be published immediately new Rules are issued,

## CORNER'S CROWN PRACTICE:

Being the Practice of the Crown Side of the Queen's Bench Division of the High Court of Justice; with an Appendix of Rules, Forms, Scale of Costs and Allowances, &c.

SECOND EDITION.

By FREDERICK H. SHORT, of the Crown Office, and R. L. LOVELAND,

*Of the Inner Temple, Barrister-at-Law, Editor of "Kelyng's Crown Cases," and*

*"Hall's Essay on the Rights of the Crown in the Sea Shore."*

Just published, in 8vo., price 6s., cloth,

## THE LAW

CONCERNING THE

## REGISTRATION OF BIRTHS AND DEATHS

IN

ENGLAND AND WALES,

AND

AT SEA.

*Being the whole Statute Law upon the subject; together with a list of Registration Fees and Charges,*

EDITED, WITH

Copious Explanatory Notes and References, and an Elaborate Index,

BY

ARTHUR JOHN FLAXMAN,

OF THE MIDDLE TEMPLE, BARRISTER-AT-LAW.

"Mr. Flaxman's unpretentious but admirable little book makes the duties of all parties under the Act abundantly clear. . . . Lawyers will find the book not only handy, but also instructive and suggestive. To registrars, and all persons engaged in the execution of the law, the book will be invaluable. The index occupies thirty-five pages, and is so full that information on a minute point can be obtained without trouble. It is an index that must have cost the author much thought and time. The statements of what is to be done, who may do it, and what must not be done, are so clear that it is well nigh impossible for any one who consults the book to err. Those who use 'Flaxman's Regis-

tration of Births and Deaths' will admit that our laudatory criticism is thoroughly merited."—*Law Journal*.

"Mr. Arthur John Flaxman, barrister-at-law, of the Middle Temple, has published a small work on 'The Law Concerning the Registration of Births and Deaths in England and Wales, and at Sea.' Mr. Flaxman has pursued the only possible plan, giving the statutes and references to cases. The remarkable feature is the index, which fills no less than 45 out of a total of 112 pages. The index alone would be extremely useful, and is worth the money asked for the work."—*Law Times*.

Just published, in 8vo., Third Edition, price 5s., cloth,

THE  
MARRIED WOMEN'S PROPERTY ACT, 1870,

AND THE

*Married Women's Property Act, 1870,  
Amendment Act, 1874.*

ITS RELATIONS TO THE

DOCTRINE OF SEPARATE USE.

With Appendix of Statutes, Cases and Forms.

BY J. R. GRIFFITH, B.A. OXON.,

OF LINCOLN'S INN, BARRISTER-AT-LAW.

"Mr. Griffith's useful little book has reached a third edition, and, as will be seen from the title, now includes the Amending Act. Both Acts are well understood and clearly interpreted by Mr. Griffith."—*Solicitors' Journal*.

"Mr. Griffith, the editor of the present work (and he is also the editor of that excellent treatise, 'Snell's Principles of Equity') has, by his introduction and notes, given to the lawyer every necessary assistance in the interpretation of these statutes,

which, from their somewhat revolutionary character, require to be carefully studied in order that their relation to the principles of the status of married women at Common Law and in Equity may be appreciated. All the cases decided under these Acts have been quoted and considered; while in the introduction there is a concise statement of the liability of the wife's separate estate to her general engagements."—*Irish Law Times*.

In 8vo., 1872, price 7s. 6d., cloth,

AN EPITOME AND ANALYSIS  
OF  
SAVIGNY'S TREATISE ON OBLIGATIONS IN ROMAN LAW.

BY ARCHIBALD BROWN, M.A.

Edin. and Oxon. and B.C.L. Oxon., of the Middle Temple, Barrister-at-Law.

"Mr. Archibald Brown deserves the thanks of all interested in the science of law, whether as a study or a practice, for his edition of Herr von Savigny's great work on 'Obligations.' Mr. Brown has undertaken a double task—the translation of his author, and the analysis of his author's matter. That he has succeeded in reducing the bulk of the original will be seen at a glance; the French translation consisting of two volumes, with some five hundred pages apiece, as compared with Mr. Brown's thin volume of a hundred and

fifty pages. At the same time the pith of Von Savigny's matter seems to be very successfully preserved, nothing which might be useful to the English reader being apparently omitted.

"The new edition of Savigny will, we hope, be extensively read and referred to by English lawyers. If it is not, it will not be the fault of the translator and epitomiser. Far less will it be the fault of Savigny himself, whose clear definitions and accurate tests are of great use to the legal practitioner."—*Law Journal*.

## THE LAW OF EXTRADITION.

Just published, Second Edition, in 8vo., price 18s., cloth,

A TREATISE UPON

## THE LAW OF EXTRADITION.

WITH THE

CONVENTIONS UPON THE SUBJECT EXISTING BETWEEN  
ENGLAND AND FOREIGN NATIONS,

AND

THE CASES DECIDED THEREON.

By EDWARD CLARKE,

OF LINCOLN'S INN, BARRISTER-AT-LAW, AND LATE TANCRED STUDENT.

“Mr. Clarke's accurate and sensible book is the best authority to which the English reader can turn upon the subject of Extradition.”—*Saturday Review*.

“The opinion we expressed of the merits of this work when it first appeared has been fully justified by the reputation it has gained. This new edition, embodying and explaining the recent legislation on extradition, is likely to sustain that reputation. . . . There are other points we had marked for comment, but we must content ourselves with heartily commending this new edition to the attention of the profession. It is seldom we come across a book possessing so much interest to the general reader and at the same time furnishing so useful a guide to the lawyer.”—*The Solicitors' Journal*.

“The appearance of a second edition of this treatise does not surprise us. It is a useful book, well arranged and well written. A student who wants to learn the principles and practice of the law of extradition will be greatly helped by Mr. Clarke. Lawyers who have extradition business will find this volume an excellent book of reference. Magistrates who have to administer the extradition law will be greatly assisted by a careful perusal of ‘Clarke upon Extradition.’ This may be called a warm commendation, but those who have read the book will not say it is unmerited. We have so often to expose the false pretenders to legal authorship that it is a pleasure to meet with a volume that is the useful and unpretending result of honest work. Besides the Appendix, which contains the extradition conventions of this country since 1843, we have eight chapters. The first is ‘Upon the Duty of Extradition;’ the second on the ‘Early Treaties and Cases;’ the others on the law in the United States, Canada, England, and France, and the practice in those countries.”—*The Law Journal*.

“One of the most interesting and valuable contributions to legal literature which it has been our province to notice for a long time, is ‘Clarke's Treatise on the Law of Extradition.’ . . . Mr. Clarke's work comprises chapters upon the Duty of Extradition; Early Treaties and Cases; History of the Law in the United States, in Canada, in England, in France, &c., with an Appendix containing the Conventions existing between England and Foreign Nations, and the Cases decided thereon. . . . The work is ably prepared throughout, and should form a part of the library of every lawyer interested in great Constitutional or International Questions.”—*Albany Law Journal*.

THE TIMES of September 7, 1874, in a long article upon “Extradition Treaties,” makes considerable use of this work, and writes of it as “Mr. Clarke's useful Work on Extradition.”

## PRACTICE OF CONVEYANCING.

This day is published, in One Volume, 8vo., price 14s., cloth,

### Title Deeds:

*THEIR CUSTODY, INSPECTION, AND PRODUCTION,*

*At Law, in Equity and in Matters of Conveyancing,*

INCLUDING COVENANTS FOR THE PRODUCTION OF DEEDS AND  
ATTESTED COPIES ;

*With an Appendix of Precedents, the Vendor and Purchaser Act, 1874,  
&c. &c. &c.*

BY WALTER ARTHUR COPINGER,

OF THE MIDDLE TEMPLE, BARRISTER-AT-LAW ;

Author of "The Law of Copyright" and "Index to Precedents in Conveyancing."

*"There is no subject on which a practical knowledge is more required than that of title deeds ; and this volume supplies a want. Mr. Copinger has, in his well-written chapters, entered most fully and thoroughly into the special subject matter of his work, and has accordingly produced a book worthy of being used by every careful conveyancer who knows the importance of studying all questions of title."—THE LAW.*

"In dealing with 'documentary evidence at law and in equity and in matters of conveyancing, including covenants for the production of deeds and attested copies,' Mr. Copinger has shown discrimination, for it is a branch of the general subject of evidence which is very susceptible of independent treatment. We are glad, therefore, to be able to approve both of the design and the manner in which it has been executed.

"The work opens with a chapter on the custody of title deeds (1) generally, (2) between trustees and *cestuis que trust*, (3) between mortgagee and mortgagor, and (4) miscellaneous. Chapters II. and III. treat of the production of title deeds at law and in equity. In Chapter IV. the author considers the custody and production of title deeds on a sale, (1) as relates more particularly to the vendor, and (2) as relates more particularly to the purchaser. Chapter V. treats of the non-production of title deeds ; Chapter VI. of the purchaser's right to the title deeds ; Chapter VII. of attested copies ; whilst Chapter VIII., which will prove very useful to conveyancers, deals with covenants for the production of deeds. There is an elaborate appendix containing precedents.

"The literary execution of the work is good enough to invite quotation, but the volume is not large, and we content ourselves with recommending it to the profession."—*Law Times.*

"A really good treatise on this subject must be essential to the lawyer ; and this is what we have here. Mr. Copinger has supplied a much-felt want by the compilation of this volume. We have not space to go into the details of the book ; it appears well arranged, clearly written, and fully elaborated. With these few remarks we recommend this volume to our readers. It may be remarked that there is an appendix added, showing the nature of the evidence required in verification of abstracts, a list of the searches and inquiries which should be made on a purchase, and concluding with a selection of precedents of covenants for production of deeds."—*Law Journal.*

In 8vo., 1875, price 9s., cloth,

## FORMS OF LEASES

And other forms relating to Land in Ireland ; with an Introduction and Notes.

By JOHN HENRY EDGE, Barrister-at-Law.

*Now Ready, in One thick Volume, 8vo., of nearly One Thousand Pages,  
price 42s., strongly bound in Cloth,*

# A MAGISTERIAL & POLICE GUIDE:

Being the Statute Law,

INCLUDING THE SESSION OF 1874,

WITH NOTES AND REFERENCES TO THE MOST RECENTLY DECIDED CASES,

RELATING TO THE

PROCEDURE, JURISDICTION, AND DUTIES OF MAGISTRATES  
AND POLICE AUTHORITIES,

IN THE METROPOLIS AND IN THE COUNTRY.

With an Introduction showing the General Procedure before Magistrates  
both in Indictable and Summary Matters.

BY

HENRY C. GREENWOOD,

*Stipendiary Magistrate for the District of the Staffordshire Potteries,*

AND

TEMPLE C. MARTIN,

*Of the Southwark Police Court.*

## NOTICES OF THE WORK.

### LAW TIMES.

"For the form of the work we have nothing but commendation. We may say we have here our ideal law book. It may be said to omit nothing which it ought to contain."

### SOLICITORS' JOURNAL.

"This handsome volume aims at presenting a comprehensive magisterial handbook for the whole of England. The mode of arrangement seems to us excellent, and is well carried out.

"As to the care with which the work has been executed, a somewhat minute examination of three or four of the divisions enables us to speak on the whole favourably."

### MORNING POST.

"Great pains have evidently been taken in every part of the work to ensure correctness; and this quality, together with that of its great comprehensiveness, can scarcely fail to render this guide to procedure before magisterial and police authorities eminently acceptable to the many classes of persons to whom full and accurate information on the subject it deals with is often of the utmost importance."

### DAILY NEWS.

"The *Magisterial and Police Guide*, by Mr. Henry Greenwood and Mr. Temple Martin, is a model work in its conciseness, and, so far as we have been able to test it, in completeness and accuracy. *It ought to be in the hands of all who, as magistrates or otherwise, have authority in matters of police.*"

### LIVERPOOL MERCURY.

"Both to justices and practitioners desirous of obtaining a book of reference giving the present practice of the courts, this book will be found of great service—nay, almost invaluable."

### SATURDAY REVIEW.

"Mr. Greenwood, stipendiary magistrate in the Staffordshire Potteries district, and Mr. Martin, of the Southwark Police Court, have produced a portly magisterial handbook applicable to the whole of England. It contains all the statute law relating to the procedure, jurisdiction, and duties of magistrates and police authorities, with notes and references to recent decisions, and appears to be put together, as might be expected from the professional experience of the authors, in a thorough and business-like manner."

### MIDLAND COUNTIES HERALD.

"This work is eminently practical, and supplies a real want. It plainly and concisely states the law on all points upon which Magistrates are called upon to adjudicate, systematically arranged, so as to be easy of reference. It ought to find a place on every Justice's table, and we cannot but think that its usefulness will speedily ensure for it as large a sale as its merits deserve."

New ready, in one volume 8vo., price 20s., cloth,

# THE SUPREME COURT OF JUDICATURE ACTS, 1873 & 1875 :

With the Rules, Orders, and Costs thereunder: edited with Copious Notes, References, and a very Full Index, and forming a complete Book of Practice under the above Acts. By WILLIAM DOWNES GRIFFITH, of the Inner Temple, Barrister-at-Law; late Her Majesty's Attorney-General for the Colony of the Cape of Good Hope; Author of "Griffith's Bankruptcy."

*The above bound in best basil leather . . . . . 25s.*  
*Do. do. law calf . . . . . 26s.*

## Reviews of Mr. W. Downes Griffith's Edition of the Judicature Acts.

Mr. Griffith's notes on the rules are very voluminous. Thus we have five pages on the decisions as to suing persons out of the jurisdiction, five pages on service of process, nine pages on misjoinder and nonjoinder of parties, three pages on demurrers, thirteen pages with a host of cited cases on discovery, twenty pages on production and inspection, three pages on notice of trial, and thirteen pages on abatement of actions and suits, by death, marriage, insolvency, &c. There is in these elaborate notes much matter of great value and interest. The

author carefully points out in what respect any given rule follows the old practice, or introduces any new elements. *The index is remarkable for its unparalleled copiousness, and too much applause cannot be bestowed on Mr. Griffith for his industry in this respect.* We never before observed in any book an index of 146 pages, and those who use Mr. Griffith's book will highly appreciate this part of it. Neither can we fail to praise the type, paper, and general appearance of the work, which are all excellent."—*Law Journal.*

"Mr. Griffith, as we have already had occasion to acknowledge, has completely mastered the scope of the Acts. His anticipations of points likely to arise

in practice cannot fail, in the necessary absence of judicial decisions, to be of great value to the practising lawyer."—*Law Magazine.*

"Mr. Griffith is not a novice in legal literature. He attacked the very formidable subject of bankruptcy practice under the Act of 1867, in building up two large volumes on the basis of Archbold. In that work he showed capacity for collating and arranging cases, and the Practice has proved of the greatest possible utility to bankruptcy practitioners. The same capacity which served him in dealing with bankruptcy practice has served him well in his treatment of the Judicature Acts. The industry and care which he has bestowed upon the index have produced a complete digest of the enactments. This index is by far the most exhaustive which we have met with, either separate or appended to a

treatise. A very good specimen of the work, too long however for quotation, is the note on the mode of service of a writ of summons (Order IX.). Another excellent piece of work is on 'Parties,' being an elaborate note to rule 13 of Order XVI. The whole law on the subject is discussed historically, and the note presents a valuable *résumé*. Perhaps, however, the most remarkable part of the notes is to be found under the title 'Discovery and Inspection,' where Mr. Griffith gives us quite a treatise, citing numerous cases, and giving a clear insight into the law. We heartily congratulate Mr. Griffith upon the production of a very intelligent and ably executed edition of the Acts and Orders."—*Law Times.*

"Mr. Griffith works out the practice very carefully."—*Saturday Review.*

"Very much has been done in this book to promote the convenience of the reader. The type is admirably clear and pleasant; the number of the section or rule is stated at the head of the margin in bold figures, rendering reference extremely easy: copious marginal notes have been appended to the rules as well as the Acts; and we observe that even to the forms in the appendices to the Act of last session there are given marginal references to rules conceived to bear upon them. *And there is an index extending over 144 pages, so arranged, moreover, as to constitute a full analysis of the Acts and rules.* . . . . .

"Coming now to the notes, these are often lengthy, and in some cases—as for instance, on discovery under Order XXXI. (p. 229), and on change of parties by death, &c. (p. 317), and on parties generally (p. 181)—they really form small treatises or digests of cases. The other notes may be described in general as composed of statements of the object or effect of the section or rule under comment; references to its origin and to the former law, and criticisms on its wording or probable operation."—*Solicitors' Journal.*

## JUDICATURE RULES AND ORDERS.

This day is published, in 8vo., price 1s., sewed,

# RULES AND ORDERS OF THE SUPREME COURT,

*Dated 28th October and 1st December;*

Forming a Supplement to "Griffith's Practice" and other Editions of the JUDICATURE ACTS.
